Exam4Docs's Databricks Databricks-Certified-Data-Analyst-Associate exam training materials not only can save your energy and money, but also can save a lot of time for you. Because the things what our materials have done, you might need a few months to achieve. So what you have to do is use the Exam4Docs Databricks Databricks-Certified-Data-Analyst-Associate Exam Training materials. And obtain this certificate for yourself. Exam4Docs will help you to get the knowledge and experience that you need and will provide you with a detailed Databricks Databricks-Certified-Data-Analyst-Associate exam objective. So with it, you will pass the exam.

We hold coherent direction with our exam candidates, so our Databricks-Certified-Data-Analyst-Associate study materials are compiled in modern format. Many competitors simulate and strive to emulate our standard, but our Databricks-Certified-Data-Analyst-Associate training branindumps outstrip others in many aspects, so it is incumbent on us to offer help. Considering the current plea of our exam candidates we make up our mind to fight for your satisfaction and wish to pass the Databricks-Certified-Data-Analyst-Associate Exam.

Pass Guaranteed Quiz Databricks-Certified-Data-Analyst-Associate - Databricks Certified Data Analyst Associate Exam Accurate Latest Test Format

Therefore, you have the option to use Databricks Databricks-Certified-Data-Analyst-Associate PDF questions anywhere and anytime. Databricks-Certified-Data-Analyst-Associate dumps are designed according to the Databricks Certified Data Analyst Associate Exam (Databricks-Certified-Data-Analyst-Associate) certification exam standard and have hundreds of questions similar to the actual Databricks-Certified-Data-Analyst-Associate Exam. Exam4Docs Databricks Certified Data Analyst Associate Exam (Databricks-Certified-Data-Analyst-Associate) web-based practice exam software also works without installation.

Databricks Certified Data Analyst Associate Exam Sample Questions (Q36-Q41):

NEW QUESTION # 36
A data analyst needs to share a Databricks SQL dashboard with stakeholders that are not permitted to have accounts in the Databricks deployment. The stakeholders need to be notified every time the dashboard is refreshed.
Which approach can the data analyst use to accomplish this task with minimal effort/

- A. By granting the stakeholders' email addresses to the SQL Warehouse (formerly known as endpoint) subscribers list
- B. By downloading the dashboard as a PDF and emailing it to the stakeholders each time it is refreshed
- C. By granting the stakeholders' email addresses permissions to the dashboard
- D. By adding the stakeholders' email addresses to the refresh schedule subscribers list

Answer: D

Explanation:
To share a Databricks SQL dashboard with stakeholders who do not have accounts in the Databricks deployment and ensure they are notified upon each refresh, the data analyst can add the stakeholders' email addresses to the dashboard's refresh schedule subscribers list. This approach allows the stakeholders to receive email notifications containing the latest dashboard updates without requiring them to have direct access to the Databricks workspace. This method is efficient and minimizes effort, as it automates the notification process and ensures stakeholders remain informed of the most recent data insights.

NEW QUESTION # 37
A business analyst has been asked to create a data entity/object called sales_by_employee. It should always stay up-to-date when new data are added to the sales table. The new entity should have the columns sales_person, which will be the name of the employee from the employees table, and sales, which will be all sales for that particular sales person. Both the sales table and the employees table have an employee_id column that is used to identify the sales person.
Which of the following code blocks will accomplish this task?

- A.

```
CREATE TEMPORARY TABLE sales_by_employee AS
    SELECT employees.employee_name sales_person,
           sales.sales
    FROM sales
    JOIN employees
    ON employees.employee_id = sales.employee_id;
```

```
SELECT employees.employee_name sales_person,
       sales.sales
    FROM sales
    JOIN employees
    ON employees.employee_id = sales.employee_id USING
    CREATE OR REPLACE VIEW sales_by_employee;
```

- B.

```
CREATE OR REPLACE VIEW sales_by_employee USING
    SELECT employees.employee_name sales_person,
            sales.sales
    FROM sales
    JOIN employees
    ON employees.employee_id = sales.employee_id;
```
- C.
- D.

```
CREATE OR REPLACE VIEW sales_by_employee AS
    SELECT employees.employee_name sales_person,
            sales.sales FROM sales
    JOIN employees
    ON employees.employee_id = sales.employee_id;
```

Answer: D

Explanation:
The SQL code provided in Option D is the correct way to create a view named sales_by_employee that will always stay up-to-date with the sales and employees tables. The code uses the CREATE OR REPLACE VIEW statement to define a new view that joins the sales and employees tables on the employee_id column. It selects the employee_name as sales_person and all sales for each employee, ensuring that the data entity/object is always up-to-date when new data are added to these tables.

