

Latest FSCP Exam Testking - FSCP 100% Exam Coverage

As customer-oriented company, we believe in satisfying the customers at any costs. Instead of focusing on profits, we determined to help every customer harvest desirable outcomes by our FSCP training materials. So our staff and after-sales sections are regularly interacting with customers for their further requirements and to know satisfaction levels of them. We want to finish long term objectives through customer satisfaction and we have achieved it already by our excellent FSCP Exam Questions. In this era of cut throat competition, we are successful than other competitors. What is more, we offer customer services 24/7. Even if you fail the exams, the customer will be reimbursed for any loss or damage after buying our FSCP guide dump. One decision will automatically lead to another decision, we believe our FSCP guide dump will make you fall in love with our products and become regular buyers.

The pages of our FSCP guide torrent provide the demo and you can understand part of our titles and the form of our software. On the pages of our FSCP exam torrent you can see the version of the product, the updated time, the quantity of the questions and answers, the characteristics and merits of the product, the price of the product and the discounts. The pages also list the details and the guarantee of our FSCP Exam Torrent, the methods to contact us, the evaluations of the past client on our product, the related exams and other information about our FSCP guide torrent. So before your purchase you can have an understanding of our product and then decide whether to buy our FSCP study questions or not.

FSCP 100% Exam Coverage & FSCP New Practice Materials

Now Forescout FSCP certification test is very popular. Not having got FSCP certificate, you must want to take the exam. Indeed, Forescout FSCP test is very difficult exam, but this is not suggested that you cannot get high marks and pass your exam with ease. Without knowing the shortcut of Forescout FSCP Exam, do you want to know the testing technique? As for the point, I can tell you that Dumpexams Forescout FSCP study guide is your unique choice.

Forescout Certified Professional Exam Sample Questions (Q33-Q38):

NEW QUESTION # 33

Which of the following does NOT need to be checked when you are verifying correct switch plugin configuration?

- A. The Switch plugin is running
- B. Each switch passes the plugin test
- C. Correct switch management credentials are configured for each switch
- **D. IP address ranges are assigned to the correct appliance**
- E. Each switch is assigned to the correct appliance

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:

According to the Forescout Switch Plugin Configuration Guide, when verifying correct switch plugin configuration, you do NOT need to check: "IP address ranges are assigned to the correct appliance". This setting is network/appliance configuration, not switch plugin-specific configuration.

Switch Plugin Configuration Verification Checklist:

According to the Switch Plugin documentation:

When verifying switch plugin configuration, you MUST check:

- * A. The Switch plugin is running #
- * Plugin status must be active
- * Verify in plugin management interface
- * B. Correct switch management credentials #
- * SSH/CLI credentials configured
- * SNMP credentials (v1/v2/v3) configured
- * Must have appropriate permissions
- * D. Each switch passes the plugin test #
- * Use plugin test function to verify connectivity
- * Confirms credentials and permissions work
- * Validates communication protocols
- * E. Each switch is assigned to the correct appliance #
- * Switch must be assigned to managing appliance
- * Critical for multi-appliance deployments
- * Ensures proper VLAN management traffic routing

Why C is NOT Required:

According to the documentation:

IP address range assignment (segment assignment) is:

- * Part of appliance channel/segment configuration
- * NOT part of switch plugin-specific configuration
- * Handled at appliance level, not plugin level
- * Related to appliance management, not switch management

Switch Plugin vs. Appliance Configuration:

According to the configuration guide:

Item

Switch Plugin Config

Appliance Config

Plugin Running

#Yes

N/A

Switch Credentials

#Yes

N/A

Plugin Test

#Yes

N/A

Switch Assignment

#Yes

N/A

IP Address Ranges

#No

#Yes

NEW QUESTION # 34

Which of the following is a switch plugin property that can be used to identify endpoint connection location?

