

Latest DEP-2025 Dumps Ebook, Latest DEP-2025 Braindumps

What's more, part of that TestkingPDF DEP-2025 dumps now are free: <https://drive.google.com/open?id=1le3Tr4JGtXY-CBUJX6kRa5GbUY7ofHsw>

What sets TestkingPDF Apple Deployment and Management Exam (DEP-2025) practice tests (desktop and web-based) apart are their unique features. The DEP-2025 web-based practice exam is compatible with all operating systems and it can be taken on popular browsers like Chrome, Firefox, and Safari. The Apple DEP-2025 desktop practice exam software is compatible with Windows computers. After validating the product's license, you won't need an active internet connection to use the desktop Apple Deployment and Management Exam (DEP-2025) practice test software.

Apple DEP-2025 Exam Syllabus Topics:

Topic	Details
Topic 1	• Apple Business Manager and Apple School Manager: This section of the exam measures the skills of an MDM Specialist and covers managing connections to resellers and managing device suppliers. It emphasizes the use of Apple Business Manager or School Manager to streamline large-scale deployments.
Topic 2	• Manage Content and Data Flow: This section of the exam measures the skills of an IT Administrator and covers app distribution methods including managed, custom, and proprietary apps. It focuses on content purchasing and delivery through Apple Business or School Manager.
Topic 3	• Identity Services: This section of the exam measures the skills of an MDM Specialist and covers supported identity services on Apple devices, including Platform SSO and Single Sign-On, helping users manage secure access and authentication.
Topic 4	• Planning Device Ownership and Enrollment: This section of the exam measures the skills of an IT Administrator and covers enrollment planning strategies based on ownership models. It focuses on data separation and appropriate deployment paths based on user and organizational requirements.

Topic 5	• Software Updates: This section of the exam measures the skills of an MDM Specialist and covers update management strategies using MDM. It includes handling deadlines, updating behavior, and ensuring that updates are properly delivered and installed.
Topic 6	• Device Configuration: This section of the exam measures the skills of an IT Administrator and covers declarative configuration properties and how they relate to the device enrollment type. It ensures that configurations align with organizational needs.
Topic 7	• Apple Configurator: This section of the exam measures the skills of an IT Administrator and covers the usage of Apple Configurator in enrollment, supervision, and deployment of Apple devices. It includes an overview of its features and setup processes.
Topic 8	• Network Integration: This section of the exam measures the skills of an IT Administrator and covers assessing network responsiveness and device connectivity. It also covers wireless auto-join behavior on Apple devices and ensures strong network coverage.
Topic 9	• Device Enrollment: This section of the exam measures the skills of an MDM Specialist and covers the three main enrollment methods for Apple devices, their core concepts, and their properties. It prepares candidates to make appropriate choices based on organizational needs.
Topic 10	• Plan a Deployment: This section of the exam measures the skills of an MDM Specialist and covers the purpose and function of Apple's built-in MDM framework. It evaluates the foundational understanding needed to support the deployment of Apple devices at scale using MDM protocols and tools.
Topic 11	• Prepare Your Environment: This section of the exam measures the skills of an IT Administrator and covers the important factors involved in evaluating and preparing the environment for a successful MDM implementation. It emphasizes strategic planning before rollout.
Topic 12	• Device Security: This section of the exam measures the skills of an MDM Specialist and covers encryption on Apple platforms, FileVault operations, and the importance of key management. It focuses on protecting sensitive data on managed devices.
Topic 13	• Device Setup: This section of the exam measures the skills of an MDM Specialist and covers strategies and use cases for managing Setup Assistant via MDM. It also covers the configuration of enrollment-related settings and pane options.

2025 Valid 100% Free DEP-2025 – 100% Free Latest Dumps Ebook | Latest Apple Deployment and Management Exam Braindumps

Once installed DEP-2025 practice exam software onto your computer, you can get started as it does not require an internet connection to run. The DEP-2025 practice exam software is essential for your Apple DEP-2025 exam preparation as it gives you hands-on experience before the actual DEP-2025 Certification Exam. This kind of exam preparation ensures that a well-prepared and more confident candidate enters the examination arena.

Apple Deployment and Management Exam Sample Questions (Q26-Q31):

NEW QUESTION # 26

What's the benefit of using User Enrollment?

