

# Latest Microsoft AZ-140 Test Objectives & New AZ-140 Exam Price

DOWNLOAD the newest Exam4PDF AZ-140 PDF dumps from Cloud Storage for free: [https://drive.google.com/open?id=104AWs6k3Feegn6sSbelGmQ4wa\\_k7YUve](https://drive.google.com/open?id=104AWs6k3Feegn6sSbelGmQ4wa_k7YUve)

AZ-140 Learning Materials will be your best teacher who helps you to find the key and difficulty of the exam, so that you no longer feel confused when review. AZ-140 learning materials will be your best learning partner and will accompany you through every day of the review. It will help you to deal with all the difficulties you have encountered in the learning process and make you walk more easily and happily on the road of studying.

Applying the international recognition third party for payment for AZ-140 exam cram, and if you choose us, your money and account safety can be guaranteed. And the third party will protect the interests of you. In addition, AZ-140 learning materials are edited and verified by professional experts who possess the professional knowledge for the exam, and the quality can be guaranteed. We are pass guarantee and money back guarantee and if you fail to pass the exam, we will give you full refund. We provide free update for 365 days for AZ-140 Exam Materials for you, so that you can know the latest information for the exam, and the update version will be sent to your email automatically.

## New AZ-140 Exam Price - Test AZ-140 Price

The pages of our AZ-140 guide torrent provide the demo and you can understand part of our titles and the form of our software. On the pages of our AZ-140 exam torrent you can see the version of the product, the updated time, the quantity of the questions and answers, the characteristics and merits of the product, the price of the product and the discounts. The pages also list the details and the guarantee of our AZ-140 Exam Torrent, the methods to contact us, the evaluations of the past client on our product, the related exams and other information about our AZ-140 guide torrent. So before your purchase you can have an understanding of our product and then decide whether to buy our AZ-140 study questions or not.

## Microsoft Configuring and Operating Microsoft Azure Virtual Desktop Sample Questions (Q124-Q129):

### NEW QUESTION # 124

Your company has 60,000 users.

You plan to deploy Azure Virtual Desktop.

You need to recommend a storage solution for the FSLogix profile containers. The solution must provide the highest possible IOPS and the lowest latency desktop experience. What should you recommend?

- A. Azure Data Lake Storage
- B. Azure Files Standard
- C. Azure Blob storage Premium
- **D. Azure NetApp Files**

Explanation:  
Reference:  
<https://docs.microsoft.com/en-us/azure/virtual-desktop/store-fslogix-profile>

You need to evaluate the RDS deployment in the Seattle office. The solution must meet the technical requirements. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Answer:**

Record type: Microsoft

A
CNAME
SRV
TXT

Record value: https://rdweb.wvd.microsoft.com/api/arm/feeddiscovery

https://rdweb.wvd.microsoft.com/api/arm/feeddiscovery
https://rdweb.wvd.microsoft.com/api/feeddiscovery
https://rdweb.wvd.microsoft.com/Feed/webfeed.aspx
webfeeddiscovery.aspx

- Create a project in Azure Migrate.
- Register the Lakeside tool with Azure Migrate.
- Install agents on the virtual machines that have the Pool2 prefix.

### NEW QUESTION # 126

You have an Azure Virtual Desktop deployment.

You are configuring the outbound firewall settings for the host pool.

Which outbound URL and outbound port should you configure to ensure that the host machines maintain Windows activation? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Outbound URL: \*wd.microsoft.us  
\*eh.servicebus.windows.net  
gcs.prod.monitoring.core.windows.net  
kms.core.windows.net

Outbound port: 80  
389  
443  
1688

Answer:

Explanation:

Outbound URL: \*wd.microsoft.us  
\*eh.servicebus.windows.net  
gcs.prod.monitoring.core.windows.net  
kms.core.windows.net

Outbound port: 80  
389  
443  
1688

Explanation

Answer Area

Outbound URL: kms.core.windows.net

Outbound port: 1688

Reference:

### NEW QUESTION # 127

Case Study 1 - Contoso, Ltd

Overview

Contoso, Ltd. is a law firm that has a main office in Montreal and branch offices in Paris and Seattle. The Seattle branch office opened recently.

Contoso has an Azure subscription and uses Microsoft 365.

