SAP Certified Associate - WalkMe Digital Adoption Consultant Sample Questions (Q19-Q24):

NEW QUESTION # 19

You just published WalkMe content from your Editor for the first time. When you refresh your web page, you do not see any of the content.

Which of the options could you check?

Note: There are 3 correct answers to this question.

- A. Confirm that you added categories to the WalkMe Menu.
- **B. Confirm WalkMe is deployed to the environment.**
- **C. Switch from Build Mode to Play Mode in the Editor.**
- **D. Investigate whether any Segmentation rules are configured incorrectly.**
- E. Reinstall the WalkMe Editor on your computer.

Answer: B,C,D

NEW QUESTION # 20

You have been given a project where end users are inputting incorrect information on a form, and the company wants to add some WalkMe content to help people complete the form correctly to improve data integrity. Which of the following solutions would you suggest FIRST?

- A. Onboarding Task to encourage users to complete the form
- B. Add a Resource to the Menu that provides additional details
- **C. Create Guidance or Validation SmartTips**
- D. Create a Smart Walk-Thru to guide users through the process

Answer: C

Explanation:

To address incorrect form inputs and improve data integrity, Guidance or Validation SmartTips are the most direct and effective solution to suggest first. Guidance SmartTips provide on-screen instructions for each field, while Validation SmartTips check user inputs against predefined rules (e.g., format, required fields) and display error messages if incorrect. This approach targets the root issue-user errors in specific fields-and provides real-time feedback to ensure accurate data entry.

The other options are less immediate:

* Onboarding Task(B) is better for guiding users through a multi-step process, not form-specific errors.

* Smart Walk-Thru(C) is useful for complex processes but may be overkill for a single form.

* Resource in the Menu(D) requires users to seek help proactively, which is less effective than in- context guidance.

Extract from Official WalkMe Documentation:

According to the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.5: SmartTips):

"For forms with frequent user errors, Guidance SmartTips offer field-specific instructions, and Validation SmartTips enforce correct inputs, improving data integrity directly at the point of entry." The course Getting Started with Building WalkMe Solutions advises:

"Start with SmartTips for form-related issues, using Guidance to clarify field requirements and Validation to catch errors, as they

provide targeted, real-time support." Option A, Guidance or Validation SmartTips, is the first solution to suggest.

NEW QUESTION # 21

Which is the most preferred Unique User ID setting and the one you should explore first for UUID setup?

- A. jQuery
- B. WalkMe ID
- C. Cookie
- D. Variable

Answer: D

NEW QUESTION # 22

You have received some feedback that your end users are having issues completing a Smart Walk-Thru that you built. Where are the best places to analyze where users are having issues? Note: There are 2 correct answers to this question.

- A. Look in the WalkMe Player Menu.
- B. Look at the percent of users that played Smart Walk-Thrus.
- C. Look at the Smart Walk-Thru step analysis in Insights.
- D. Look at the Smart Walk-Thru steps in the Editor.

Answer: C,D

Explanation:

To diagnose issues with a Smart Walk-Thru, Builders should analyze both the configuration of the Smart Walk-Thru and user interaction data. The best places are:

* Smart Walk-Thru steps in the Editor(B): Reviewing the steps in the WalkMe Editor, along with using tools like the Flow Tracker, helps identify misconfigured triggers, conditions, or elements that may cause user issues.

* Smart Walk-Thru step analysis in Insights(D): Insights provides detailed analytics on step completion rates, drop-off points, and errors, pinpointing exactly where users encounter difficulties.

The other options are less effective:

* WalkMe Player Menu(A) is for end users to access content, not for analyzing issues.

* Percent of users that played Smart Walk-Thrus(C) gives overall engagement but lacks step-specific insights.

Extract from Official WalkMe Documentation:

According to the WalkMe Insights User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 3.2: Analytics and Reporting):

"The Smart Walk-Thru step analysis in Insights shows completion rates and drop-off points, helping Builders identify where users struggle. Combine this with Editor-based troubleshooting using Flow Tracker to resolve issues." The course Advancing Your Skills in Building WalkMe Solutions states:

"To troubleshoot Smart Walk-Thru issues, review step configurations in the Editor for errors and analyze step-level data in Insights to understand user behavior and pinpoint problem areas." Options B and D are the best places to analyze user issues.
