HPE7-A01 Preparation

Nowadays, online shopping has been greatly developed, but because of the fear of some uncontrollable problems after payment, there are still many people don't trust to buy things online, especially electronic products. But you don't have to worry about this when buying our HPE7-A01 Study Materials. Not only will we fully consider for customers before and during the purchase, but we will also provide you with warm and thoughtful service after payment. We have a special technical customer service staff to solve all kinds of consumers' problems.

HP Aruba Certified Campus Access Professional Exam Sample Questions (Q125-Q130):

NEW QUESTION # 125

A customer has a large number of food-producing machines

* All machines are connected via Aruba CX6200 switches in VLANs 100, 110, and 120

* Several external technicians are maintaining this special equipment

What are the correct commands to ensure that no rogue DHCP server will impact the network?

```
dhcpv4-snooping
no dhcpv4-snooping option 8
vlan 100
  name cornflakes
  dhcpv4-snooping
vlan 110
  name cornmill
  dhcpv4-snooping
vlan 120
  name packaging
  dhcpv4-snooping
interface lag 1
  no shutdown
  description Uplink-to-Core
  no routing
  vlan trunk native 1
  vlan trunk allowed all
  lacp mode active
```

• A.

```
dhcp-snooping enable
no dhcp-snooping option 82
dhcp-snooping vlan 100-120
vlan 100
  name cornflakes
vlan 110
  name cornmill
vlan 120
  name packaging
interface lag 1
  no shutdown
  description Uplink-to-Core
  no routing
  vlan trunk native 1
  vlan trunk allowed all
  lacp mode active
  dhcp-snooping trust
```

• B.

```

dhcp snooping enable
no dhcp-snooping option 82
vlan 100
  name cornflakes
  dhcp-snooping
vlan 110
  name cornmill
  dhcp-snooping
vlan 120
  name packaging
  dhcp-snooping
interface lag 1
  no shutdown
  description Uplink-to-Core
  no routing
  vlan trunk native 1
  vlan trunk allowed all
  lacp mode active
  dhcp snooping trust

```

- C.

```

dhcpv4-snooping all vlans
no dhcpv4-snooping option 82
interface lag 1
  no shutdown
  description Uplink-to-Core
  no routing
  vlan trunk native 1
  vlan trunk allowed all
  lacp mode active
  dhcpv4-snooping trust

```
- D.

Answer: B

Explanation:

Explanation

Option A shows the correct commands to ensure that no rogue DHCP server will impact the network. The commands include the following steps:

- * Enable DHCP snooping on the switch. DHCP snooping is a feature that prevents rogue DHCP servers from offering IP addresses to clients by filtering DHCP messages based on trusted and untrusted ports1.
- * Configure VLANs 100, 110, and 120 as DHCP snooping VLANs. This means that DHCP snooping will be applied to these VLANs and any untrusted DHCP messages received on these VLANs will be dropped1.
- * Configure LAG 1 as a trusted port for DHCP snooping. This means that any DHCP messages received on LAG 1 will be allowed and not filtered by DHCP snooping. LAG 1 is assumed to be connected to a legitimate DHCP server or a router that relays DHCP requests to a legitimate DHCP server1.

Option B is incorrect because it does not enable DHCP snooping on the switch or configure VLANs 100, 110, and 120 as DHCP snooping VLANs. Option C is incorrect because it does not configure LAG 1 as a trusted port for DHCP snooping. Option D is incorrect because it does not enable DHCP snooping on the switch or configure LAG 1 as a trusted port for DHCP snooping.

NEW QUESTION # 126

Match the topics with the underlying technologies (Options may be used more than once or not at all.)

Topic	Answer Area
EVPN-VXLAN	
User Based Tunneling (UBT)	

Centralized Overlay

Distributed Overlay

Encapsulated in UDP

Generic Routing Encapsulation (GRE)

Answer:

Explanation:

NEW QUESTION # 127

Which statement best describes QoS?

