Test NSE8_812 Questions Fee | Latest NSE8_812 Exam Topics

Everyone is not willing to fall behind, but very few people take the initiative to change their situation. Take time to make a change and you will surely do it. Our NSE8_812 learning materials can give you some help. Our company aims to help ease the pressure on you to prepare for the exam and eventually get a certificate. Obtaining a certificate is equivalent to having a promising future and good professional development. Our NSE8_812 Learning Materials have a good reputation in the international community and their quality is guaranteed. Why don't you there have a brave attempt? You will certainly benefit from your wise choice.

Fortinet NSE 8 - Written Exam (NSE8_812) Sample Questions (Q96-Q101):

NEW QUESTION # 96

Refer to the exhibits.

FortiSandbox

FortiSandbox

FortiSandbox Inspection ☒ Statistics...

FortiSandbox type: Appliance Cloud **Enhanced Cloud**

Server name/IP: fortisandboxcloud.com

Test Connection

Notification email:

Statistics interval: 5 (minutes)

Scan timeout: 30 (minutes)

Scan result expires in: 60 (minutes)

AV Profile

AntiVirus Profile

FortiSandbox

Scan mode: Submit and wait for result **Submit only**

☒ Attachment analysis

Malicious/Virus	Action: --Default--	+ New...	☒ Edit...
High risk	Action: --Default--	+ New...	☒ Edit...
Medium risk	Action: --Default--	+ New...	☒ Edit...
Low risk	Action: --Default--	+ New...	☒ Edit...
No Result	Action: --None--	+ New...	☒ Edit...

☐ URL analysis

Malicious/Virus	Action: --Default--	+ New...	☒ Edit...
High risk	Action: --Default--	+ New...	☒ Edit...
Medium risk	Action: --Default--	+ New...	☒ Edit...
Low risk	Action: --Default--	+ New...	☒ Edit...
No Result	Action: --None--	+ New...	☒ Edit...

Create **Cancel**

You must integrate a FortiMail and FortiSandbox Enhanced Cloud solution for a customer who is concerned about the e-mails being delayed for too long.

According to the configuration shown in the exhibits, which would be an expected behavior?

- A. FortiMail will not wait for results but only for attachments that have been already submitted to the FortiSandbox in the last 60 minutes.
- B. If an attachment is sent to the FortiSandbox while the job queue is full, the e-mail might be delayed for up to 30 minutes, then e-mail will be relayed to the mail server.
- C. FortiMail will ignore the timeout value if content disarm and reconstruction (CDR) is enabled.
- **D. FortiMail will relay valid e-mails to the mail server as soon as it is done with other local inspections.**

Answer: D

NEW QUESTION # 97

Refer to the exhibit.

Edit Handler: FWB Attack

Status: ☒

Name: FWB Attack

Description:

Devices: ☐ All Devices ☒ Specify ☐ Local Device
☒ FortiWeb-DMZ

Subnets: ☒ All Subnets ☐ Specify

Pre-filters: Add Pre-Filter

Filters: +

Filter 1: ☒

Log Device Type: FortiWeb

Log Type: Attack Log (attack)

Group By: Source (src)

Logs match: ☐ All ☒ Any of the following conditions

Log Field	Match Criteria	Value
Sub Type (subtype)	Contains	SQL Injection

Generic Text Filter: 0/1023

Generate Alert When: At least 1 matches occurred over a period of 1 minutes

FOS_WEBHOOK

Name: Ban IP on FortiGate

Description:

Connector: FortiOS Connector

Device: FG101FTK20002960

Automation: Ban IP Incoming Webhook

Device ID: FortiGate-Main_DC (FG101FTK200029)

srcip: Playbook Starter

FortiSoC

- Dashboards
- Outbreak Alerts
- Automation
- Connectors**
 - Playbook
 - Playbook Monitor
- Event Monitor
- All Events
- By Endpoint
- By Threat
- System Events
- Handlers
- Threat Hunting
- Incidents

FortiOS connector

- FortiOS Connector
- FortiGate-Main_DC

Automation Rule: Ban IP Incoming Webhook

Automation: ban-ip

A customer is trying to setup a Playbook automation using a FortiAnalyzer, FortiWeb and FortiGate. The intention is to have the FortiGate quarantine any source of SQL Injection detected by the FortiWeb. They got the automation stitch to trigger on the FortiGate when simulating an attack to their website, but the quarantine object was created with the IP 0.0.0.0. Referring to the configuration and logs in the exhibits, which two statements are true? (Choose two.)

