Latest Braindumps Workday Workday-Prism-Analytics Book | Workday-Prism-Analytics Latest Dumps

2025 Latest Pass4training Workday-Prism-Analytics PDF Dumps and Workday-Prism-Analytics Exam Engine Free Share: https://drive.google.com/open?id=1qqelRweQrrDT9R_nWqucOJ7vo8PTagpN

We provide first-rate service on the Workday-Prism-Analytics learning prep to the clients and they include the service before and after the sale, 24-hours online customer service and long-distance assistance, the refund service and the update service. The client can try out our and download Workday-Prism-Analytics Guide materials freely before the sale and if the client have problems about our Workday-Prism-Analytics study braindumps after the sale they can contact our customer service at any time.

If you are still hesitating whether to select Pass4training, you can free download part of our exam practice questions and answers from Pass4training website to determine our reliability. If you choose to download all of our providing exam practice questions and answers, Pass4training dare 100% guarantee that you can pass Workday Certification Workday-Prism-Analytics Exam disposably with a high score.

Workday-Prism-Analytics Latest Dumps - New Workday-Prism-Analytics Exam Answers

Workday Certification Workday-Prism-Analytics Exam is very popular among the IT people to enroll in the exam. Passing Workday certification Workday-Prism-Analytics exam can not only chang your work and life can bring, but also consolidate your position in the IT field. But the fact is that the passing rate is very low.

Workday Pro Prism Analytics Exam Sample Questions (Q20-Q25):

NEW QUESTION # 20
You are a new Prism customer and you want to ensure the correct set of fields is brought into a derived dataset. When should you apply a Manage Fields stage?

- A. At the beginning of the primary pipeline of the Base Dataset.
- B. At the end of the Primary Pipeline of a published dataset.
- C. At the beginning of the Primary Pipeline of the derived dataset.
- D. After the dataset is published.

Answer: C

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
In Workday Prism Analytics, a Manage Fields stage is used to control the fields in a dataset by renaming, hiding, or changing field types, among other actions. According to the official Workday Prism Analytics study path documents, to ensure the correct set of fields is brought into a derived dataset (DDS), the Manage Fields stage should be applied at the beginning of the Primary Pipeline of the derived dataset (option C).
Placing the Manage Fields stage early in the pipeline-right after the initial import stage (Stage 1)-allows you to define the field structure upfront, ensuring that subsequent transformationstages (e.g., Join, Filter, Calculate Field) operate on the desired set of fields. This approach helps maintain consistency and avoids unnecessary processing of fields that are not needed in later stages.
The other options are not optimal:
* A. After the dataset is published: You cannot add transformation stages like Manage Fields after a dataset is published; transformations must be applied during the dataset's creation or editing.
* B. At the end of the Primary Pipeline of a published dataset: Similar to option A, you cannot modify a published dataset's pipeline, and placing Manage Fields at the end would not prevent unnecessary fields from being processed in earlier stages.
* D. At the beginning of the primary pipeline of the Base Dataset: A Base Dataset does not have a transformation pipeline; it is a direct import of a table, so Manage Fields stages can only be applied in a Derived Dataset.
Applying the Manage Fields stage at the beginning of the derived dataset's Primary Pipeline ensures efficient data preparation and transformation.

NEW QUESTION # 21
You are loading data into a table using the Data Change task. The field type in the source file is Numeric and the table field type is Text. What can you do to load the data?

- A. Map the Numeric field to the table Text field.
- B. Use a different source file, as the field types are incompatible.
- C. Change the connection type for the data change task.
- D. Change the field type in the parsing stage from Numeric to Text.

Answer: A

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
In Workday Prism Analytics, the Data Change task is used to load data from a source file into a table, and it supports flexible field type mapping to accommodate differences between source and target field types.
According to the official Workday Prism Analytics study path documents, when the source file has a Numeric field type and the target table has a Text field type, you can map the Numeric field to the Text field in the Data Change task. Workday Prism Analytics automatically handles the conversion of Numeric values to Text during the data loading process, as Text fields can store Numeric values as strings without data loss.
The other options are not necessary or appropriate:
* A. Use a different source file, as the field types are incompatible: The field types are not incompatible; Prism supports mapping Numeric to Text, making a new source file unnecessary.
* C. Change the field type in the parsing stage from Numeric to Text: The parsing stage defines how the source file is interpreted, but changing the source field type is not required since the mapping handles the conversion.
* D. Change the connection type for the data change task: The connection type (e.g., file upload or Workday report) is unrelated to field type compatibility and does not address the issue.
By mapping the Numeric field to the Text field in the Data Change task, the data can be successfully loaded, leveraging Prism's built-in type conversion capabilities to ensure compatibility.
References:
Workday Prism Analytics Study Path Documents, Section: Data Prep and Transformation, Topic: Field Type Mapping in Data Change Tasks Workday Prism Analytics Training Guide, Module: Data Prep and Transformation, Subtopic: Handling Field Type Conversions in Data Loading

NEW QUESTION # 22

Why should you include Workday instance field types in the Workday report that you use to import data into Prism?

- A. Performance is improved in the final Prism datasource when published.
- B. Joins are more easily performed with instance field types.
- C. Unions are more easily performed with instance field types.
- D. The final Prism datasource can support drilling into Workday objects.

