NEW QUESTION # 100

A customer has been having problems with SMS responses getting the default keyword response rather than the appropriate next keyword response.

What are two potential reasons for this unexpected response?

- A. Responses are not sent within 24 hours of the outbound message.
- B. Response are not sent with the Conversation Window.
- C. Next keyword was not specified on the outbound message.
- D. Response contained "stop" in the message content.

Answer: B,C

Explanation:

Two potential reasons for SMS responses getting the default keyword response rather than the appropriate next keyword response are:

Responses are not sent within the Conversation Window. The Conversation Window is a setting that defines how long

MobileConnect waits for a response from a subscriber after sending an outbound message. If a subscriber responds after the Conversation Window expires, MobileConnect treats their response as a new inbound message rather than part of an ongoing conversation.

Next keyword was not specified on the outbound message. The Next Keyword is a setting that defines what keyword MobileConnect expects from a subscriber after sending an outbound message. If a subscriber responds with a different keyword than what MobileConnect expects, MobileConnect treats their response as a new inbound message rather than part of an ongoing conversation.

Responses containing "stop" in the message content will not get the default keyword response, but rather an opt-out confirmation message. Responses sent with AMPscript in body will not affect how MobileConnect handles responses, as AMPscript is only evaluated at send time.
