

Latest Microsoft MB-500 Exam Simulator & Testing MB-500 Center

BONUS!!! Download part of ExamsLabs MB-500 dumps for free: <https://drive.google.com/open?id=1CeMSPvDe8tCfwhGD5fAEV8XwWKTsShSN>

We take the rights of the consumer into consideration. So as a company that aimed at the exam candidates of MB-500 study guide, we offer not only free demos, Give three versions of our MB-500 exam questions for your option, but offer customer services 24/7. Even if you fail the MB-500 Exams, the customer will be reimbursed for any loss or damage after buying our MB-500 training materials. Besides, you can enjoy free updates for one year as long as you buy our exam dumps.

The MB-500 certification exam covers a wide range of topics, including Dynamics 365 architecture, development tools, application life cycle management, and integration with other Microsoft solutions. MB-500 exam consists of multiple-choice questions and simulations, which test the candidate's ability to solve real-world problems. MB-500 Exam is designed to be challenging, and candidates are required to have a deep understanding of the Dynamics 365 platform.

Testing MB-500 Center - MB-500 Reliable Test Online

As you can see on our website, there are versions of the PDF, Software and APP online. PDF version of our MB-500 study materials- it is legible to read and remember, and support customers' printing request. Software version of our MB-500 exam questions-It support simulation test system and times of setup has no restriction. Remember this version support Windows system users only. App online version of MB-500 Practice Engine -Be suitable to all kinds of equipment or digital devices.

To pass MB-500 exam, candidates must have experience developing solutions for Microsoft Dynamics 365 Finance and Operations. They should also have a good understanding of programming concepts and be familiar with Microsoft Visual Studio and Azure DevOps. Additionally, candidates should be able to write code, debug, and troubleshoot issues, as well as have a solid understanding of security and performance optimization. Upon passing the MB-500 Exam, candidates will have the skills and knowledge required to design and develop modern, cloud-based applications that integrate with Microsoft Dynamics 365 Finance and Operations.

Microsoft Dynamics 365: Finance and Operations Apps Developer Sample Questions (Q21-Q26):

NEW QUESTION # 21

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You must create a new attribute class in which to mark other classes in the ISV solution and their respective methods with the error levels Warning and Error. You have the following class: the numbers are included for reference only.)

```
01
02 public class Vehicle
03 {
04
05     public int bike()
06     {
07     }
08     public int automobile()
09     {
10     }
11     public int bicycle()
12     {
13     }
14 }
```

You need to ensure that the compiler will report an error if code calls the bike method.

Solution:

Create the following attribute class:

```
public class ISVObsoleteAttribute extends SysAttribute
{
    ErrorWarning errorWarningEnum;
    str explanation;
    public void new(ErrorWarning _errorWarningEnum, str _explanation)
    {
        super();
        errorWarningEnum = _errorWarningEnum;
        explanation = _explanation;
    }
}
```

Insert the following code at line 04:

```
{ObsoleteAttribute("Deprecated. Please use Bicycle class instead.", false)}
```

Does The solution meet the goal?

- A. No
- B. Yes

Answer: A

NEW QUESTION # 22

You are a Dynamics 365 Finance and Operations developer.

You have a report in an existing model that connects with the following objects:

- * in-memory table
- * data provider class
- * controller class
- * contract class

The report is locked for modifications.

You need to create an extension of the in-memory table in a model and you add the new field to the extension.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Create a duplicate from the report in the model and add the new field on the report design.	
Create an extension of the existing report controller class in the model. Update the class logic to point to the new report.	
Create a duplicate from the existing data provider class in the model. Update the class to fill the value of the newly added field.	
Create a duplicate from the existing report controller class in the model. Update the class logic to point to the new report.	
Create an extension of the existing data provider class in the model. Update the class to fill the value of the newly added field.	

Answer:

Explanation:

Actions	Answer Area
Create a duplicate from the report in the model and add the new field on the report design.	Create a duplicate from the report in the model and add the new field on the report design.
Create an extension of the existing report controller class in the model. Update the class logic to point to the new report.	Create a duplicate from the existing data provider class in the model. Update the class to fill the value of the newly added field.
Create a duplicate from the existing data provider class in the model. Update the class to fill the value of the newly added field.	Create an extension of the existing report controller class in the model. Update the class logic to point to the new report.
Create a duplicate from the existing report controller class in the model. Update the class logic to point to the new report.	
Create an extension of the existing data provider class in the model. Update the class to fill the value of the newly added field.	

Explanation:

Create a duplicate from the report in the model and add the new field on the report design.
Create an extension of the existing data provider class in the model. Update the class to fill the value of the newly added field.
Create an extension of the existing report controller class in the model. Update the class logic to point to the new report.

NEW QUESTION # 23

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an enumeration named truckStatus that has the following statuses:

Empty

Loaded

Completed

You have the following code:

```
switch (truckTable.TruckStatus)
{
    case TruckStatus::Empty:
        Info("1");
        break;
    case TruckStatus::Loaded:
        Info("2");
        break;
    case TruckStatus::Completed:
        Info("3");
        break;
}
```

You need to extend this enumeration and add the following statuses to the enumeration: Quarantine, InTransit. You must then modify code that validates the switch statement.

Solution: Add a post handler to the method that checks the enumeration and logic for your new enumeration values using a range comparison for your new values.

```
if (truckTable.TruckStatus > TruckStatus::Completed)
{
    Info("Extended");
}
```

Does the solution meet the goal?

- A. No
- B. Yes

Answer: A

NEW QUESTION # 24

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are adding a new field to the SalesTable form.

You must use an extension to add a status field onto the form.

You need to create the extension in the Application Object Tree (AOT) and add the extension to the demoExtensions model.

Solution: Navigate to the user interface forms section for the SalesTable form and create an extension.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

You can customize model elements by creating extensions.

In Dynamics 365 Finance and Operations, the new fields will need to be added via a table extension. Create the extensions on the SalesTable.

Reference:

<https://stoneridgesoftware.com/how-to-extend-sales-order-update-functionality-to-custom-fields-in-d365-finance-and-operations/>

NEW QUESTION # 25

A company uses Dynamics 365 Finance. You implement an abstract class named Car. The Car class has the following:

- * A real member called weight that is used to store the weight of the car.
 - * An abstract getWeight method that returns the value of the weight member.
- The Car class code is:

```
public abstract class Car
{
    real weight;
    public abstract real getWeight()
    {
    }
}
```

You must create a child class named BigCar.

You need to implement the Car class by using the BigCar child class.

Which code segment should you use?

• A.

```
class BigCar : Car { void new(real _weight) { weight = _weight; } public real getWeight() {
    return weight; } }
```

• B.

```
class BigCar implements Car { void new(real _weight) { weight = _weight; } public real
getWeight() { return weight; } }
```

• C.

```
class BigCar extends Car { void new(real _weight) { weight = _weight; } public real getWeight()
{ return weight; } }
```

• D.

```
class BigCar extends Car { public real getWeight() { return weight; } }
```

Answer: A