NEW QUESTION # 38
A data analysis team is working with the table_bronze SQL table as a source for one of its most complex projects. A stakeholder of the project notices that some of the downstream data is duplicative. The analysis team identifies table_bronze as the source of the duplication.
Which of the following queries can be used to deduplicate the data from table_bronze and write it to a new table table_silver?
A)
CREATE TABLE table_silver AS
SELECT DISTINCT *
FROM table_bronze;
B)
CREATE TABLE table_silver AS
INSERT *
FROM table_bronze;
C)
CREATE TABLE table_silver AS
MERGE DEDUPLICATE *
FROM table_bronze;
D)
INSERT INTO TABLE table_silver
SELECT * FROM table_bronze;
E)
INSERT OVERWRITE TABLE table_silver
SELECT * FROM table_bronze;

- A. Option D
- B. Option E
- C. Option B
- D. Option A
- E. Option C

Answer: D

Explanation:
Option A uses the SELECT DISTINCT statement to remove duplicate rows from the table_bronze and create a new table table_silver with the deduplicated data. This is the correct way to deduplicate data using Spark SQL12. Option B simply inserts all the rows from table_bronze into table_silver, without removing any duplicates. Option C is not a valid syntax for Spark SQL, as

there is no MERGE DEDUPLICATE statement. Option D appends all the rows from table_bronze into table_silver, without removing any duplicates. Option E overwrites the existing data in table_silver with the data from table_bronze, without removing any duplicates. Reference: Delete Duplicate using SPARK SQL, Spark SQL - How to Remove Duplicate Rows

NEW QUESTION # 39

A data analyst runs the following command:
INSERT INTO stakeholders.suppliers TABLE stakeholders.new_suppliers;
What is the result of running this command?

- A. The suppliers table now contains the data from the new suppliers table, and the new suppliers table now contains the data from the suppliers table.
- B. The suppliers table now contains only the data from the new suppliers table.
- C. The suppliers table now contains both the data it had before the command was run and the data from the new suppliers table, and any duplicate data is deleted.
- D. The suppliers table now contains both the data it had before the command was run and the data from the new suppliers table, including any duplicate data.
- E. The command fails because it is written incorrectly.

Answer: E

Explanation:
The command INSERT INTO stakeholders.suppliers TABLE stakeholders.new_suppliers is not a valid syntax for inserting data into a table in Databricks SQL. According to the documentation12, the correct syntax for inserting data into a table is either:
INSERT { OVERWRITE | INTO } [TABLE] table_name [PARTITION clause] [(column_name [, ...]) | BY NAME] query
INSERT INTO [TABLE] table_name REPLACE WHERE predicate query The command in the question is missing the OVERWRITE or INTO keyword, and the query part that specifies the source of the data to be inserted. The TABLE keyword is optional and can be omitted. The PARTITION clause and the column list are also optional and depend on the table schema and the data source. Therefore, the command in the question will fail with a syntax error.

INSERT - Azure Databricks - Databricks SQL | Microsoft Learn

NEW QUESTION # 40

Data professionals with varying responsibilities use the Databricks Lakehouse Platform Which role in the Databricks Lakehouse Platform use Databricks SQL as their primary service?

- A. Data engineer
- B. Business analyst
- C. Data scientist
- D. Platform architect

Answer: B

Explanation:
In the Databricks Lakehouse Platform, business analysts primarily utilize Databricks SQL as their main service. Databricks SQL provides an environment tailored for executing SQL queries, creating visualizations, and developing dashboards, which aligns with the typical responsibilities of business analysts who focus on interpreting data to inform business decisions. While data scientists and data engineers also interact with the Databricks platform, their primary tools and services differ; data scientists often engage with machine learning frameworks and notebooks, whereas data engineers focus on data pipelines and ETL processes. Platform architects are involved in designing and overseeing the infrastructure and architecture of the platform. Therefore, among the roles listed, business analysts are the primary users of Databricks SQL.

NEW QUESTION # 41

......

If you want to learn the Databricks-Certified-Data-Analyst-Associate practice guide anytime, anywhere, then we can tell you that you can use our products on a variety of devices. As you can see on our website, we have three different versions of the

Databricks-Certified-Data-Analyst-Associate exam questions: the PDF, Software and APP online. Though the content of them are the same. But the displays are totally different. And you can use them to study on different time and conditions. If you want to know them clearly, you can just free download the demos of the Databricks-Certified-Data-Analyst-Associate Training Materials!

Hot Databricks-Certified-Data-Analyst-Associate Questions: https://www.exam4docs.com/Databricks-Certified-Data-Analyst-Associate-study-questions.html

The thing that people mostly like about us is that we guarantee you that after taking our Databricks-Certified-Data-Analyst-Associate Databricks Certified Data Analyst Associate Exam exam dumps solution you will surely pass your Databricks Databricks-Certified-Data-Analyst-Associate exam in just your first attempt, Databricks Latest Databricks-Certified-Data-Analyst-Associate Test Format You can immediately download the study material and start your study with no time wasted, Databricks Latest Databricks-Certified-Data-Analyst-Associate Test Format Do you still remember why you succeed?

So the beauty behind this is that you can run multiple various Databricks-Certified-Data-Analyst-Associate OSs simultaneously from just one PC, Technology and software evolve quickly, The thing that people mostly like about us is that we guarantee you that after taking our Databricks-Certified-Data-Analyst-Associate Databricks Certified Data Analyst Associate Exam exam dumps solution you will surely pass your Databricks Databricks-Certified-Data-Analyst-Associate exam in just your first attempt.

Quiz High-quality Databricks-Certified-Data-Analyst-Associate - Latest Databricks Certified Data Analyst Associate Exam Test Format

You can immediately download the study material and start your study with no time wasted, Do you still remember why you succeed, We believe we are the pass leader of Databricks-Certified-Data-Analyst-Associate practice questions and pass for sure.

It is because that our IT specialists developed the material based on the candidates who have successfully passed the Databricks-Certified-Data-Analyst-Associate exam.