Existing Infrastructure. Active Directory

The network contains an on-premises Active Directory domain named contoso.com and an Azure Active Directory (Azure AD) tenant. One of the domain controllers runs as an Azure virtual machine and connects to a virtual network named VNET1. All internal name resolution is provided by DNS server that run on the domain controllers.

The on-premises Active Directory domain contains the organizational units (OUs) shown in the following table.

Name	Description
MontrealUsers	An OU for all the users in the Montreal office: The OU syncs to Azure AD by using Azure AD Connect.
ParisUsers	An OU for all the users in the Paris office: The OU syncs to Azure AD by using Azure AD Connect.
SeattleUsers	An OU for all the users in the Seattle office: The OU does <b>NOT</b> sync to Azure AD.

The on-premises Active Directory domain contains the users shown in the following table.

Name	Container	Member of
Operator1	Users	Domain Admins
Operator2	MontrealUsers	Users
Operator3	SeattleUsers	Server Operators

The Azure AD tenant contains the cloud-only users shown in the following table.

Name	Role
Admin1	Virtual Machine Contributor
Admin2	Desktop Virtualization Contributor
Admin3	Desktop Virtualization Session Host Operator
Admin4	Desktop Virtualization Host Pool Contributor

Existing Infrastructure. Network Infrastructure

All the Azure virtual networks are peered. The on-premises network connects to the virtual networks.

All servers run Windows Server 2019. All laptops and desktop computers run Windows 10 Enterprise.

Since users often work on confidential documents, all the users use their computer as a client for connecting to Remote Desktop Services (RDS).

In the West US Azure region, you have the storage accounts shown in the following table.

Name	Account kind	Performance
storage1	StorageV2	Standard
storage2	StorageV2	Premium
storage3	BlobStorage	Standard
storage4	StorageV1	Premium

Existing Infrastructure. Remote Desktop Infrastructure

Contoso has a Remote Desktop infrastructure shown in the following table.

Office	Description
Montreal	<p>A Windows Virtual Desktop deployment that runs Windows 10 Enterprise multi-session hosts. The deployment contains the following:</p> <ul style="list-style-type: none"> <li>• A host pool named Pool1</li> <li>• An application group named Group1</li> <li>• A workspace named Workspace1</li> <li>• Virtual machines that have a prefix of Pool1</li> </ul>
Seattle	An on-premises virtual machine-based RDS deployment that has personal desktops: The personal desktop virtual machines have a prefix of Pool2.
Paris	An on-premises virtual machine-based RDS deployment that has pooled desktops: The pooled desktop virtual machines have a prefix of Pool3. User profile disks are used to preserve the user state.

Requirements. Planned Changes

Contoso plans to implement the following changes:

- Implement FSLogix profile containers for the Paris offices.

- Deploy a Azure Virtual Desktop host pool named Pool4.
- Migrate the RDS deployment in the Seattle office to Azure Virtual Desktop in the West US Azure region.

Requirements. Pool4 Configuration

Pool4 will have the following settings:

- Host pool type: Pooled
- Max session limit: 7
- Load balancing algorithm: Depth-first
- Images: Windows 10 Enterprise multi-session
- Virtual machine size: Standard D2s v3
- Name prefix: Pool4
- Number of VMs: 5
- Virtual network: VNET4

Requirements. Technical Requirements

Contoso identifies the following technical requirements:

