We are committed to designing a kind of scientific Associate-Cloud-Engineer study material to balance your business and study schedule. With our Associate-Cloud-Engineer exam guide, all your learning process includes 20-30 hours. As long as you spare one or two hours a day to study with our laTest Associate-Cloud-Engineer Quiz prep, we assure that you will have a good command of the relevant knowledge before taking the Associate-Cloud-Engineer exam. What you need to do is to follow the Associate-Cloud-Engineer exam guide system at the pace you prefer as well as keep learning step by step.

Google Associate Cloud Engineer Exam Sample Questions (Q18-Q23):

NEW QUESTION # 18

You need to create a custom VPC with a single subnet. The subnet's range must be as large as possible. Which range should you use?

- A. 192.168.0.0/16
https://cloud.google.com/vpc/docs/vpc#manually_created_subnet_ip_ranges
- B. 10.0.0.0/8
- C. 172.16.0.0/12
- D. .00.0.0/0

Answer: B

NEW QUESTION # 19

You are setting up a Windows VM on Compute Engine and want to make sure you can log in to the VM via RDP. What should you do?

- A. After the VM has been created, download the JSON private key for the default Compute Engine service account. Use the credentials in the JSON file to log in to the VM.
- B. After the VM has been created, use your Google Account credentials to log in into the VM.
- C. After the VM has been created, use `gcloud compute reset-windows-password` to retrieve the login credentials for the VM.
- D. When creating the VM, add metadata to the instance using 'windows-password' as the key and a password as the value.

Answer: C

Explanation:

You can generate Windows passwords using either the Google Cloud Console or the `gcloud` command-line tool. This option uses the right syntax to reset the windows password.

`gcloud compute reset-windows-password windows-instance`

Ref: <https://cloud.google.com/compute/docs/instances/windows/creating-passwords-for-windows-instances#gcloud>

NEW QUESTION # 20

Your learn wants to deploy a specific content management system (CMS) solution to Google Cloud. You need a quick and easy way to deploy and install the solution. What should you do?

- A. Search for the CMS solution in Google Cloud Marketplace. Deploy the solution directly from Cloud Marketplace.
- B. Search for the CMS solution in Google Cloud Marketplace. Use Terraform and the Cloud Marketplace ID to deploy the solution with the appropriate parameters.

- C. Use the installation guide of the CMS provider. Perform the installation through your configuration management system.
- D. Search for the CMS solution in Google Cloud Marketplace. Use gcloud CLI to deploy the solution.

Answer: A

NEW QUESTION # 21

Your company has workloads running on Compute Engine and on-premises. The Google Cloud Virtual Private Cloud (VPC) is connected to your WAN over a Virtual Private Network (VPN). You need to deploy a new Compute Engine instance and ensure that no public Internet traffic can be routed to it. What should you do?

- A. Create a route on the VPC to route all traffic to the instance over the VPN tunnel.
- B. Create the instance without a public IP address.
- C. Create a deny-all egress firewall rule on the VPC network.
- **D. Create the instance with Private Google Access enabled.**

Answer: D

Explanation:

Get private access to Google services, such as storage, big data, analytics, or machine learning, without having to give your service a public IP address.

Reference: <https://cloud.google.com/vpc>

NEW QUESTION # 22

Your team is using Linux instances on Google Cloud. You need to ensure that your team logs in to these instances in the most secure and cost efficient way. What should you do?

- A. Attach a public IP to the instances and allow incoming connections from the internet on port 22 for SSH.
- B. Use a third party tool to provide remote access to the instances.
- C. Create a bastion host with public internet access. Create the SSH tunnel to the instance through the bastion host.
- **D. Use the gcloud compute ssh command with the --tunnel-through-iap flag. Allow ingress traffic from the IP range 35.235.240.0/20 on port 22.**

Answer: D

NEW QUESTION # 23

.....

As we all know, practice makes perfect. It's also applied into preparing for the exam. Associate-Cloud-Engineer training materials of us contain both quality and quantity, and you will get enough practice if you choose us. In addition, Associate-Cloud-Engineer exam cram cover most of the knowledge points for the exam, and you can master the major knowledge points for the exam as well as improve your professional ability in the process of learning. We are pass guarantee and money back guarantee if you fail to pass your exam by using Associate-Cloud-Engineer Exam Dumps of us. Online and offline service are available by us, if you have any questions, you can consult us.
