

Latest E_S4CPE_2405 Material, E_S4CPE_2405 Valid Examcollection

BONUS!!! Download part of TestSimulate E_S4CPE_2405 dumps for free: <https://drive.google.com/open?id=1eqZJvjDFD-XdT47M26zz2KlmdfuumAxb>

To some extent, to pass the E_S4CPE_2405 exam means that you can get a good job. The E_S4CPE_2405 exam materials you master will be applied to your job. The possibility to enter in big and famous companies is also raised because they need outstanding talents to serve for them. Our E_S4CPE_2405 Test Prep is compiled elaborately and will help the client a lot. To get a better and full understanding of our E_S4CPE_2405 quiz torrent, please read the introduction of the features and the advantages of our product as follow.

SAP E_S4CPE_2405 Exam Syllabus Topics:

Topic	Details
Topic 1	Implementing with a Cloud Mindset, Building the Team, and Conducting Fit-to-Standard Workshops: This section of the exam measures skills of project managers and emphasizes the importance of adopting a cloud-first approach when implementing SAP solutions. It also includes building the right implementation team and running fit-to-standard workshops to align system configuration with best practices and standard business processes.
Topic 2	Introduction to Cloud Computing and SAP Cloud ERP Deployment Options: This section of the exam measures skills of cloud solution architects and focuses on the fundamentals of cloud computing, along with the different deployment models available for SAP Cloud ERP. It addresses the benefits, challenges, and selection criteria for choosing the most suitable deployment option in alignment with business goals.
Topic 3	Configuration and the SAP Fiori Launchpad: This section of the exam measures skills of application consultants and covers configuring SAP solutions to meet business needs, along with setting up and managing the SAP Fiori Launchpad. It also touches on customizing the user interface for an optimal and user-friendly experience.

E_S4CPE_2405 Valid Examcollection & E_S4CPE_2405 Valid Test Papers

If you require any further information about either our E_S4CPE_2405 preparation exam or our corporation, please do not hesitate to let us know. High quality E_S4CPE_2405 practice materials leave a good impression on the exam candidates and bring more business opportunities in the future. And many of our customers use our E_S4CPE_2405 Exam Questions as their exam assistant and establish a long cooperation with us.

SAP Certified Specialist - Implementation Consultant - SAP S/4HANA Cloud Private Edition Sample Questions (Q41-Q46):

NEW QUESTION # 41

In which tool can you enable a customer-specific field to be available for UIs and reports relevant for the same business context?

- **A. Custom Fields app**
- B. Custom CDS Views app
- C. Extensibility Inventory app
- D. Runtime Authoring mode (Adapt UI)

Answer: A

NEW QUESTION # 42

Which solution is designed to help customers understand their environmental, social, and governance (ESG) data?

- A. SAP Sustainability Footprint Management
- B. SAP Green Token
- **C. SAP Sustainability Control Tower**
- D. SAP Responsible Design and Production

Answer: C

Explanation:

SAP offers several solutions under its sustainability portfolio to address environmental, social, and governance (ESG) needs. The question asks for the solution designed to help customers understand their ESG data, implying a focus on visibility, reporting, and insights. Let's analyze the options:

* A. SAP Sustainability Control Tower: This is the correct answer. SAP Sustainability Control Tower is a cloud-based solution designed to provide a centralized platform for managing, monitoring, and reporting ESG data. It helps organizations understand their sustainability performance by offering dashboards, KPIs, and analytics to track metrics like carbon emissions, diversity, and governance compliance. It integrates with SAP S/4HANA (including Private Edition) and other systems to provide actionable insights, making it the primary tool for ESG understanding as per SAP's sustainability strategy.

* B. SAP Green Token: This solution focuses on tracking the sustainability attributes of products across supply chains (e.g., carbon footprint of materials) using blockchain technology. While it supports ESG goals, it is more operational and specific to supply chain transparency rather than providing a broad understanding of ESG data. Thus, it is not the best fit here.

* C. SAP Sustainability Footprint Management: This tool calculates and manages product-level carbon footprints and environmental impacts, integrating with SAP S/4HANA. It is more focused on measurement and operational management of environmental data rather than providing a holistic understanding of ESG data across the organization. Hence, it is incorrect in this context.