- A. To fix the issue the parameter for script on the Playbook configuration should be epip.
- B. The FortiAnalyzer ADOM Type must be Fabric.
- C. The Group By option in the handler should be different to src, so src can be used on the Playbook configuration.
- D. FortiSOC Playbooks combining FortiWeb and FortiGate are not supported.
- E. To diagnose this issue, you need to use the command diagnose test application oftpd 22.

Answer: B,C

NEW QUESTION # 98

Refer to the exhibit showing a FortiSOAR playbook.

You are investigating a suspicious e-mail alert on FortiSOAR, and after reviewing the executed playbook, you can see that it requires intervention.

What should be your next step?

- A. Click on the notification icon on FortiSOAR GUI and run the pending input action
- B. Reply to the e-mail with the requested Playbook action
- C. Run the Mark Drive by Download playbook action
- D. Go to the Incident Response tasks dashboard and run the pending actions

Answer: D

Explanation:

The exhibited playbook requires intervention, which means that the playbook has reached a point where it needs a human operator to take action. The next step should be to go to the Incident Response tasks dashboard and run the pending actions. This will allow you to see the pending actions that need to be taken and to take those actions.

The other options are not correct. Option B will only show you the notification icon, but it will not allow you to run the pending input action. Option C will run the Mark Drive by Download playbook action, but this is not the correct action to take in this case. Option D is not a valid option.

Here are some additional details about pending actions in FortiSOAR:

- * Pending actions are actions that need to be taken by a human operator.
- * Pending actions are displayed in the Incident Response tasks dashboard.
- * Pending actions can be run by clicking on the action in the dashboard.

NEW QUESTION # 99

A customer is operating a FortiWeb cluster in a high volume active-active HA group consisting of eight FortiWeb appliances. One of the secondary members is handling traffic for one specific VIP.

What will happen with the traffic if that secondary FortiWeb appliance fails?

- A. Traffic will be redistributed by the primary appliance to the remaining secondary appliances.
- B. Traffic will be redirected to the secondary member with the least number of sessions.
- C. Traffic will be redirected to the next appliance in the same traffic group.
- D. Traffic will be redistributed by the primary appliance to the remaining secondary appliances that are configured to handle traffic for that specific VIP.

Answer: C

NEW QUESTION # 100

SD-WAN is configured on a FortiGate. You notice that when one of the internet links has high latency the time to resolve names using DNS from FortiGate is very high.

You must ensure that the FortiGate DNS resolution times are as low as possible with the least amount of work.

What should you configure?

- A. Configure local out traffic to use the outgoing interface based on SD-WAN rules with a manual defined IP associated to a loopback interface and configure an SD-WAN rule from the loopback to the DNS server.
- **B. Configure local out traffic to use the outgoing interface based on SD-WAN rules with the interface IP and configure an SD-WAN rule to the DNS server.**
- C. Configure an SD-WAN rule to the DNS server and use the FortiGate interface IPs in the source address.
- D. Configure two DNS servers and use DNS servers recommended by the two internet providers.

Answer: B

Explanation:

SD-WAN is a feature that allows users to optimize network performance and reliability by using multiple WAN links and applying rules based on various criteria, such as latency, jitter, packet loss, etc. One way to ensure that the FortiGate DNS resolution times are as low as possible with the least amount of work is to configure local out traffic to use the outgoing interface based on SD-WAN rules with the interface IP and configure an SD-WAN rule to the DNS server. This means that the FortiGate will use the best WAN link available to send DNS queries to the DNS server according to the SD-WAN rule, and use its own interface IP as the source address. This avoids NAT issues and ensures optimal DNS performance. Reference:
