

Latest C-DBADM-2404 Study Practice Questions are Highly-Praised Exam Brindumps

C_DBADM_2404 Exam Details	
Exam Code	C_DBADM_2404
Full Exam Name	SAP Certified Associate - Database Administrator - SAP HANA
Solution	HANA
Level	Associate
No. of Questions	80
Sample Questions	SAP Database Administrator Certification Sample Questions
Practice Exams	SAP Database Administrator Certification Practice Exam
Passing Score	80%
Time Limit	180 Minutes
Languages	English, Japanese
Become SAP Certified with ERPPrep.com	

P.S. Free & New C-DBADM-2404 dumps are available on Google Drive shared by DumpsTests: https://drive.google.com/open?id=1E8rlby_KjZ_MYdz9SFKgYR-cQWL_dJTP

This is a simple and portable document of real SAP C-DBADM-2404 Exam Questions. It contains actual SAP C-DBADM-2404 exam questions and answers and can be helpful for quick revision or for studying on the go. It is also printable so you can easily study on a hard copy of the pdf having a break from staring.

SAP C-DBADM-2404 Exam Syllabus Topics:

Topic	Details
Topic 1	Monitoring and Troubleshooting: It discusses how to use SAP HANA Cockpit and SAP HANA database explorer to assess and troubleshoot SAP HANA database systems.
Topic 2	User Management: It explains how to create SAP HANA user groups, users, and roles to set up database access management.
Topic 3	Provisioning SAP HANA: This topic discusses how to accomplish sizing and provisioning tasks for different SAP HANA deployment options.

SAP C-DBADM-2404 Free Sample | C-DBADM-2404 Reliable Exam Simulations

Once you ensure your grasp on the C-DBADM-2404 questions and answers, evaluate your learning solving the C-DBADM-2404 practice tests provided by our testing engine. This innovative facility provides you a number of practice questions and answers and highlights the weak points in your learning. You can improve the weak areas before taking the actual test and thus brighten your chances of passing the C-DBADM-2404 Exam with an excellent score. Moreover, doing these practice tests will impart you knowledge of the actual C-DBADM-2404 exam format and develop your command over it.

SAP Certified Associate - Database Administrator - SAP HANA Sample Questions (Q34-Q39):

NEW QUESTION # 34

You can stop in the SAP HANA cockpit from the SYSTEMDB Manage Services app?
To ve: There are 2 correct answers to this question.

- A. Web dispatcher
- **B. Index server**
- C. XS engine
- D. Compile server

Answer: B

NEW QUESTION # 35

What options do you have when deploying an SAP HANA Cloud, SAP HANA database with an integrated data lake? Note: There are 2 correct answers to this question.

- **A. Create an SAP HANA Cloud database and later add a data lake.**
- B. Create an SAP HANA Cloud database with a separate data lake.
- **C. Create an SAP HANA Cloud database and include a data lake in one step.**
- D. Create an SAP HANA Cloud database with the data lake on premise.

Answer: A,C

NEW QUESTION # 36

From which sources can you import catalog objects when using the SAP HANA database explorer? Note: There are 3 correct answers to this question.

- A. IBM public cloud
- **B. Local computer**
- **C. Data lake files**
- **D. Google Cloud Storage**
- E. HPE GreenLake

Answer: B,C,D

Explanation:

When using the SAP HANA database explorer to import catalog objects, you can source files from:

* Data lake files: Import objects directly from storage solutions categorized under data lakes.

* Local computer: Allows the uploading of files from a user's local system to the database.

* Google Cloud Storage: Supports integration with Google Cloud Storage, enabling the import of objects stored on Google's cloud services.

References=SAP HANA database explorer capabilities and supported data sources are detailed in the SAP HANA developer guides and database explorer documentation.

Database Administration

NEW QUESTION # 37

What options do you have when deploying an SAP HANA Cloud, SAP HANA database with an integrated data lake? Note: There are 2 correct answers to this question.

- **A. Create an SAP HANA Cloud database and later add a data lake.**
- **B. Create an SAP HANA Cloud database with a separate data lake.**
- C. Create an SAP HANA Cloud database with the data lake on premise.
- D. Create an SAP HANA Cloud database and include a data lake in one step.

Answer: A,B

Explanation:

When deploying an SAP HANA Cloud, SAP HANA database with an integrated data lake, the following options are available:

* Create an SAP HANA Cloud database with a separate data lake: This option allows you to set up an SAP HANA database and a data lake as two distinct but integrated components.

* Create an SAP HANA Cloud database and later add a data lake: You can start with just the database and subsequently integrate a data lake, providing flexibility in deployment timing and resource allocation.

References=The provisioning options for integrating a data lake with an SAP HANA Cloud database are discussed in SAP HANA

Cloud provisioning guides, detailing how these components can be configured either simultaneously or sequentially.
Provisioning SAP HANA

NEW QUESTION # 38

Which hardware KPIs do you need to size before performing a tailored data center integration (TDI) installation for a productive SAP HANA database system? Note: There are 2 correct answers to this question.

- A. Total disk space required for the log volume
- B. Network bandwidth for the storage zone
- C. Persistent memory (PMEM) required for backups
- D. DRAM required for the static data memory area

Answer: A,D

Explanation:

For a tailored data center integration (TDI) installation of a productive SAP HANA database system, it is essential to size the following hardware KPIs: A. DRAM required for the static data memory area, as it determines the amount of main memory needed to hold the active dataset of the SAP HANA database in memory for fast processing. B. Total disk space required for the log volume, which is crucial for maintaining the log entries that record all transactions and database changes, necessary for recovery and durability. Persistent memory (PMEM) for backups and network bandwidth for the storage zone, while important in their own right, are not directly related to initial sizing criteria for DRAM and disk space as per SAP HANA TDI guidelines. References= SAP HANA Tailored Datacenter Integration (TDI) guide which includes details on sizing and planning infrastructure for deploying SAP HANA.
SAP HANA Architecture

NEW QUESTION # 39

.....

The DumpsTests is one of the leading platforms that has been offering real and valid SAP Certified Associate - Database Administrator - SAP HANA (C-DBADM-2404) exam practice test questions. These C-DBADM-2404 exam questions are designed and verified by SAP C-DBADM-2404 subject matter experts. They work closely together and put all their expertise to check the DumpsTests C-DBADM-2404 Exam Questions one by one. So we can say that the DumpsTests C-DBADM-2404 exam practice questions are real, valid, and updated SAP Certified Associate - Database Administrator - SAP HANA (C-DBADM-2404) exam questions that will provide you with everything that you need to learn to prepare and pass the C-DBADM-2404 exam.