* D. SAP Responsible Design and Production: This solution helps companies design sustainable products and manage extended producer responsibility (e.g., plastic taxes). It is operational and industry-specific, not a broad ESG data understanding tool, making it an incorrect choice.

In conclusion, SAP Sustainability Control Tower is the solution designed to help customers understand their ESG data through comprehensive visibility and reporting.

NEW QUESTION # 43

What is the maximum file size when using the Local SAP S/4HANA Database Schema migration approach?

Note: There are 2 correct answers to this question.

- A. 160 MB per file
- B. 100 MB per ZIP file
- C. 160 MB per ZIP file
- D. 100 MB per file

Answer: A,C

Explanation:

The Local SAP S/4HANA Database Schema migration approach in the SAP S/4HANA Migration Cockpit uses file uploads to transfer data. File size limits are critical for successful uploads. Let's analyze:

* A. 160 MB per file: This is correct. For individual migration files (e.g., XML, CSV), the Migration Cockpit imposes a maximum size of 160 MB per file when using the local schema approach.

* B. 100 MB per ZIP file: This is incorrect. The limit for ZIP files is 160 MB, not 100 MB, aligning with the general file size restriction.

* C. 160 MB per ZIP file: This is also correct. When multiple files are compressed into a ZIP archive for upload, the maximum size is 160 MB per ZIP file, consistent with SAP's documentation for the local schema method.

* D. 100 MB per file: This is incorrect. The limit is 160 MB, not 100 MB, for individual files in the local schema approach.

In summary, the maximum file size for the Local SAP S/4HANA Database Schema migration approach is A (160 MB per file) and C (160 MB per ZIP file).

NEW QUESTION # 44

How is data migrated directly from an SAP ERP system to SAP S/4HANA Cloud Private Edition?

- A. Extract, Transform, and Load (ETL) tools are used to migrate data from the SAP ERP source system to SAP S/4HANA Cloud Private Edition (through a separate SAP HANA staging database).
- B. The Software Update Manager (SUM) tool migrates the legacy database from the SAP ERP source system to SAP S/4HANA Cloud Private Edition.
- C. SAP Integration Suite connects the SAP ERP source system to the SAP S/4HANA Migration Cockpit.
- D. A Remote Function Call (RFC) connects the SAP ERP source system to the SAP S/4HANA Migration Cockpit.

Answer: D

Explanation:

To migrate data directly from an SAP ERP system to SAP S/4HANA Cloud Private Edition, the SAP S/4HANA Migration Cockpit utilizes a Remote Function Call (RFC) connection. This connection facilitates the direct transfer of data between the source SAP ERP system and the target SAP S/4HANA system. The Migration Cockpit provides predefined migration objects and mapping, streamlining the data migration process without the need for extensive programming.

Option B: The Software Update Manager (SUM) tool migrates the legacy database from the SAP ERP source system to SAP S/4HANA Cloud Private Edition.

This option is incorrect. The Software Update Manager is primarily used for system upgrades and updates, not for data migration between systems.

Option C: Extract, Transform, and Load (ETL) tools are used to migrate data from the SAP ERP source system to SAP S/4HANA Cloud Private Edition (through a separate SAP HANA staging database).

This option is incorrect. While ETL tools can be used for data migration, the SAP S/4HANA Migration Cockpit with an RFC connection is the standard and recommended approach for direct data migration from SAP ERP systems.

Option D: SAP Integration Suite connects the SAP ERP source system to the SAP S/4HANA Migration Cockpit.

This option is incorrect. SAP Integration Suite is designed for integrating various applications and services but is not typically used to connect the SAP ERP source system to the Migration Cockpit for data migration purposes.

In summary, the SAP S/4HANA Migration Cockpit establishes an RFC connection to facilitate direct data migration from an SAP ERP system to SAP S/4HANA Cloud Private Edition, leveraging predefined migration content to ensure a streamlined and efficient migration process.

Where do you identify new and changed features in the latest release of SAP S/4HANA? Note: There are 2 correct answers to this question.

- Answer: C,D**