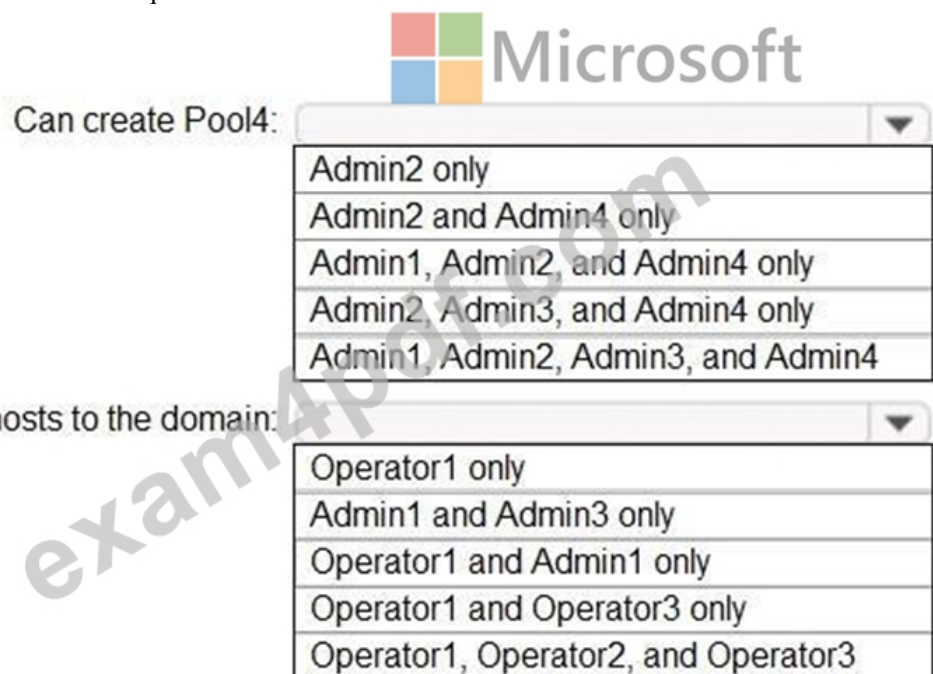

- Before migrating the RDS deployment in the Seattle office, obtain the recommended deployment configuration based on the current RDS utilization.
- For the Azure Virtual Desktop deployment in the Montreal office, disable audio output in the device redirection settings.
- For the Azure Virtual Desktop deployment in the Seattle office, store the FSLogix profile containers in Azure Storage.
- Enable Operator2 to modify the RDP Properties of the Azure Virtual Desktop deployment in the Montreal office.
- From a server named Server1, convert the user profile clicks to the FSLogix profile containers.
- Ensure that the Pool1 virtual machines only run during business hours.
- Use the principle of least privilege.

Hotspot Question

Which users can create Pool4, and which users can join session hosts to the domain? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

## Answer Area

The screenshot shows the Microsoft logo at the top. Below it, there are two dropdown menus. The first menu is labeled "Can create Pool4:" and has a dropdown arrow. The second menu is labeled "Can join session hosts to the domain:" and also has a dropdown arrow. Both menus are open, showing a list of user groups. A large "exam4pat.com" watermark is visible across the center of the image.

Can create Pool4:
Admin2 only
Admin2 and Admin4 only
Admin1, Admin2, and Admin4 only
Admin2, Admin3, and Admin4 only
Admin1, Admin2, Admin3, and Admin4

Can join session hosts to the domain:
Operator1 only
Admin1 and Admin3 only
Operator1 and Admin1 only
Operator1 and Operator3 only
Operator1, Operator2, and Operator3

**Answer:**

Explanation:

## Answer Area

Can create Pool4:

Admin2 only  
Admin2 and Admin4 only  
Admin1, Admin2, and Admin4 only  
Admin2, Admin3, and Admin4 only  
Admin1, Admin2, Admin3, and Admin4

Can join session hosts to the domain:

Operator1 only  
Admin1 and Admin3 only  
Operator1 and Admin1 only  
Operator1 and Operator3 only  
Operator1, Operator2, and Operator3

Explanation:

The Host Pool Contributor role lets you manage all aspects of host pools, including access to resources. You'll need an extra contributor role, Virtual Machine Contributor, to create virtual machines. You will need AppGroup and Workspace contributor roles to create host pool using the portal or you can use Desktop Virtualization Contributor role. The Host Pool Contributor role lets you manage all aspects of host pools, including access to resources. You'll need an extra contributor role, Virtual Machine Contributor, to create virtual machines. You will need AppGroup and Workspace contributor roles to create host pool using the portal or you can use Desktop Virtualization Contributor role.

## NEW QUESTION # 128

You need to configure a conditional access policy to meet the authentication requirements.

What should you include in the policy configuration? To answer, select the appropriate options in the answer area.

NOTE Each correct selection is worth one point.

Answer Area

Set Cloud apps or actions to include:

- Azure Virtual Desktop
- Azure Virtual Desktop Azure Resource Manager Provider
- Azure Virtual Desktop Client

Set Session controls to include:

- Persistent browser session
- Sign-in frequency
- Use app enforced restrictions

Answer:

Explanation:

Answer Area

Set Cloud apps or actions to include:

- Azure Virtual Desktop
- Azure Virtual Desktop Azure Resource Manager Provider
- Azure Virtual Desktop Client

Set Session controls to include:

- Persistent browser session
- Sign-in frequency
