SAP Certified Specialist - Implementation Consultant - SAP S/4HANA Cloud Private Edition Sample Questions (Q28-Q33):

NEW QUESTION # 28

What is the purpose of the Business Driven Configuration Questionnaires (BDCQs)? Note: There are 2 correct answers to this question.

- A. To facilitate the connection between partner LOB configuration experts and customer LoB experts
- B. To define enablement requirements for end users and business users
- C. To decide about pace, support level, and update cycles for the system landscape
- D. To gather configuration values to be entered in the SAP S/4HANA Cloud Private Edition system

Answer: A,D

NEW QUESTION # 29

After integration requirements have been finalized, what is used to analyze, design, and document the integration strategy?

- A. SAP Business Accelerator Hub
- B. SAP Cloud ALM Requirements app
- C. Integration and API List
- D. SAP Integration Solution Advisory Methodology

Answer: D

NEW QUESTION # 30

Through which tools can you launch the Cloud Integration Automation service? Note: There are 2 correct answers to this question.

- A. SAP Business Accelerator Hub
- B. SAP Cloud ALM
- C. SAP for Me
- D. SAP Solution Manager

Answer: B,C

NEW QUESTION # 31

How are SAP Best Practices business processes activated in the SAP S/4HANA Cloud Private Edition production system?

- A. Through SAP Solution Builder
- B. Through the SAP GUI
- C. Through transports
- D. Through SAP Signavio Process Navigator

Answer: A

Explanation:

In SAP S/4HANA Cloud Private Edition, SAP Best Practices business processes are activated in the production system using the following tool:

Option A: SAP Signavio Process Navigator

This option is incorrect. SAP Signavio Process Navigator is used for process modeling and analysis, not for activating business processes in the production system.

Option B: Through transports

This option is incorrect. While transports are used to move configurations between systems, the activation of SAP Best Practices content is managed by a specific tool.

Option C: Through the SAP GUI

This option is incorrect. The SAP GUI is an interface for accessing SAP systems but does not directly handle the activation of Best Practices content.

Option D: SAP Solution Builder

This option is correct. SAP Solution Builder is utilized to activate SAP Best Practices content in the production system, ensuring that predefined business processes are correctly implemented.

Therefore, the activation of SAP Best Practices business processes in the SAP S/4HANA Cloud Private Edition production system is performed using SAP Solution Builder.

NEW QUESTION # 32

Which of the following are required for a new implementation of SAP S/4HANA Cloud Private Edition?

Note: There are 2 correct answers to this question.

- A. Nomination of a lead conversion expert for content activation
- **B. Nomination of a lead configuration expert for content activation**
- C. Access to the Software Update Manager tool
- **D. Detailed Digital Discovery Assessment with SAP Best Practices**

Answer: B,D

Explanation:

For a new implementation of SAP S/4HANA Cloud Private Edition, the following are required:

Option A: Detailed Digital Discovery Assessment with SAP Best Practices This option is correct. Conducting a comprehensive Digital Discovery Assessment helps in understanding the customer's business processes and aligning them with SAP Best Practices. This assessment is crucial for defining the project scope and ensuring a successful implementation.

Option B: Nomination of a lead configuration expert for content activation This option is correct. Appointing a lead configuration expert is essential for overseeing the activation of content and ensuring that the system is configured according to the project's requirements. This role is pivotal in managing the configuration activities during the implementation.

Option C: Nomination of a lead conversion expert for content activation This option is incorrect. While a lead conversion expert is important for data migration activities, content activation primarily falls under the purview of the configuration expert.

Option D: Access to the Software Update Manager tool

This option is incorrect. The Software Update Manager tool is typically used for system upgrades and updates, not specifically required for a new implementation.

In summary, a Detailed Digital Discovery Assessment with SAP Best Practices and the nomination of a lead configuration expert for content activation are critical prerequisites for a new implementation of SAP S

/4HANA Cloud Private Edition. These steps ensure that the project is aligned with best practices and that the system configuration is managed effectively.

NEW QUESTION # 33