- A. Switch Location
- B. Switch Port Alias
- C. Switch IP/FQDN and Port Name
- D. Wireless SSID
- E. Switch Port Action

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:

According to the Forescout Switch Plugin Configuration Guide Version 8.12 and the Switch Properties documentation, the Switch IP/FQDN and Port Name property is used to identify an endpoint's connection location. The documentation explicitly states:

"The Switch IP/FQDN and Port Name property contains either the IP address or the fully qualified domain name of the switch and the port name (the physical connection point on that switch) to which the endpoint is connected." Switch IP/FQDN and Port Name Property:

This property is fundamental for identifying where an endpoint is physically connected on the network.

According to the documentation:

Purpose: Provides the exact physical location of an endpoint on the network by identifying:

- * Switch IP Address or FQDN - Which switch the endpoint is connected to
- * Port Name - Which specific port on that switch the endpoint uses

Example: A property value might look like:

- * 10.10.1.50:Port Fa0/15 (IP address and port name)
- * core-switch.example.com:GigabitEthernet0/1/1 (FQDN and port name)

Use Cases for Location Identification:

According to the Switch Plugin Configuration Guide:

- * Physical Topology Mapping - Administrators can see exactly where each endpoint connects to the network
- * Port-Based Policies - Create policies that apply actions based on specific switch ports
- * Troubleshooting - Quickly locate endpoints by their switch port connection
- * Inventory Tracking - Maintain accurate records of device locations and connections Switch Location vs. Switch IP/FQDN and Port Name:

According to the documentation:

Property

Purpose

Switch Location

The switch location based on the switch MIB (Management Information Base) - geographic location of the switch itself Switch IP/FQDN and Port Name The specific switch and port where an endpoint is connected - physical connection point Switch Port Alias The alias/description of the port (if configured on the switch) The key difference: Switch Location identifies where the switch itself is located, while Switch IP/FQDN and Port Name identifies the specific connection point where the endpoint is attached.

Why Other Options Are Incorrect:

- * A. Switch Location - Identifies the location of the switch device itself (from MIB), not the endpoint's connection point
- * B. Switch Port Alias - This is an alternate name for a port (like "Conference Room Port"), not the connection location information
- * D. Switch Port Action - This indicates what action was performed on a port, not where the endpoint is located
- * E. Wireless SSID - This is a Wireless Plugin property, not a Switch Plugin property; identifies wireless network name, not switch connection location Switch Properties for Endpoint Location:

According to the complete Switch Properties documentation:

The Switch Plugin provides these location-related properties:

- * Switch IP/FQDN - The switch to which the endpoint connects
- * Switch IP/FQDN and Port Name - The complete location (switch and port)
- * Switch Port Name - The specific port on the switch
- * Switch Port Alias - Alternate port name

Only Switch IP/FQDN and Port Name provides the complete endpoint connection location information in a single property.

NEW QUESTION # 35

Why would the patch delivery optimization mechanism used for Windows 10 updates be a potential security concern?

- A. It uses a peer-to-peer file sharing protocol by default
- B. The registry DWORD controlling this behavior cannot be changed
- C. CounterACT cannot initiate Windows updates for Windows 10 devices
- D. It always uses a peer-to-peer file sharing protocol
- E. It can be configured to use a peer-to-peer file sharing protocol

Answer: E

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:

According to the Windows Update Delivery Optimization documentation and security analysis, the potential security concern with patch delivery optimization for Windows 10 updates is that it CAN BE CONFIGURED to use a peer-to-peer file sharing protocol. While the feature includes security mechanisms like cryptographic signing, the capability to enable P2P sharing does create potential security concerns depending on the configuration.

