for the exam, candidates can take advantage of Google's training resources, which include instructor-led courses, on-demand videos, and practice exams.

## Google Cloud Certified - Professional Google Workspace Administrator Sample Questions (Q65-Q70):

### NEW QUESTION # 65

An employee at your organization is going on long-term leave for an unknown period of time.

Their teammate is working on a shared project and needs access to all the project files owned by the employee on leave. You must grant access to all these files efficiently. What should you do?

- **A. Grant the teammate access to the project files by using the transfer ownership functionality.**
- B. Suspend the Workspace account of the employee who is on leave.
- C. Locate the folder that contains the project files by using the security investigation tool. Make a copy of the files for the teammate.
- D. Locate, download, and share the project files with the teammate.

**Answer: A**

### NEW QUESTION # 66

A large enterprise that had a security breach is working with an external legal team to determine best practices for an investigation. Using Google Vault, the security team is tasked with exporting data for review by the legal team. What steps should you take to securely share the data in question?

- A. Determine the scope of the investigation, create a Matter and Holds in Google Vault, and share with the legal team.
- B. Immediately suspend the user's account, assign an archived user license, and export data.
- C. Immediately suspend the user's account, search for all the email messages in question, and forward to the legal team.
- **D. Suspend the user's account, search all associated users data in Google Vault, and export the data.**

**Answer: D**

Explanation:

To securely share data using Google Vault for an investigation:

- \* Suspend the user's account to prevent further changes to their data.
- \* Use Google Vault to search for all associated user data relevant to the investigation.
- \* Export the data securely from Google Vault. These steps ensure that the data remains intact and secure throughout the investigation process.

### NEW QUESTION # 67

You've received multiple reports about a suspicious email from someone who is pretending to be from your organization's human resources department. The email is prompting employees to click a link for a password update. You want to remediate this sender's emails. What should you do?

- A. Notify all employees and request that they report this email as spam.
- **B. Use the security investigation tool to search for users who received the suspicious email, and select Mark message as phishing.**
- C. Use the security investigation tool to action the suspicious email and select Mark message as spam.
- D. Create an activity rule to alert administrators to similar emails from that sender.

**Answer: B**

Explanation:

The security investigation tool allows you to search for and take action on suspicious emails within your organization. Marking the email as phishing helps to flag the email as malicious and prevents further emails from the same sender from being delivered to users' inboxes. This also ensures that the email is properly categorized for review and investigation by your security team.

### NEW QUESTION # 68

Your organization implemented Single Sign-On (SSO) for the multiple cloud-based services it uses. During authentication, one service indicates that access to the SSO provider is not possible due to invalid information. What should you do?

- A. Run nslookup to confirm that the service exists.
- **B. Verify that the Audience element in the SAML Response matches the assertion consumer service (ACS) URL**
- C. Ensure that Microsoft's Active Directory Federation Services 2.0 sends encrypted SAML Responses in default configurations.
- D. Update the validation certificate.

**Answer: B**

Explanation:

If a service indicates that access to the SSO provider is not possible due to invalid information, you should verify that the Audience element in the SAML Response matches the assertion consumer service (ACS) URL. This check ensures that the SAML Response is directed to the correct service, resolving the issue with authentication.

### NEW QUESTION # 69

You are configuring a customer relationship management (CRM) solution to integrate with Google Workspace services for the sales department at your organization. The CRM solution is in the Google Workspace Marketplace and you deploy the specific CRM solution. Employees report that there are no contacts and documents visible in the CRM solution. You must identify and fix the problem. What should you do?

- A. Revoke all OAuth scopes and reinstall the CRM solution for just the sales department.
- **B. Check the OAuth scopes and ensure that Drive and Gmail scopes are granted for the CRM solution**
- C. Check if Manage access to apps is set to Allow users to install and run any app from the Marketplace.
- D. Check if the App distribution settings are set to ON for everyone in your organization.

**Answer: B**

Explanation:

\* Access the Admin Console: Sign in to your Google Admin console.

\* Navigate to Security Settings: Click on "Security" and then "API controls."

\* Manage Third-Party App Access: Click on "Manage third-party app access."

\* Check OAuth Scopes: Locate the CRM solution and ensure that it has the necessary OAuth scopes, particularly for Google Drive and Gmail.

\* Grant Access: If necessary, adjust the settings to grant the required scopes.

\* Verify Integration: Confirm that the CRM solution now has access to the necessary data and that employees can see contacts and documents.
