100% Pass Quiz 2025 Unparalleled Fortinet Latest FCP_FWB_AD-7.4 Exam Experience

We have to admit that the exam of gaining the FCP_FWB_AD-7.4 certification is not easy for a lot of people, especial these people who have no enough time. If you also look forward to change your present boring life, maybe trying your best to have the FCP_FWB_AD-7.4 certification is a good choice for you. Now it is time for you to take an exam for getting the certification. If you have any worry about the FCP_FWB_AD-7.4 Exam, do not worry, we are glad to help you. Because the FCP_FWB_AD-7.4 study materials from our company are very useful for you to pass the exam and get the certification.

Fortinet FCP - FortiWeb 7.4 Administrator Sample Questions (Q85-Q90):

NEW QUESTION # 85

What is an advantage of utilizing machine learning for web application security compared to rule- based approaches?

- A. Adaptability to evolving attack patterns
- B. Faster response time to threats
- C. Lower computational resource utilization
- D. Simplicity in configuration and management

Answer: A

NEW QUESTION # 86

When configuring a wireless network for dynamic VLAN allocation, which three IETF attributes must be supplied by the radius server? (Choose three.)

- A. 83 Tunnel-Preference
- B. 64 Tunnel-Type
- C. 65 Tunnel-Medium-Type
- D. 58 Egress-VLAN-Name
- E. 81 Tunnel-Private-Group-ID

Answer: B,C,E

NEW QUESTION # 87

Refer to the exhibit.

Which statement is true?

- A. FortiWeb is decrypting and re-encrypting the traffic.
- B. The server is not performing any cryptography on the traffic.
- C. FortiWeb cannot perform content inspection on the traffic because it is encrypted.
- D. The server is encrypting traffic being sent to the client.

Answer: A

Explanation:

In the diagram, FortiWeb is positioned between the client and the server, handling encrypted HTTPS traffic from the client and sending unencrypted HTTP traffic to the server. This indicates that FortiWeb is performing SSL offloading, which means it is decrypting the HTTPS traffic from the client, inspecting it, and then re-encrypting the traffic before forwarding it to the server.

NEW QUESTION # 88

Which statement about local user accounts is true?

- A. They can be used for SSO.
- B. They are best suited for large environments with many users.

- C. They cannot be used for site publishing.
- D. They must be assigned, regardless of any other authentication.

Answer: C

NEW QUESTION # 89

Refer to the exhibit.

FortiADC is applying SNAT to all inbound traffic going to the servers.

When an attack occurs, FortiWeb blocks traffic based on the 192.0.2.1 source IP address, which belongs to FortiADC. This setup is breaking all connectivity and genuine clients are not able to access the servers.

What can the administrator do to avoid this problem? (Choose two.)

- A. Place FortiWeb in front of FortiADC.
- B. Enable and configure the Use X-Forwarded-For setting on FortiWeb.
- C. Enable and configure the Preserve Client IP setting on the client.
- D. No special configuration is required; connectivity will be re-established for all clients after the set timeout.

Answer: A,B

Explanation:

Place FortiWeb in front of FortiADC: This configuration change places FortiWeb between the client and FortiADC, so that FortiWeb can directly inspect and protect the incoming traffic before FortiADC applies SNAT (Source Network Address Translation). By placing FortiWeb in front, it will have access to the real client IP addresses, and it will be able to properly identify and handle attack traffic without blocking legitimate client traffic.

Enable and configure the Use X-Forwarded-For setting on FortiWeb: This setting allows FortiWeb to extract the original client IP address from the X-Forwarded-For header in the HTTP request, which is inserted by FortiADC when performing SNAT. With this setting enabled, FortiWeb will be able to block traffic based on the original client IP address rather than the SNATed IP address (192.0.2.1), preserving the accuracy of the security measures.

NEW QUESTION # 90

.....

In order to help you enjoy the best learning experience, our PDF FCP_FWB_AD-7.4 practice engine supports you download on your computers and print on papers. You must be inspired by your interests and motivation. Once you print all the contents of our FCP_FWB_AD-7.4 practice dumps on the paper, you will find what you need to study is not as difficult as you imagined before. Also, you can make notes on your papers to help you memorize and understand the difficult parts of the FCP_FWB_AD-7.4 Exam Questions.

Latest FCP_FWB_AD-7.4 Exam Simulator: https://www.itexamdownload.com/FCP_FWB_AD-7.4-valid-questions.html

Our FCP_FWB_AD-7.4 study materials stimulate the real exam's environment and pace to help the learners to get a well preparation for the real exam in advance, FCP_FWB_AD-7.4 study material is the best weapon to help you pass the exam, Fortinet

If that is the case, you will receive a request timeout FCP_FWB_AD-7.4 even though the host is available, Accessing Delegate Names Within a Multicast Delegate, OurFCP_FWB_AD-7.4 Study Materials stimulate the real exam's environment and pace to help the learners to get a well preparation for the real exam in advance.