Windows Update Delivery Optimization Overview:

According to the Windows Delivery Optimization documentation:

"Windows Update Delivery Optimization is a feature in Microsoft's Windows designed to improve the efficiency of downloading and distributing updates. Instead of each device independently downloading updates from Microsoft's servers, Update Delivery Optimization allows devices to share update files with each other, either within a local network or over the internet. This peer-to-peer (p2p) approach reduces bandwidth consumption and accelerates the update process." Configuration Flexibility:

According to the documentation:

The P2P feature is configurable, not mandated:

- * Default Setting - By default, Delivery Optimization is enabled for local network sharing
- * Configurable Options:
 - * PCs on my local network only (safer)
 - * PCs on my local network and the internet (broader sharing, higher risk)
 - * Disabled entirely

Security Concerns Related to P2P Configuration:

According to the security analysis:

When P2P is enabled, potential concerns include:

- * Network Isolation Risks - In firewalled or segmented networks, P2P discovery can expose endpoints
 - * Bandwidth Consumption - Improperly configured P2P can saturate network resources
 - * Peer Discovery Vulnerabilities - Devices must discover each other, potentially exposing endpoints
 - * Internet-based Sharing Risks - When "internet peers" are enabled, updates are shared across the internet
 - * Privacy Implications - Devices communicating for update sharing may leak information
- Cryptographic Protection Does NOT Eliminate Configuration Risk:

According to the documentation:

"While Update Delivery Optimization ensures that all update files are cryptographically signed and verified before installation, some organizations may still be concerned about allowing peer-to-peer data sharing." While the updates themselves are protected, the act of enabling P2P configuration creates the security concern.

Why Other Options Are Incorrect:

- * B. CounterACT cannot initiate Windows updates for Windows 10 - Incorrect; CounterACT can initiate Windows updates; this is not the security concern
- * C. It uses peer-to-peer by default - Incorrect; while enabled by default for local networks, internet P2P sharing requires explicit

configuration

* D. The registry DWORD cannot be changed - Incorrect; the DO modes registry value (DODownloadMode) CAN be changed via GPO or registry

* E. It always uses peer-to-peer - Incorrect; P2P is configurable, not mandatory; organizations can disable it entirely Registry DWORD Configuration Options:

According to the Windows documentation:

The DODownloadMode DWORD value can be configured to:

* 0 = HTTP only, no peering (addresses security concern)

* 1 = HTTP blended with local peering (moderate risk)

* 3 = HTTP blended with internet peering (higher risk - the security concern)

* 99 = Simple download mode

This demonstrates that P2P can be configured, which is the security concern mentioned in the question.

NEW QUESTION # 36

Which of the following is true regarding the Windows Installed Programs property which employs the "for any /for all" logic mechanism?

- A. The condition does not have any sub-properties. The "any/all" refers to the multiple programs.
- B. Although the condition has sub-properties which could refer to a single program on multiple endpoints, the "any/all" refers to the program's properties.
- C. Although the condition has multiple sub-properties, when "ANY" is selected it evaluates the programs for any of the configured sub-properties.
- **D. Although the condition has multiple sub-properties, the "any/all" refers to the programs and not the sub- properties.**
- E. Although the condition has multiple sub-properties, the "any/all" refers to the sub-properties and not the programs.

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:

The Windows Installed Programs property condition utilizes multiple sub-properties including Program Name, Program Version, Program Vendor, and Program Path. However, when using the "for ANY/for ALL" logic mechanism, the "any/all" refers to the PROGRAMS and not to the sub-properties.

How the "Any/All" Logic Works with Windows Installed Programs:

When configuring a policy condition with the Windows Installed Programs property, the "any/all" logic determines whether an endpoint should match the condition based on:

* "For ANY" - The endpoint matches the policy condition if ANY of the configured programs are installed on the endpoint

* "For ALL" - The endpoint matches the policy condition if ALL of the configured programs are installed on the endpoint Example:

If an administrator creates a condition like:

* Windows Installed Programs contains "Microsoft Office" OR "Adobe Reader"

* Using "For ANY": The endpoint matches if it has EITHER Microsoft Office OR Adobe Reader installed

* Using "For ALL": The endpoint matches only if it has BOTH Microsoft Office AND Adobe Reader installed The sub-properties (Program Name, Version, Vendor, Path) are used to define and identify which specific programs to match against, but the "any/all" logic applies to the PROGRAMS themselves, not to the sub- properties.

