Hot Test HPE0-J68 Dumps Pdf | High Pass-Rate HP HPE0-J68: HPE Storage Solutions 100% Pass

We are so proud that we own the high pass rate of our HPE0-J68 exam braindumps to 99%. This data depend on the real number of our worthy customers who bought our HPE0-J68 exam guide and took part in the real exam. Obviously, their performance is wonderful with the help of our outstanding HPE0-J68 Exam Materials. We have the definite superiority over the other HPE0-J68 exam dumps in the market. If you choose to study with our HPE0-J68 exam guide, your success is 100 guaranteed.

HPE0-J68 exam covers a range of topics related to HPE storage solutions including the HPE Storage portfolio, HPE storage networking, storage backup and recovery, and HPE storage management. HPE0-J68 exam is designed to test the candidate's ability to understand the different storage solutions offered by HPE, their features, and the ability to identify the appropriate solution for a given scenario. It also tests the candidate's knowledge of HPE storage networking technologies, including SAN, NAS, and iSCSI protocols.

HPE0-J68 exam is a 90-minute exam that consists of 60 multiple-choice questions. HPE0-J68 Exam covers a wide range of topics, including HPE storage solutions architecture, design, installation, configuration, management, and troubleshooting. HPE0-J68 exam also covers HPE storage technologies such as HPE 3PAR, HPE Nimble Storage, HPE StoreOnce, and HPE StoreVirtual.

HPE Storage Solutions Sample Questions (Q56-Q61):

NEW QUESTION # 56

When using an HPE 3PAR StoreServ array to enable a user to apply array-based data services to specific applications and VMs. What is the benefit of implementing VM-level gradually of Volts?

- A. Performing is accelerated by detecting and moving the most frequently accessed VMs into the fast class tier
- B. Efficiency is maintained by reclaiming space from deleted or migrated VMs using capabilities built into the storage ASIC

- C. Performance is accelerated by leveraging the deduplication capabilities built into the storage ASIC
- D. Data sprawls eliminated by performing the migration functions at the array level using 3PAR HPE Dynamic Optimization

Answer: B

NEW QUESTION # 57

You are presenting the HPE StoreEver portfolio to a media agency.

What advantage is offered when using LTFS?

- A. file encryption with public and private key management
- B. file and block data management within an HPE HSM solution
- C. WORM functionality for file, block and object storage access on tape
- D. file management capabilities will be provided with tape cartridges

Answer: D

Explanation:

The Linear Tape File System (LTFS) provides an easy and intuitive way to manage files stored on tape cartridges. LTFS allows users to organize, browse, and access files directly from the tape as if they were on a disk. This file system presents tape as a drive letter on Windows or as a mount point on Linux, making it simpler to use tape for data archiving and management. This capability makes LTFS an attractive option for organizations that require long-term data storage with easy access.

NEW QUESTION # 58

A solution architect is sizing the required capacity for an HPE Alletra 9000. Customer requirements include:

- 200TB base volumes
- Regular snapshots being taken every hour with one-week retention
- 10% daily change rate

How much capacity is needed for snapshots after one week?

- A. 200TB
- B. 20TB
- C. 140TB
- D. 480TB

Answer: D

Explanation:

To calculate the required capacity for snapshots after one week for an HPE Alletra 9000 with the given customer requirements:

Base volume size: 200TB

Snapshots frequency: Every hour (24 snapshots per day, 168 per week) Daily change rate: 10% The snapshot capacity can be calculated by considering the daily change rate and the number of snapshots over a week.

Daily change: 10% of 200TB = 20TB Total change over a week: 20TB * 7 days = 140TB Since there are 168 snapshots (24 per day for 7 days), the total required capacity is 140TB (for the changes) plus the base volume size of 200TB, totaling 480TB.

NEW QUESTION # 59

Which resource provides configurations for HPE tested and referenced configurations in a software-defined storage environment?

- A. One Config Advanced
- B. StoreVirtual VSA Ready Nodes
- C. HPE Storage Sizer
- D. NinjaStars

Answer: B

Explanation:

StoreVirtual VSA Ready Nodes provide configurations for HPE-tested and referenced configurations in a software-defined storage

environment. These configurations are pre-validated and optimized for specific workloads, ensuring that they meet performance and reliability requirements. StoreVirtual VSA (Virtual Storage Appliance) enables the deployment of HPE's software-defined storage solutions on industry-standard servers, making it a flexible and cost-effective option for various storage needs.

NEW QUESTION # 60

Which storage tool in the storage assessment foundry provide data protection analysis?

- A. NinjaCrawler
- B. Ninja Thin
- C. Ninja protected+ (318)
- D. Ninja Stars

Answer: C

Explanation:

NinjaProtected+ is a storage assessment tool from HPE that provides data protection analysis. It helps customers understand their data protection landscape, assess backup and recovery needs, and optimize data protection strategies. This tool is particularly useful for ensuring that the data is adequately protected across different storage environments.
