100% Pass 2025 Valid Juniper Latest JN0-637 Dumps Book

The JN0-637 Test Guide is written by lots of past materials' rigorous analyses. The language of our study materials are easy to be understood, only with strict study, we write the latest and the specialized study materials. We want to provide you with the best service and hope you can be satisfied. It boosts your confidence for real exam and will help you remember the exam questions and answers that you will take part in. You may analyze the merits of each version carefully before you purchase our Security, Professional (JNCIP-SEC) guide torrent and choose the best one.

Juniper JN0-637 Exam Syllabus Topics:

Topic	Details

Topic 1	Layer 2 Security: It covers Layer 2 Security concepts and requires candidates to configure or monitor related scenarios.
Topic 2	Automated Threat Mitigation: This topic covers Automated Threat Mitigation concepts and emphasizes implementing and managing threat mitigation strategies.
Topic 3	Advanced Network Address Translation (NAT): This section evaluates networking professionals' expertise in advanced NAT functionalities and their ability to manage complex NAT scenarios.
Topic 4	Multinode High Availability (HA): In this topic, aspiring networking professionals get knowledge about multinode HA concepts. To pass the exam, candidates must learn to configure or monitor HA systems.

Juniper Security, Professional (JNCIP-SEC) Sample Questions (Q97-Q102):

NEW QUESTION # 97

Exhibit

```
[edit security policies from-zone trust to-zone untrust policy Adaptive-Threat-Profiling]
user@SRX-1# show
match {
    source-address any;
    destination-address any;
    application any;
    dynamic-application [ junos:web:proxy junos:web:anonymizer junos:TOR ];
}
then {
    reject {
        application-services {
            security-intelligence {
                add-destination-ip-to-feed
                Proxy_Nodes;
            }
        }
    }
}
```

Referring to the exhibit, which two statements are true? (Choose two.)

- A. The SRX-1 device creates the Proxy_wodes feed, so it cannot use it in another security policy.
- B. You can only use the Proxy_Node3 feed as the destination-address match criteria of another security policy on a different SRX Series device.
- C. The SRX-1 device can use the Proxy__Nodes feed in another security policy.
- D. You can use the Proxy_Nodes feed as the source-address and destination-address match criteria of another security policy on a different SRX Series device.

Answer: A,C

NEW QUESTION # 98

To analyze and detect malware, Juniper ATP Cloud performs which two functions? (Choose two.)

- A. static analysis: to see what happens if you execute the file in a real environment
- B. dynamic analysis: to see what happens if you execute the file in a real environment
- C. antivirus scan: with a single vendor solution to see if the file contains any potential threats
- D. cache lookup: to see if the file is seen already and known to be malicious

Answer: B,D

NEW QUESTION # 99

What are three core components for enabling advanced policy-based routing? (Choose three.)

- A. APBR profile

- B. Policies
- C. Filter-based forwarding
- D. Routing options
- E. Routing instance

Answer: A,C,E

Explanation:

To enable Advanced Policy-Based Routing (APBR) on SRX Series devices, three key components are necessary: filter-based forwarding, routing instances, and APBR profiles. Filter-based forwarding is utilized to direct specific traffic flows to a routing instance based on criteria set by a policy. Routing instances allow the traffic to be managed independently of the main routing table, and APBR profiles define how and when traffic should be forwarded. These elements ensure that APBR is flexible and tailored to the network's requirements. Refer to Juniper's APBR Documentation for more details.

NEW QUESTION # 100

Exhibit:

Your company uses SRX Series devices to establish an IPsec VPN that connects Site-1 and the HQ networks. You want VoIP traffic to receive priority over data traffic when it is forwarded across the VPN.

Which three actions should you perform in this scenario? (Choose three.)

- A. Enable the multi-sa parameter to enable two separate IPsec SAs for the VoIP and data traffic.
- B. Configure CoS forwarding classes and scheduling parameters.
- C. Create a firewall filter that identifies VoIP traffic and associates it with the correct forwarding class.
- D. Enable the copy-outer-dscp parameter so that DSCP header values are copied to the tunneled packets.
- E. Enable next-hop tunnel binding.

Answer: A,B,C

NEW QUESTION # 101

What is a function of UTM?

- A. content filtering
- B. IPsec
- C. bridge mode
- D. AppFW

Answer: A

NEW QUESTION # 102

.....

If you choose our JN0-637 exam question for related learning and training, the system will automatically record your actions and analyze your learning effects. simulation tests of our JN0-637 learning materials have the functions of timing and mocking exams, which will allow you to adapt to the exam environment in advance and it will be of great benefit for subsequent exams. After you complete the learning task, the system of our JN0-637 Test Prep will generate statistical reports based on your performance so that you can identify your weaknesses and conduct targeted training and develop your own learning plan. For the complex part of our

JN0-637 exam question, you may be too cumbersome, but our system has explained and analyzed this according to the actual situation to eliminate your doubts and make you learn better.
