You can prepare for the Amazon AWS Certified Cloud Practitioner (AWS-Certified-Cloud-Practitioner) exam anytime, anywhere using Prep4King AWS-Certified-Cloud-Practitioner exam dumps.

Amazon AWS Certified Cloud Practitioner Sample Questions (Q396-Q401):

NEW QUESTION # 396

A company needs a low-code, visual workflow service that developers can use to build distributed applications. Which AWS service is designated to meet these requirements?

- A. AWS Config
- B. AWS Lambda
- C. AWS Step Functions
- D. Amazon CloudWatch

Answer: C

NEW QUESTION # 397

Which controls are the responsibility of both AWS and AWS customers, according to the AWS shared responsibility model? (Select TWO.)

- A. Physical and environmental controls
- B. Choice of the AWS Region where data is stored
- **C. Configuration management**
- D. Account structures
- **E. Patch management**

Answer: C,E

Explanation:

Patch management and configuration management are controls that are the responsibility of both AWS and AWS customers, according to the AWS shared responsibility model. Patch management is the process of applying updates to software and applications to fix vulnerabilities, bugs, or performance issues. Configuration management is the process of defining and maintaining the settings and parameters of systems and applications to ensure their consistency and reliability. AWS is responsible for patching and configuring the software and services that it manages, such as the AWS global infrastructure, the hypervisor, and the AWS managed services. The customer is responsible for patching and configuring the software and services that they manage, such as the guest operating system, the applications, and the AWS customer-managed services.

Physical and environmental controls are the responsibility of AWS, according to the AWS shared responsibility model. Physical and environmental controls are the measures that protect the physical security and availability of the AWS global infrastructure, such as power, cooling, fire suppression, and access control.

AWS is responsible for maintaining these controls and ensuring the resilience and reliability of the AWS Cloud. Account structures are the responsibility of the customer, according to the AWS shared responsibility model. Account structures are the ways that customers organize and manage their AWS accounts and resources, such as using AWS Organizations, IAM users and roles, resource tagging, and billing preferences.

The customer is responsible for creating and configuring these structures and ensuring the security and governance of their AWS environment. Choice of the AWS Region where data is stored is the responsibility of the customer, according to the AWS shared responsibility model. AWS Regions are geographic areas that consist of multiple isolated Availability Zones. Customers can choose which AWS Region to store their data and run their applications, depending on their latency, compliance, and cost requirements. The customer is responsible for selecting the appropriate AWS Region and ensuring the data sovereignty and regulatory compliance of their data.

NEW QUESTION # 398

Under the AWS shared responsibility model, which of the following activities are the customer's responsibility? (Choose two.)

- **A. Encrypting data on the client-side**
- B. Maintaining environmental controls within a data center
- **C. Configuring Network Access Control Lists (ACL)**
- D. Patching operating system components for Amazon Relational Database Server (Amazon RDS)
- E. Training the data center staff

Answer: A,C

NEW QUESTION # 399

Which Amazon S3 storage class is optimized to provide access to data with lower resiliency requirements, but rapid access when needed such as duplicate backups?

- A. Amazon S3 Glacier Deep Archive
- B. Amazon S3 Glacier
- C. Amazon S3 Standard
- **D. Amazon S3 One Zone-Infrequent Access**

Answer: D

Explanation:

Explanation/Reference: <https://aws.amazon.com/s3/storage-classes/>

NEW QUESTION # 400

If you have a set of frequently accessed files that are used on a daily basis, what S3 storage class should you store them in?

Choose the Correct answer:

- A. Infrequent Access
- B. Reduced Redundancy
- C. Fast Access
- **D. Standard**

Answer: D

Explanation:

The Standard storage class should be used for files that you access on a daily or very frequent basis.

NEW QUESTION # 401

.....
