Latest PK0-005 Test Pdf - PK0-005 Latest Exam Simulator

Our PK0-005 exam materials have helped many people improve their soft power. They are now more efficient than their colleagues, so they have received more attention from their leaders. We are all ordinary professional people. We must show our strength to show that we are worth the opportunity. Using PK0-005 practice engine may be the most important step for you to improve your strength. You know, like the butterfly effect, one of your choices may affect your life. And our PK0-005 Exam Questions will be the right exam tool for you to pass the PK0-005 exam and obtain the dreaming certification.

CompTIA PK0-005 exam is a 90-minute test that consists of 95 multiple-choice and performance-based questions. PK0-005 exam is available in English, Japanese, Portuguese, Spanish, and German. PK0-005 Exam is computer-based, and the candidate must score at least 710 out of 900 to pass the exam.

CompTIA Project+ Certification Exam Sample Questions (Q344-Q349):

NEW QUESTION # 344

During the project execution phase, Ann, a project manager, received an email from the project sponsor asking for an additional work package to be added to the project scope due to new legislation.

INSTRUCTIONS

Review the email with the latest updates sent by the project sponsor and respond in the following order:

1. Select the best tool for tracking the server migration progress.
2. Select the new critical path.
3. Select the correct number of engineers required for the server migration phase.

If at any time you would like to bring back the initial state of the simulation, please click the Reset All button.

Subject: URGENT: Transformation project – Scope change – please read !

Hi Ann,

Due to new legislation in data protection regulation which will impact our "Transformation project", the following updates need to be considered:

- Server migration must be 100% complete prior to the last three tasks of the project.
- Based on a previous estimate, the migration will require 50% more engineers for this phase.
- The progress of the server migration must be monitored.

As the project manager for the "Transformation project", please take the proper actions.

Sorry for the inconvenience of sharing this in the middle of project execution.

Sincerely,

Joe

A project manager decided to host the development environment on a cloud service. Which of the following would the project manager most likely use for this purpose?

- A. DaaS
- B. SaaS
- **C. IaaS**
- D. XaaS

Answer: C

Explanation:

IaaS (Infrastructure as a Service) provides virtualized computing resources, such as storage and servers, necessary for hosting a development environment. According to CompTIA Project+, IaaS is ideal for environments requiring infrastructure control without hardware management.

NEW QUESTION # 346

A company is creating a new technology. The company is concerned that the project details could be compromised if a cloud service is used, and another company could launch the technology before the current projected delivery. Which of the following can the company do to minimize this risk?

- A. Mandate overtime to get the project completed sooner.
- **B. Limit access to members of the project team**
- C. Use an on-premises project management scheduling tool.
- D. Ensure all team members have signed a non-disclosure agreement.

Answer: B

Explanation:

Limiting access to members of the project team is a way to minimize the risk of compromising the project details if a cloud service is used. This means that only authorized and trusted individuals can access, view, modify, or share the project information stored in the cloud. Limiting access can prevent unauthorized access, data leakage, cyberattacks, or espionage from external parties who might want to steal or sabotage the new technology. Limiting access can also reduce the risk of human error, negligence, or misconduct from internal parties who might accidentally or intentionally expose or misuse the project information¹²³. NEW QUESTION # 347

A project sponsor asked the PM to provide a summary of the current financial status. The PM uses the following burn up chart for the analysis:

Based on the chart, which of the following is the current status of the project?

- A. Behind schedule and over budget
- B. Behind schedule and under budget
- C. Ahead of schedule and over budget
- D. Ahead of schedule and under budget

Answer: A

Explanation:

The project manager can use the burn up chart to analyze the current status of the project based on its scope (value delivered), budget (cost), and schedule (time). A burn up chart is a graphical tool that shows how much work has been completed (burned up) versus how much work remains (scope) over time. It also shows how much budget has been spent (burned up) versus how much budget remains (budget) over time. A burn up chart can help to monitor and control the project progress and performance and identify any variances or deviations from the plan. The chart given shows that both scope and budget lines are above their respective target lines at any given time point. This means that less work has been completed than planned (scope variance) and more money has been spent than planned (budget variance) at any given time point. Therefore, the project is behind schedule and over budget.

NEW QUESTION # 348

A project team is working remotely from different locations across the country. As part of a lessons-learned exercise, the project manager would like to identify the level of engagement among project team members. Which of the following would be the best tool for the project manager to use?

- A. Real-time survey
- B. Whiteboard
- C. Email
- D. Meeting chat

Answer: A

Explanation:

A real-time survey is a tool that allows the project manager to collect feedback from the project team members in an interactive and timely manner. A real-time survey can measure the level of engagement, satisfaction, motivation, and performance of the team members, as well as identify any issues, challenges, or opportunities for improvement. A real-time survey can also increase the participation and collaboration of the team members, as they can see the results and comments of their peers instantly. A real-time survey is more effective than a meeting chat, an email, or a whiteboard, as it can reach a larger and more diverse audience, provide more structured and quantitative data, and avoid distractions and interruptions.
