So, that users get awareness of their Nutanix Certified Associate v6.10 (NCA-6.10) preparation status and remove their mistakes.

Nutanix Certified Associate v6.10 Sample Questions (Q47-Q52):

NEW QUESTION # 47

An administrator receives the alert:
What is the most likely cause?

- A. Another node in this cluster is already in maintenance mode.
- B. Other nodes in the cluster may not have enough resource available.
- C. This node in the cluster is already in maintenance mode.
- D. This node in the cluster may not have enough resources available.

Answer: A

NEW QUESTION # 48

In Prism Element, to which object are policies such as replication factor and storage efficiency settings applied?

- A. Virtual Machine
- B. vBlock
- C. Storage Pool
- **D. Container**

Answer: D

Explanation:

In Prism Element, policies such as replication factor and storage efficiency settings are applied to Containers. A container is a logical grouping of one or more storage pools and defines the storage resources available to virtual machines. By applying policies to a container, you can set the replication factor, storage efficiency settings, and other storage-related settings for all of the virtual machines that are associated with that container. This is a fundamental concept in Nutanix Platform.

NEW QUESTION # 49

Which feature should be enabled to prevent password access to the CVM for both the nutanix and admin user accounts?

- A. STIG
- B. RBAC Policy on PC
- **C. Cluster lockdown**
- D. Data-at-Rest Encryption

Answer: C

Explanation:

To prevent password access to the CVM for both the nutanix and admin user accounts, Cluster Lockdown should be enabled. Cluster Lockdown restricts SSH access to the Controller VM (CVM), effectively disabling password-based logins for enhanced security. Access is then managed through more secure means, such as console access or specific tools like Nutanix Support.

* A. Cluster Lockdown: Correct, as this prevents SSH-based access to the CVM.

* B. STIG: Incorrect, as STIG (Security Technical Implementation Guide) focuses on broader compliance measures.

* C. RBAC Policy on PC: Incorrect, as RBAC (Role-Based Access Control) controls Prism Central permissions, not CVM access.

* D. Data-at-Rest Encryption: Incorrect, as this secures stored data, not access credentials.

NEW QUESTION # 50

An administrator receives the alert:

What is the most likely cause?

- A. Another node in this cluster is already in maintenance mode.
- B. This node in the cluster is already in maintenance mode.
- C. This node in the cluster may not have enough resources available.
- **D. Other nodes in the cluster may not have enough resource available.**

Answer: D

Explanation:

When a Nutanix cluster alert occurs, indicating maintenance mode issues, the most likely cause is that another node in the cluster is already in maintenance mode. Nutanix clusters enforce restrictions to prevent more than one node from entering maintenance mode simultaneously. This ensures the cluster can maintain resiliency and availability, adhering to the redundancy factor (RF) policy. If another node is already in maintenance mode, the cluster cannot afford to have additional nodes enter maintenance without compromising data and service availability.

NEW QUESTION # 51

An administrator needs to automate the migration of a VM from ESXi to AHV.
Which utility should the administrator use?

- A. Move
- B. Ncli
- **C. Flow**
- D. acli

Answer: C

NEW QUESTION # 52

.....

For your convenience, TrainingDump has prepared Nutanix Certified Associate v6.10 exam study material based on a real exam syllabus to help candidates go through their exams. Candidates who are preparing for the NCA-6.10 Exam suffer greatly in their search for preparation material. You would not need anything else if you prepare for the exam with our NCA-6.10 Exam Questions.
