Fabrikam identifies the following security risks:

Some accounts connect to AD DS resources by using insecure protocols such as NTLMv1, SMB1, and unsigned LDAP.

Servers have Windows Defender Firewall enabled. Server administrators sometimes modify firewall rules and allow risky connections.

Requirements

Security Requirements

Fabrikam identifies the following security requirements:

On-Premises Migration Plan

Fabrikam plans to migrate all the existing servers and identifies the following migration requirements:

The migration will be performed by using the Active Directory Migration Tool (ADMT).

A computer named ADMTcomputer will be deployed to the corp.fabrikam.com domain to run ADMT migration procedures.

User accounts will retain their existing password.

Migrate the data share from Fileserver1 to a new server named Fileserver2 that will run Windows Server 2022. After the migration, the data share must be accessible by using the existing UNC path.

Azure Migration Plan

Fabrikam plans to migrate some resources to Azure and identifies the following migration requirements:
