NEW QUESTION # 333

Drag and Drop Question

Match the Azure services to the correct descriptions.

Instructions: To answer, drag the appropriate Azure service from the column on the left to its description on the right. Each service may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point

| Azure Services | Answer Area | Microsoft |
|-------------------------|-------------|------------------------------------------------------------------------|
| Azure Machine Learning | | Provides a cloud-based Enterprise Data Warehouse (EDW). |
| Azure Synapse Analytics | | Uses past trainings to provide predictions that have high probability. |
| Azure IoT Hub | | Provides serverless computing functionalities. |
| Azure Functions | | Processes data from millions of sensors. |

Answer:

Explanation:

| Azure Services | Answer Area | Microsoft |
|----------------|-------------------------|------------------------------------------------------------------------|
| | Azure Synapse Analytics | Provides a cloud-based Enterprise Data Warehouse (EDW). |
| | Azure Machine Learning | Uses past trainings to provide predictions that have high probability. |
| | Azure Functions | Provides serverless computing functionalities. |
| | Azure IoT Hub | Processes data from millions of sensors. |

Explanation:

Box 1: Azure SQL Synapse Analytics

Azure SQL Synapse Analytics (previously called Data Warehouse) is a cloud-based Platform-as-a-Service (PaaS) offering from Microsoft. It is a large-scale, distributed, MPP (massively parallel processing) relational database technology in the same class of competitors as Amazon Redshift or Snowflake. Azure SQL Synapse Analytics is an important component of the Modern Data Warehouse multi-platform architecture. Because Azure SQL Synapse Analytics is an MPP system with a shared-nothing architecture across distributions, it is meant for large-scale analytical workloads which can take advantage of parallelism.

Box 2:

Azure Machine Learning uses past trainings to provide predictions that have high probability.

Machine learning is a data science technique that allows computers to use existing data to forecast future behaviors, outcomes, and trends. By using machine learning, computers learn without being explicitly programmed.

Forecasts or predictions from machine learning can make apps and devices smarter. For example, when you shop online, machine learning helps recommend other products you might want based on what you've bought.

Box 3:

Azure Functions provides serverless computing functionalities.

Azure Functions is a serverless compute service that lets you run event-triggered code without having to explicitly provision or manage infrastructure.

Box 4:

IoT Hub (Internet of things Hub) provides data from millions of sensors.

IoT Hub is a managed service, hosted in the cloud, that acts as a central message hub for bi-directional communication between your IoT application and the devices it manages. You can use Azure IoT Hub to build IoT solutions with reliable and secure communications between millions of IoT devices and a cloud-hosted solution backend. You can connect virtually any device to IoT Hub.

NEW QUESTION # 334

Match the Azure service to the correct definition.

Instructions: To answer, drag the appropriate Azure service from the column on the left to its description on the right. Each service may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

| Answer Options | Answer Area |
|----------------------------|--------------------------------------------------------------------------------------------------------|
| Azure Advisor | <input type="text"/> An integrated solution for the deployment of code |
| Azure Cognitive Services | <input type="text"/> A tool that provides guidance and recommendations to improve an Azure environment |
| Azure Application Insights | <input type="text"/> A simplified tool to build intelligent Artificial Intelligence (AI) applications |
| Azure DevOps | <input type="text"/> Monitors web applications |

Answer:

Explanation:

| Answer Options | Answer Area |
|----------------------------|-----------------------------------------------------------------------------------|
| Azure DevOps | An integrated solution for the deployment of code |
| Azure Advisor | A tool that provides guidance and recommendations to improve an Azure environment |
| Azure Cognitive Services | A simplified tool to build intelligent Artificial Intelligence (AI) applications |
| Azure Application Insights | Monitors web applications |

NEW QUESTION # 335

.....

For candidates who will attend the exam, choose the right AZ-900 exam torrent is important. We offer you the AZ-900 exam dumps to help you pass the exam. With the skilled experts to compile the exam dumps, the AZ-900 study materials of us contain the questions and answers, and you can get enough practicing by using them. Besides, the AZ-900 Soft test engine stimulates the real exam environment, and you can know what the real exam is like by using this version.