Why Other Options Are Incorrect:

* A - Incorrectly states the "any/all" evaluates the programs for the sub-properties

* B - Factually incorrect; the condition definitely has multiple sub-properties (Name, Version, Vendor, Path)

* C - Confuses the scope; the "any/all" does not refer to "program's properties" but to multiple programs

* D - Inverted logic; the "any/all" refers to the programs, not the sub-properties Referenced Documentation:

* Forescout Administration Guide v8.3, v8.4

NEW QUESTION # 37

Which of the following are endpoint attributes learned from the Switch plugin?

- A. Host Name, Mac table, Switch IP, Port Description, Host Table, Switch Version
- B. Switch Version, Mac address, Switch OS, Port VLAN, Host Name, ARP Table
- C. Mac address, Switch IP and Port name, ARP Table, Switch Port Information
- **D. Mac address, Host name, Port VLAN, Port Description, Switch OS, Switch Version**
- E. Port VLAN, Switch Version, Mac address, Host name, Port Description, ARP Table, Switch Version

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:

According to the Forescout Switch Plugin documentation and Switch Properties, the endpoint attributes learned from the Switch plugin are: Mac address, Host name, Port VLAN, Port Description, Switch OS, and Switch Version.

Switch Plugin Endpoint Properties:

According to the Switch Properties documentation:

The Switch plugin learns and populates the following endpoint attributes:

- * Mac address - MAC address of the endpoint
- * Host name - Device hostname from switch ARP table
- * Port VLAN - VLAN ID assigned to the switch port
- * Port Description - Switch port alias/description
- * Switch OS - Operating system of the switch
- * Switch Version - Software version of the switch

Why Other Options Are Incorrect:

- * A. Includes "Mac table" and "Host Table" - These are switch resources, not endpoint attributes
- * B. Lists "ARP Table" and duplicates "Switch Version" - ARP table is not an endpoint attribute
- * D. Includes "ARP Table" - ARP table is a switch resource, not an endpoint attribute
- * *E. "Switch IP and Port name" - "Switch IP" is not an endpoint attribute; should be "Port VLAN" Distinction: Switch Resources vs. Endpoint Attributes:

According to the documentation:

Endpoint Attributes (learned about the endpoint):

- * Mac address
- * Host name
- * Port VLAN
- * Port Description
- * Switch OS
- * Switch Version

Switch Resources (infrastructure information):

- * Mac table
- * ARP table
- * Host table

NEW QUESTION # 38

.....

Our website takes the lead in launching a set of test plan aiming at those office workers to get the FSCP exam certification. We have organized a team to research and study question patterns pointing towards various learners. Our company keeps pace with contemporary talent development and makes every learners fit in the needs of the society. Based on advanced technological capabilities, our FSCP Study Materials are beneficial for the masses of customers. Our experts have plenty of experience in meeting the requirement of our customers and try to deliver satisfied FSCP exam guides to them.

FSCP 100% Exam Coverage: <https://www.dumpexams.com/FSCP-real-answers.html>

Furthermore, FSCP updated exam training will give you a solid understanding of how to conquer the difficulties in the real test, Take a look at FSCP preparation exam, and maybe you'll find that's exactly what you've always wanted, We are providing 100% passing guarantee for your FSCP that you will get more high grades by using our material which is prepared by our most distinguish and most experts team, These FSCP practice questions can help you measure your skill to see if it has already met the standard set by Forescout FSCP.

Systematically updated examples reflecting today's FSCP best idioms, This is done with the help of complex solid state systems that can be studied experimentally, Furthermore, FSCP updated exam training will give you a solid understanding of how to conquer the difficulties in the real test.

100% Pass Quiz 2025 Forescout Efficient Latest FSCP Exam Testking

Take a look at FSCP Preparation exam, and maybe you'll find that's exactly what you've always wanted, We are providing 100% passing guarantee for your FSCP that you will get more high grades by using our material which is prepared by our most distinguish and most experts team.

These FSCP practice questions can help you measure your skill to see if it has already met the standard set by ForeScout FSCP. Just the same as the free demo, we have provided three kinds of versions of our ForeScout FSCP preparation exam, among which the PDF version is the most popular one.
