100% Esri EAEP2201 Exam Coverage | Test EAEP2201 Simulator

When we choose to find a good job, there is important to get the EAEP2201 certification as you can. There is a fabulous product to prompt the efficiency--the EAEP2201 exam prep, as far as concerned, it can bring you high quality learning platform to pass the variety of exams. Our product is elaborately composed with major questions and answers. It only takes you 20 hours to 30 hours to do the practice. After your effective practice, you can master the examination point from the EAEP2201 Test Question. Then, you will have enough confidence to pass it.

Esri Enterprise Administration Professional 2201 Sample Questions (Q11-Q16):

NEW QUESTION # 11

An organization recently upgraded Portal for ArcGIS. The organization must reduce the number of named users to the maximum allowed by the authorization file and delete members in bulk.

Which action should the administrator perform?

- A. Delete users using the Member tab
- B. Use command line utilities
- **C. Batch delete users with ArcPy**

Answer: C

NEW QUESTION # 12

A GIS administrator must determine which type of service to use when publishing a new basemap for the organization. The basemap must meet several requirements:

- * Support offline workflows
- * Use as little storage space as possible
- * High-resolution display
- * Easily incorporate data updates periodically made to a feature service Which service type should be used?

- A. Dynamic map service
- **B. Vector tile service**
- C. Cached map service

Answer: B

Explanation:

Vector tile services are optimized for high-resolution display and efficient storage, making them ideal for offline workflows. They allow for smaller file sizes compared to raster tiles and support dynamic styling.

Additionally, vector tile services can be updated by regenerating tiles from updated feature services, facilitating easy incorporation of data updates.

NEW QUESTION # 13

A GIS administrator team must perform system maintenance over the weekend. The team must ensure that members do not add, publish, or edit any items in ArcGIS Enterprise. Members still need the ability to access and view items as necessary.

Which action should the team perform?

- A. Disable ArcGIS Web Adaptor
- **B. Place ArcGIS Enterprise in read-only mode**
- C. Change members' user role to Viewer
- D. Clone the organization's content to a standby deployment

Answer: B

Explanation:

The correct solution is to place ArcGIS Enterprise in read-only mode. This is an administrative function designed specifically to prevent changes to content or configuration while still allowing users to view and access existing items.

From the official ArcGIS Enterprise documentation:

"Read-only mode allows an administrator to restrict changes to the portal. When enabled, no users (including administrators) can create, update, or delete items, groups, or users. However, users can still search for and view items, access content, and use apps and services." This feature is typically used during maintenance windows or before performing disaster recovery tasks to preserve system state.

* Option B is incorrect because changing user roles to Viewer would not prevent content changes by administrators or other roles with publishing privileges.

* Option C refers to cloning, which is not a preventive or temporary access control measure, but rather a method for standby deployments or replication.

* Option D (disabling the Web Adaptor) would disrupt access entirely, which does not match the requirement to allow viewing.

NEW QUESTION # 14

A GIS administrator installs and configures an ArcGIS GeoAnalytics Server machine with four cores and 16 GB of RAM. Users experience a slowdown when analyzing large datasets.

Which action should the administrator perform?

- **A. Add 16 GB of RAM to the GeoAnalytics Server machine**
- B. Set the GeoAnalytics Server as the hosting server
- C. Add two cores to the GeoAnalytics Server machine

Answer: A

Explanation:

ArcGIS GeoAnalytics Server is designed to perform distributed analysis on large volumes of spatial and temporal data. To efficiently process large datasets, it is recommended that each machine in the GeoAnalytics Server site has at least 16 GB of RAM and 4 CPU cores. However, for optimal performance, especially when handling very large datasets, increasing the available RAM can significantly improve processing times.

In this scenario, the machine already has 16 GB of RAM and 4 cores. Adding more RAM would allow the GeoAnalytics Server to allocate more memory per job, enhancing its ability to process large datasets efficiently. Therefore, the recommended action is to add 16 GB of RAM to the GeoAnalytics Server machine.

Reference Source: ArcGIS Enterprise documentation on GeoAnalytics Server system requirements and performance optimization.

NEW QUESTION # 15

A new user is added to the organization and can see roads, building footprints, parcels, and traffic data shared with them in Portal for ArcGIS. However, the user cannot use analysis tools in the portal, even though the SpatialAnalysisTools service is verified to be running.

What is causing this issue?

- A. The hosting server has not been configured
- **B. The new user is a Creator user type**
- C. The service needs to be published as a hosted layer
- D. SpatialAnalysisTools needs to be restarted

Answer: B

NEW QUESTION # 16

.....

Nowadays the competition in the job market is fiercer than any time in the past. If you want to find a good job, you must own good competences and skillful major knowledge. So owning the EAEP2201 certification is necessary for you because we will provide the best study materials to you. Our EAEP2201 exam torrent is of high quality and efficient, and it can help you pass the test successfully. The product we provide with you is compiled by professionals elaborately and boosts varied versions which aimed to help you learn the EAEP2201 Study Materials by the method which is convenient for you. They check the update every day, and we can guarantee that you can get a free update service from the date of purchase.
