FCP_FCT_AD-7.2 Study Tool | FCP_FCT_AD-7.2 Latest Exam Testking

The 2Pass4sure is one of the high in demands platforms that are committed to making the FCP—FortiClient EMS 7.2 Administrator Exam FCP_FCT_AD-7.2 exam journey successful in a short time period. To achieve this objective the 2Pass4sure is offering real, valid, and updated FCP_FCT_AD-7.2 exam dumps. These FCP—FortiClient EMS 7.2 Administrator FCP_FCT_AD-7.2 exam questions are the real FCP_FCT_AD-7.2 questions that are verified by qualified FCP—FortiClient EMS 7.2 Administrator Exam FCP_FCT_AD-7.2 Certification Exam experts. They strive hard and put all their efforts to maintain the top standard of Fortinet FCP_FCT_AD-7.2 exam dumps. So rest assured that with the 2Pass4sure FCP_FCT_AD-7.2 exam questions you will get everything that you need to learn, prepare and pass the difficult FCP—FortiClient EMS 7.2 Administrator FCP_FCT_AD-7.2 exam with flying colors.

Fortinet FCP—FortiClient EMS 7.2 Administrator Sample Questions (Q27-Q32):

NEW QUESTION # 27

Refer to the exhibit, which shows the output of the ZTNA traffic log on FortiGate.

```
eventtime=1633084101642546935 src="10.0.0.0" logid="0000000013" type="traffic"
subtype="forward" level="notice" vd="root" srcip=100.64.2.10 srcport=56664 srcintf="port1"
srcintfrole="wan" dstip=100.64.1.10 dstport=9443 dstintf="root" dstintfrole="undefined"
srccountry="Reserved" drcountry="Reserved" sessionid=915 proto=6 action="deny" policyid=0
policytype="proxy-policy" service="tcp/9443" traptype="noop" duration=0 sentbyte=0 rcvdbyte=0 sentpkt=0
rcvpkt=0 connack=0 connreset=0 connstat=1 msg="Denied: failed to match a proxy-policy"
utmref=511-14
```

What can you conclude from the log message?

- A. The remote user connection does not match the local-in policy.
- **B. The remote user connection does not match the ZTNA rule configuration.**
- C. The remote user connection does not match the ZTNA server configuration.
- D. The remote user connection does not match the ZTNA firewall policy.

Answer: B

Explanation:

* Observation of ZTNA Traffic Log:

* The log message indicates that the remote user connection was denied due to failure to match a proxy policy.

* Evaluating Log Message:

* The message suggests that the connection does not match the existing ZTNA rule configuration, leading to the denial.

* Conclusion:

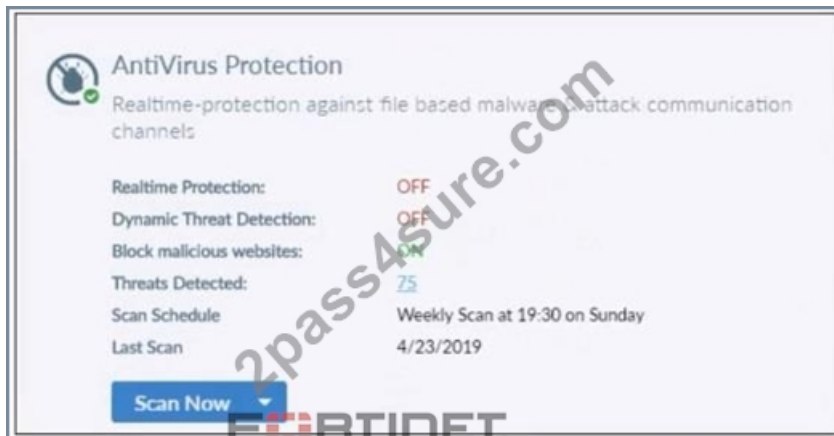

* The correct conclusion from the log message is that the remote user connection does not match the ZTNA rule configuration (B).

References:

* ZTNA traffic log analysis and configuration documentation from the study guides.

NEW QUESTION # 28

Refer to the exhibit.

Based on the settings shown in the exhibit what action will FortiClient take when it detects that a user is trying to download an infected file?

- A. Blocks the infected files as it is downloading
- B. Quarantines the infected files and logs all access attempts

- C. Sends the infected file to FortiGuard for analysis
- **D. Allows the infected file to download without scan**

Answer: D

Explanation:

Block Malicious Website has nothing to do with infected files. Since Realtime Protection is OFF, it will be allowed without being scanned.

Based on the settings shown in the exhibit:

Realtime Protection: OFF

Dynamic Threat Detection: OFF

Block malicious websites: ON

Threats Detected: 75

The "Realtime Protection" setting is crucial for preventing infected files from being downloaded and executed. Since "Realtime Protection" is OFF, FortiClient will not actively scan files being downloaded. The setting "Block malicious websites" is intended to prevent access to known malicious websites but does not scan files for infections.

Therefore, when a user tries to download an infected file, FortiClient will allow the file to download without scanning it due to the Realtime Protection being OFF.

NEW QUESTION # 29

An administrator wants to simplify remote access without asking users to provide user credentials Which access control method provides this solution?

- A. SSL VPN
- **B. ZTNA full mode**
- C. ZTNA IP/MAC littering mode
- D. L2TP

Answer: B

Explanation:

Simplifying Remote Access:

The administrator wants to simplify remote access without asking users to provide user credentials.

Evaluating Access Control Methods:

ZTNA full mode can provide seamless access by leveraging device identity and posture, eliminating the need for user credentials for each access request.

Other methods like SSL VPN and L2TP typically require user credentials.

Conclusion:

The correct access control method that provides this solution is ZTNA full mode.

Reference:

ZTNA section in the FortiGate Infrastructure 7.2 Study Guide.

NEW QUESTION # 30

Which two statements are true about the ZTNA rule? (Choose two.)

- A. It applies SNAT to protect traffic.
- **B. It applies security profiles to protect traffic**
- C. It defines the access proxy.
- **D. It enforces access control.**

Answer: B,D

Explanation:

Understanding ZTNA Rule Configuration:

The ZTNA rule configuration shown in the exhibit defines how traffic is managed and controlled based on specific tags and conditions.

The rule includes security profiles to protect traffic by applying various security checks (A).

Eliminating Incorrect Options:

The rule does not define the access proxy but uses it to enforce access control.

The correct statements about the ZTNA rule are that it applies security profiles to protect traffic (A) and enforces access control (D).

Refer to the exhibit. Based on the CLI output from FortiGate, which statement is true?

```
config user fssso
  edit "Server"
    set type fortiems
    set server "10.0.1.200"
    set password ENC eBTP9H4V4Bv4hWCSnGP+Tpi/EjEdQu4hAa24LiKxHoiWI7JyX
    set ssl enable
  next
end
```

- Answer: D**

Based on the CLI output from FortiGate:

The "server" field points to an IP address (10.0.1.200), which is typically the address of the FortiClient EMS server.

Thus, the configuration indicates that FortiGate is set up to pull user groups from FortiClient EMS.