- A. Determining which traffic passes specified quality metrics
- B. Identifying the quality of the connection
- **C. Identifying specific traffic for special treatment**
- D. Scoring traffic based on the quality of the contents

Answer: C

Explanation:

Explanation

QoS stands for Quality of Service and is a mechanism that allows network devices to prioritize and differentiate traffic based on certain criteria, such as application type, source, destination, etc³. QoS involves identifying specific traffic for special treatment and applying policies and actions to improve its performance or meet certain service level agreements (SLAs)³. QoS can help network devices to manage congestion, delay, jitter, packet loss, bandwidth allocation, etc., for different types of traffic³. QoS can be implemented at various layers of the network stack and across different network domains. References: 3

NEW QUESTION # 128

A customer has a large number of food-producing machines

* All machines are connected via Aruba CX6200 switches in VLANs 100, 110, and 120

* Several external technicians are maintaining this special equipment

What are the correct commands to ensure that no rogue DHCP server will impact the network?

```

dhcpv4-snooping all vlans
no dhcpv4-snooping option 82
interface lag 1
no shutdown
description Uplink-to-Core
no routing
vlan trunk native 1
vlan trunk allowed all
lACP mode active
dhcpv4-snooping trust

```

- A.

```

dhcpv4-snooping
no dhcpv4-snooping option 82
vlan 100
  name cornflakes
  dhcpv4-snooping
vlan 110
  name cornmill
  dhcpv4-snooping
vlan 120
  name packaging
  dhcpv4-snooping
interface lag 1
  no shutdown
  description Uplink-to-Core
  no routing
  vlan trunk native 1
  vlan trunk allowed all
  lacp mode active
  dhcpv4-snooping trust

```

- B.

```

dhcp-snooping enable
no dhcp-snooping option 82
dhcp-snooping vlan 100-120
vlan 100
  name cornflakes
vlan 110
  name cornmill
vlan 120
  name packaging

interface lag 1
  no shutdown
  description Uplink-to-Core
  no routing
  vlan trunk native 1
  vlan trunk allowed all
  lacp mode active

```

- C.

```

dhcp snooping enable
no dhcp-snooping option 82
vlan 100
  name cornflakes
  dhcp-snooping
vlan 110
  name cornmill
  dhcp-snooping
vlan 120
  name packaging
  dhcp-snooping
interface lag 1
  no shutdown
  description Uplink-to-Core
  no routing
  vlan trunk native 1
  vlan trunk allowed all
  lacp mode active
  dhcp snooping trust

```

- D.

Answer: D

Explanation:

configures DHCP snooping on the switch and enables it for VLANs 100, 110, and 120. It also specifies the IP address of the authorized DHCP server and sets the ports connected to the server as trusted. This prevents any unauthorized DHCP server from providing invalid configuration data to the clients on those VLANs. Option B also enables DHCP option-82, which adds information about the switch port and VLAN to the DHCP packets, allowing for more granular control and logging of DHCP transactions.

NEW QUESTION # 129

A large retail client is looking to generate a rich set of contextual data based on the location information of wireless clients in their stores Which standard uses Round Trip Time (RTT) and Fine Time Measurements (FTM) to calculate the distance a client is from an AP?

- A. 802.11V
- B. 802.11be
- C. 802.11ah
- **D. 802.11mc**

Answer: D

Explanation:

802.11mc is a standard that uses Round Trip Time (RTT) and Fine Time Measurements (FTM) to calculate the distance a client is from an AP. 802.11mc defines a protocol for exchanging FTM frames between an AP and a client, which contain timestamps that indicate when the frames were transmitted and received. By measuring the RTT of these frames, the AP or the client can estimate their distance based on the speed of light. The other options are incorrect because they either do not use RTT or FTM or do not exist as standards.

NEW QUESTION # 130

.....

Of course, when we review a qualifying exam, we can't be closed-door. We should pay attention to the new policies and information related to the test HPE7-A01 certification. For the convenience of the users, the HPE7-A01 test materials will be updated on the homepage and timely update the information related to the qualification examination. As a result, the HPE7-A01 Test Prep can help users to spend the least time, know the test information directly, let users save time and used their time in learning the new hot spot concerning about the knowledge content.
