Both of the content and the displays are skillfully design on the purpose that CISM Actual Exam can make your learning more targeted and efficient.

ISACA Certified Information Security Manager Sample Questions (Q432-Q437):

NEW QUESTION # 432

Which of the following BEST demonstrates return on investment (ROI) for an information security initiative?

- A. Risk heat map
- B. Business impact analysis (BIA)
- C. Business case
- D. Information security program roadmap

Answer: B

NEW QUESTION # 433

An information security manager has been asked to determine whether an information security initiative has reduced risk to an acceptable level. Which of the following activities would provide the BEST information for the information security manager to draw a conclusion?

- A. Reviewing the risk register
- B. Performing a risk assessment
- C. Conducting a business impact analysis (BIA)
- D. Initiating a cost-benefit analysis of the implemented controls

Answer: C

NEW QUESTION # 434

What should be an information security manager's GREATEST concern when an HR department outsources data processing to a cloud service provider?

- A. Data loss protection insurance
- B. The scope of the data
- C. Security posture of the provider
- D. Required provider service levels

Answer: C

NEW QUESTION # 435

Which of the following service offerings in a typical Infrastructure as a Service (IaaS) model will BEST enable a cloud service provider to assist customers when recovering from a security incident?

- A. Availability of web application firewall logs.
- B. Availability of current infrastructure documentation
- C. Capability to take a snapshot of virtual machines
- D. Capability of online virtual machine analysis

Answer: C

Explanation:

A snapshot is a point-in-time copy of the state of a virtual machine (VM) that can be used to restore the VM to a previous state in case of a security incident or a disaster. A snapshot can capture the VM's disk, memory, and device configuration, allowing for a quick and easy recovery of the VM's data and functionality. Snapshots can also be used to create backups, clones, or replicas of VMs for testing, analysis, or migration purposes. Snapshots are a common service offering in Infrastructure as a Service (IaaS) models, where customers can provision and manage VMs on demand from a cloud service provider (CSP). A CSP that offers the capability to take snapshots of VMs can assist customers when recovering from a security incident by providing them with the following benefits¹²:

Faster recovery time: Snapshots can reduce the downtime and data loss caused by a security incident by allowing customers to quickly revert their VMs to a known good state. Snapshots can also help customers avoid the need to reinstall or reconfigure their VMs after an incident, saving time and resources.

Easier incident analysis: Snapshots can enable customers to perform online or offline analysis of their VMs after an incident, without affecting the production environment. Customers can use snapshots to examine the VM's disk, memory, and logs for evidence of compromise, root cause analysis, or forensic investigation. Customers can also use snapshots to test and validate their incident response plans or remediation actions before applying them to the production VMs.

Enhanced security posture: Snapshots can improve the security posture of customers by enabling them to implement best practices such as backup and restore, disaster recovery, and business continuity. Snapshots can help customers protect their VMs from accidental or malicious deletion, corruption, or modification, as well as from environmental or technical disruptions. Snapshots can also help customers comply with regulatory or contractual requirements for data retention, availability, or integrity. NEW QUESTION # 436

The PRIMARY reason for using metrics as part of an information security program is to help management:

- A. develop an information security baseline.

- B. determine whether objectives are being met.
- C. visualize security trends.
- D. track financial impact of the program.

Answer: B

NEW QUESTION # 437

.....

Up to now, we have business connection with tens of thousands of exam candidates who adore the quality of our CISM exam questions.