- A. Separates personal and managed data
- B. Simplifies device setup
- C. Allows additional restrictions
- D. Enables app license management

Answer: A

Explanation:

User Enrollment, designed for Bring Your Own Device (BYOD) scenarios, separates personal and managed data on a device using a cryptographic boundary. This ensures organizational policies (e.g., managed apps, email) are isolated from personal content (e.g., photos, personal apps), protecting user privacy while allowing management. Additional restrictions (option A) are a supervision feature, not User Enrollment. App license management (option B) is tied to Managed Distribution, not enrollment type. Simplified setup (option D) aligns with ADE, not User Enrollment. The Apple Platform Deployment Guide highlights data separation as User Enrollment's key benefit.

NEW QUESTION # 27

You configure a Setup Assistant payload to skip the Location Services pane. What is the Location Services status during and after enrollment?

- A. It is hidden during Setup Assistant and turned off, but a user can turn it on.
- B. It is hidden during Setup Assistant and turned off, but a local administrator can turn it on.
- C. It is shown during Setup Assistant and turned off, but a local administrator can turn it on.
- D. It is shown during Setup Assistant and turned off, but a user can turn it on.

Answer: A

Explanation:

Apple's Setup Assistant skip payloads allow organizations to streamline enrollment by hiding certain configuration panes. When the Location Services pane is skipped, the feature defaults to off during enrollment.

Apple Learning specifies that the user retains the ability to enable Location Services later in Settings. This provides flexibility while reducing setup complexity. Skipping does not force the feature permanently off, nor does it require administrator intervention to enable it. The pane is simply suppressed from Setup Assistant, and the user decides post-enrollment whether to activate it. This approach ensures privacy while maintaining compliance with organizational deployment goals.

NEW QUESTION # 28

What is a feature of Apple Configurator for Mac?

- A. Create a Blueprint for your devices
- B. Push profile updates over the air
- C. Buy apps and books
- D. Enable Managed Lost Mode

Answer: A

Explanation:

Apple Configurator for Mac allows administrators to create Blueprints, which are templates for configuring devices with settings, apps, and profiles. The Apple Configurator User Guide explains, "Apple Configurator for Mac allows you to create Blueprints-templates containing settings, apps, and profiles-that can be applied to iPhones, iPads, or Macs during configuration." Option A is an MDM feature, B requires MDM for over-the-air updates, and D is handled via Apple Business Manager, not Configurator.

Apple Configurator User Guide, "Blueprints" section.

Apple Platform Deployment Guide, "Apple Configurator Features" section.

NEW QUESTION # 29

What do you use to manually add a device to Apple Business Manager or Apple School Manager?

- A. Mac Evaluation Utility
- B. Profile Manager
- C. Apple Configurator
- D. Apple Remote Desktop

Answer: C

Explanation:

Apple Configurator is the tool for manually adding devices to ABM or ASM, especially for devices not purchased directly from Apple. The Apple Configurator User Guide states, "Use Apple Configurator to add devices to Apple Business Manager or Apple School Manager by connecting them to a Mac via USB. This process supervises the devices and assigns them to your organization's MDM server." Options A, B, and C serve other purposes and cannot perform this task.

Reference:

Apple Configurator User Guide, "Adding Devices to Apple Business Manager" section.

Apple Business Manager User Guide, "Manually Add Devices" section.

NEW QUESTION # 30

Your organization is working with a participating Apple Authorized Reseller or carrier to buy Apple devices.

What does the reseller need so that devices will show in Apple Business Manager or Apple School Manager?

- **A. Organization ID**
- B. Federation Number
- C. D-U-N-S Number
- D. Customer Number

Answer: A

Explanation:

For new devices purchased from Apple Authorized Resellers or carriers to appear automatically in Apple Business Manager (ABM) or Apple School Manager (ASM), the reseller must link their sales to your organization. Apple Learning specifies that this is accomplished by providing the reseller with your Organization ID. This unique identifier is assigned when your organization sets up ABM/ASM and acts as the connection point for device assignment. Once the reseller has your Org ID, any new device purchases tied to your account are automatically added to ABM. Customer Numbers are only used when purchasing directly from Apple, and the D-U-N-S Number is for business verification, not device assignment. Federation Numbers are related to federated authentication and not reseller integration.
