Quiz 2025 Latest MB-820 Exam Camp - Microsoft Dynamics 365 Business

Central Developer Realistic Cheap Dumps

In this cut-throat competitive world of Microsoft, the Microsoft MB-820 certification is the most desired one. But what creates an obstacle in the way of the aspirants of the Microsoft Dynamics 365 Business Central Developer (MB-820) certificate is their failure to find up-to-date, unique, and reliable Microsoft Dynamics 365 Business Central Developer (MB-820) practice material to succeed in passing the Microsoft MB-820 certification exam.

Microsoft Dynamics 365 Business Central Developer Sample Questions (Q75-Q80):

NEW QUESTION # 75

You create a procedure to check if a purchase order has lines.

The procedure returns false for purchase order PO-00001 even though it has purchase lines.

```
01 procedure CheckPurchaseLines(PurchaseHeader: Record "Purchase Header"): Boolean
02 var
03     PurchaseLine: Record "Purchase Line";
04 begin
05     PurchaseLine.SetRange("Document Type", PurchaseHeader."Document Type");
06     PurchaseLine.SetRange("No.", PurchaseHeader."No.");
07     exit(not PurchaseLine.IsEmpty());
08 end;
```

You need to fix the code to get the correct result.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE- Each correct selection is worth one point.

Debug AL code

Statement

Add Clear(PurchaseLine); as a line before line 01 of the code.

Add PurchaseLine.SetFilter("Line No." > 0) as a line after line 06.

Change the filter on line 06 from a "No." field to a "Document No." field.

Remove "not" in line 07.

Yes No

☐ ☐

☐ ☐

☐ ☐

☐ ☐

Answer:

Explanation:

Statement	Yes	No
Add Clear(PurchaseLine); as a line before line 01 of the code.	☐	☒
Add PurchaseLine.SetFilter("Line No." > 0) as a line after line 06.	☒	☐
Change the filter on line 06 from a "No." field to a "Document No." field.	☐	☒
Remove "not" in line 07.	☐	☒

NEW QUESTION # 76

You need to create the Install codeunit that is required in the extension used for installing or updating the Housekeeping app.

Which data type or declaration should you use? To answer, select the appropriate options in the answer area.

NOTE; Each correct selection is worth one point.

Data types or declarations for an Install codeunit

Requirement

Data type for information

Data type or declaration

ModuleDependencyInfo
ModuleInfo
SessionInformation

Start of the declaration of the method or procedure to perform the tasks

global procedure
local procedure
procedure

Answer:

Explanation:

Explanation:

For the Install codeunit required for the extension used for installing or updating the Housekeeping app, you should use the following data type and declaration:

* Data type for information: ModuleInfo

* Start of the declaration of the method or procedure to perform the tasks: local procedure In AL language, which is used for developing extensions in Business Central, an Install codeunit is a special type of codeunit that is used to handle installation or upgrade logic for an extension.

* ModuleInfo is a data type that contains information about the current extension, such as its version. It is typically used within the OnInstallAppPerCompany or OnUpgradePerCompany triggers of an Install codeunit to determine if the app is being installed for the first time or upgraded.

* A local procedure within an Install codeunit is a method that is only accessible within the codeunit itself. It is not visible to other objects or extensions. This is suitable for tasks that are internal to the installation process and should not be exposed globally. These selections align with the requirements of handling installation and update procedures in a controlled and encapsulated manner within Business Central extensions.

NEW QUESTION # 77

When sending data to a REST service, what method of the HttpClient class is typically used?

- A. PostAsync
- B. GetAsync
- C. PutAsync
- D. DeleteAsync

Answer: A

NEW QUESTION # 78

You need to provide the endpoint to the PMS provider for the RoomsAPI page.

How should you complete the API page endpoint? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point

Answer:

Explanation:

NEW QUESTION # 79

You are exporting data from Business Central.

You must export the data in a non-fixed length and width in CSV format.

You need to generate an XMLport to export the data in the required format. Which Format property value should you use?

- A. VariableText
- B. XML
- C. FixedText

Answer: A

Explanation:

When exporting data from Business Central and the requirement is for the data to be in a non-fixed length and width CSV format, the Format property of the XMLport should be set to VariableText (B). The VariableText format is designed for handling data exports where the fields are separated by a delimiter, such as a comma or tab, which is typical of CSV (Comma-Separated Values) files. This format allows for the flexibility needed when dealing with varying field lengths, as it does not enforce a fixed width for each field, making it ideal for CSV data exports. Setting the Format property to FixedText (C) would enforce a fixed width for each field, which is not suitable for CSV files, while the XML format (A) is used for exporting data in an XML structure, which is different from the CSV format requirements.

NEW QUESTION # 80

.....

As we all know, no pain, no gain. If you want to enter a better company, you must have the competitive force. MB-820 learning materials will offer you such opportunity to pass the exam and get the certificate successfully, so that you can improve your competitive force. Also, you need to spend certain time on practicing the MB-820 Exam Dumps, so that you can get the certificate at last. Besides, we pass guarantee and money back guarantee if you fail to pass the exam after buying MB-820 learning materials. We also offer you free update for one year, and the update version will be sent to your email automatically.
