CSI CSC2 Exam Syllabus Topics:

Topic	Details
Topic 1	• The Corporation: This section of the exam measures the skills of a Corporate Finance Analyst and covers corporate structures, financial statements, disclosure requirements, investor rights, financing methods, capital raising processes, prospectus requirements, securities distribution, and exchange listing procedures for corporations.
Topic 2	• The Canadian Investment Marketplace: This section of the exam measures the skills of a Securities Industry Professional and covers the structure and operation of Canada's investment marketplace. It includes the roles of investment dealers and financial intermediaries, capital market functions, financial instruments, and the complete Canadian regulatory environment with its regulatory bodies, principles of regulation, client remediation options, and ethical standards for financial services professionals.
Topic 3	• Investment Analysis: This section of the exam measures the skills of a Research Analyst and covers both fundamental and technical analysis methods, including macroeconomic, industry and company analysis techniques, financial statement interpretation, ratio analysis, and security valuation approaches.
Topic 4	• Analysis of Managed and Structured Products: This section of the exam measures the skills of an Investment Products Specialist and covers mutual funds, exchange-traded funds, alternative investments, structured products, and other managed products including their structures, regulations, features, risks, strategies, performance measurement, and tax implications within the Canadian investment landscape.

CSI Canadian Securities Course Exam2 Sample Questions (Q20-Q25):

NEW QUESTION # 20
The following table presents annual returns on TUV common stock and the S&P/TSX Composite Index over a three-year period.
What is TUV's beta relative to the S&P/TSX Composite Index over this three-year period?

- A. Exactly 1.
- B. Between 0 and 1.
- C. Less than 0.
- D. Greater than 1.

Answer: A

NEW QUESTION # 21
A client who seeks advice from an investment advisor but does not require financial planning guidance.
Which platform is most appropriate for this client?

- A. Family office
- B. Exchanged-traded fund.
- C. Self-directed brokerage.
- D. Discount brokerage.

Answer: D

Explanation:
A discount brokerage is an ideal platform for clients who seek professional advice but do not require comprehensive financial planning. Discount brokers allow clients to trade securities with minimal fees, offering tools and resources for investment decision-making without the cost of full-service advisory.
* Why This Platform is Appropriate:

* Clients retain control over their portfolios but can access limited advisory services when needed.
* Suitable for investors who are comfortable with self-directed investing and require occasional guidance.
* Why Other Options Are Incorrect:
* A: A family office provides high-end services, including financial planning, making it excessive for this client.
* B: A self-directed brokerage is entirely self-managed, without access to advisory support.
* C: ETFs are an investment product, not a platform.

:

CSC Volume 2, Chapter 25: Overview of Fee-Based and Discount Brokerage Accounts.

NEW QUESTION # 22

What is the main advantage ETFs have over mutual funds?

* A. Improved tax efficiency
* B. Flexible dividend reinvestment
* C. Ability to set up pre-authorized contributions
* D. Active management

Answer: A

NEW QUESTION # 23

The following financial information is available for fund SKE:

Total liabilities	$100,000
Units outstanding	[illegible]
Book value of assets	$10,000,000
Current market value of assets	$12,000,000

What is SKE fund's net asset value per share?

* A. $9,90
* B. $11, 90
* C. $12,00
* D. $10, 00

Answer: B

Explanation:

A white sheet with black text Description automatically generated

To calculate the **Net Asset Value (NAV) per share** of the SKE Fund, use the following formula:

$$\text{NAV per share} = \frac{\text{Current Market Value of Assets} - \text{Liabilities}}{\text{Units Outstanding}}$$

Step-by-step Calculation:

1. **Current Market Value of Assets**: $12,000,000
2. **Liabilities**: $100,000
3. **Net Asset Value (NAV)** = $12,000,000 - $100,000 = **$11,900,000**
4. **Units Outstanding**: 1,000,000

Now calculate NAV per share:

$$\text{NAV per share} = \frac{\text{NAV}}{\text{Units Outstanding}} = \frac{11,900,000}{1,000,000} = 11.90$$

Thus, the **NAV per share is $11.90**.

Explanation of Answer Options:

* Option A ($9.90): Incorrect; this value does not reflect the subtraction of liabilities.
* Option B ($11.90): Correct; it accounts for the subtraction of liabilities and proper division by outstanding units.
* Option C ($12.00): Incorrect; it represents the market value of assets per unit without deducting liabilities.
* Option D ($10.00): Incorrect; this value does not align with the given data or calculations.
References to Canadian Securities Course Exam 2 Study Materials:
* Volume 2, Chapter 17- Mutual Funds: Structure and Regulation, Pricing Mutual Fund Units:
* Discusses the formula for calculating NAV per share, including the treatment of liabilities and market value of assets.
* Volume 2, Chapter 22- Other Managed Products:
* Covers the concept of valuation for managed funds and its importance for accurate pricing.
* Volume 1, Chapter 11- Corporations and Their Financial Statements:
* Provides foundational knowledge about book and market values used in calculations.

NEW QUESTION # 24
What is an example of a common feature of robo-advisor services?

- A. The service is exclusively provided to intermediaries such as advisors and employers
- B. Portfolios are built primarily with individual stocks and bonds.
- C. The portfolios are rarely rebalanced
- D. A telephone call with an advisor verifies that the computer-generated portfolio is suitable for the client.

Answer: D

Explanation:
Many robo-advisors offer a hybrid model where an automated portfolio recommendation is supplemented by human oversight. A telephone call with an advisor ensures the portfolio generated by the algorithm aligns with the client's risk tolerance and investment objectives. This step helps meet regulatory suitability requirements.
* A. The service is exclusively provided to intermediaries such as advisors and employers: Robo-advisors are directly available to retail clients and are not exclusive to intermediaries.
* B. The portfolios are rarely rebalanced: Robo-advisors typically offer frequent or automatic rebalancing to maintain target asset allocations.
* C. Portfolios are built primarily with individual stocks and bonds: Robo-advisors predominantly use ETFs for diversification and cost-efficiency, not individual securities.
Reference:CSC Volume 1, Chapter 1, "Financial Technology - Robo-Advisors" highlights the hybrid models and regulatory compliance processes employed by robo-advisors

NEW QUESTION # 25
......