Answer: D

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
When importing data into Workday Prism Analytics from a Workday report, including Workday instance field types in the report is critical for enabling specific functionality in the resulting Prism data source.
According to the official Workday Prism Analytics study path documents, including instance field types allows the final Prism data source to support drilling into Workday objects. Instance field types represent references to Workday business objects (e.g., Worker, Position, or Organization), and including them in the report ensures that the Prism data source retains the ability to navigate to these objects within Workday's reporting and analytics framework. This enables users to perform drill-down actions, such as accessing detailed object data directly from Prism visualizations or reports.
The other options do not accurately reflect the primary benefit of including instance field types:
* B. Performance is improved in the final Prism datasource when published: Instance field types do not directly impact the performance of the published data source; performance is more influenced by data volume and indexing.
* C. Unions are more easily performed with instance field types: Unions depend on schema compatibility, not instance field types, which are specific to Workday object references.
* D. Joins are more easily performed with instance field types: While instance field types can be used in joins, their primary purpose is to enable object navigation, not to simplify join operations.
By including instance field types, the Prism data source gains enhanced interactivity, allowing users to leverage Workday's object model for deeper analysis and navigation.

NEW QUESTION # 23

What task or report should you access to view a Prism data source?

- A. Edit Data Source Security task
- B. Edit Dataset Transformations task
- C. View Dataset Details report
- D. View Prism Data Source report

Answer: D

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
In Workday Prism Analytics, a Prism data source represents the published dataset that is available for reporting and analytics within the Workday ecosystem. According to the official Workday Prism Analytics study path documents, the "View Prism Data Source" report is the specific task or report designed to allow users to view the details of a Prism data source. This report provides comprehensive information about the data source, including its metadata, structure, and associated attributes, enabling users to understand the data available for reporting purposes.
The other options do not serve this purpose. The "Edit Dataset Transformations task" is used to modify the transformation logic applied to a dataset, not to view a data source. The "Edit Data Source Security task" focuses on managing security settings for a data source, such as access permissions, rather than viewing its contents. Similarly, the "View Dataset Details report" provides information about a dataset (including its metadata and sample rows) but does not specifically address the published Prism data source, which is a distinct entity created after a dataset is published.
The "View Prism Data Source" report is the correct choice as it directly aligns with the need to inspect the properties and structure of a Prism data source, ensuring users can verify its suitability for reporting or integration with Workday reports.

NEW QUESTION # 24

You want to delete a Prism data source, but you are unable to complete the dataset unpublish. You have deleted the Report Writer reports. What else must you delete, if present?

- A. Upstream tables
- B. Published rows
- C. Upstream datasets
- D. Discovery board visualizations

Answer: D

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
In Workday Prism Analytics, unpublishing a dataset to delete a Prism data source requires removing all dependencies that reference the data source. According to the official Workday Prism Analytics study path documents, if you have already deleted Report Writer reports but are still unable to unpublish the dataset, you must also delete any discovery board visualizations that reference the Prism data source (option C). Discovery boards in Workday allow users to create visualizations based on Prism data sources, and these visualizations create a dependency on the data source. If such visualizations exist, the system prevents the dataset from being unpublished until they are removed, ensuring that no downstream dependencies are broken.
The other options are incorrect:
* A. Upstream tables: Upstream tables are the source of data for the dataset, but they are not dependencies of the published data source and do not need to be deleted to unpublish the dataset.
* B. Published rows: Published rows are part of the data source itself and are removed when the dataset is unpublished; they are not a separate dependency to delete.
* D. Upstream datasets: Upstream datasets may feed into the dataset being unpublished, but they are not dependencies of the published data source and do not prevent unpublishing.
Deleting discovery board visualizations ensures all dependencies are cleared, allowing the dataset to be unpublished and the Prism data source to be deleted.

NEW QUESTION # 25

......

The profession of our experts is expressed in our Workday-Prism-Analytics training prep thoroughly. They are great help to catch on the real knowledge of Workday-Prism-Analytics exam and give you an unforgettable experience. Do no miss this little benefit we offer for we give some discounts on our Workday-Prism-Analytics Exam Questions from time to time though the price of our Workday-Prism-Analytics study guide is already favourable. And every detail of our Workday-Prism-Analytics learing braindumps is perfect!

Workday-Prism-Analytics Latest Dumps: https://www.pass4training.com/Workday-Prism-Analytics-pass-exam-training.html

Workday Latest Braindumps Workday-Prism-Analytics Book You may get questions from different web sites or books, but logic is the key, Once you master every questions and knowledge of Workday-Prism-Analytics practice material, passing the exam will be just like a piece of cake for you, Our Workday-Prism-Analytics learning materials have free demo for the candidates, and they will have a general idea about the Workday-Prism-Analytics learning materials, Workday Latest Braindumps Workday-Prism-Analytics Book To all the candidates buy the braindumps, we provide track service,when you buy the braindumps within one year.

Also driving this shift is cities like San Francisco Workday-Prism-Analytics and New York have become so expensive, it s simply become hard for companies and their employees to locate there, LinkedIn s Labor Arbitrage Workday-Prism-Analytics Latest Dumps Comes To Silicon Valley covers the shift to lower cost locations by many Silicon Valley firms.

Workday Workday-Prism-Analytics Dumps - Pass Exam And Build

Successful Career

Supporting this kind of cultural achievement, their responsibility Workday-Prism-Analytics Practice Test lies with each of us, You may get questions from different web sites or books, but logic is the key.

Once you master every questions and knowledge of Workday-Prism-Analytics practice material, passing the exam will be just like a piece of cake for you, Our Workday-Prism-Analytics learning materials have free demo for the candidates, and they will have a general idea about the Workday-Prism-Analytics learning materials.

To all the candidates buy the braindumps, we provide track service,when New Workday-Prism-Analytics Exam Fee you buy the braindumps within one year, Don't have enough information about the new role-based Reporting and Analytics certifications?
