100% Pass Infoblox - NIOS-DDI-Expert –Reliable Latest Braindumps Free

About Infoblox NIOS-DDI-Expert Exam, each candidate is very confused. Everyone has their own different ideas. But the same idea is that this is a very difficult exam. We are all aware of Infoblox NIOS-DDI-Expert exam is a difficult exam. But as long as we believe itPass4sure, this will not be a problem. itPass4sure's Infoblox NIOS-DDI-Expert exam training materials is an essential product for each candidate. It is tailor-made for the candidates who will participate in the exam. You will absolutely pass the exam. If you do not believe, then take a look into the website of itPass4sure. You will be surprised, because its daily purchase rate is the highest. Do not miss it, and add to your shoppingcart quickly.

Infoblox Qualified NIOS DDI Expert - INE Sample Questions (Q24-Q29):

NEW QUESTION # 24

The Grid is comprised of all single members. Which member will upgrade first?

- A. The Reporting server upgrades first
- B. The Grid Master upgrades first
- C. You can choose which member upgrades first
- D. The Grid Master Candidate upgrades first

Answer: C

Explanation:

Comprehensive and Detailed In-Depth Explanation:Upgrading a Grid of single members (no HA pairs):

- * A:Admins define Upgrade Groups or schedules (Grid > Upgrade), choosing the order (e.g, "Member1 first"). Correct.
- * B:GM typically upgrades last by default to maintain control, but this can be overridden. Incorrect.
- * C:Reporting server (if present) has no priority-user-defined. Incorrect.

* D:GMC upgrades only if promoted, not inherently first. Incorrect.

* Practical Example:In an INE lab, schedule Member2 first, test upgrade, and troubleshoot sequence issues.References:Infoblox NIOS Administrator Guide - Upgrade Scheduling; INE Course Content: NIOS DDI Grid Deployment.

NEW QUESTION # 25

An Infoblox Grid is using remote authentication for a group named Infoblox-Admins. Where are the permissions for the accounts in Infoblox-Admins defined?

- **A. Group permissions on the Grid**
- B. Individual user accounts on the Grid
- C. Individual user accounts on the external server
- D. Group definitions on the external server

Answer: A

Explanation:

Comprehensive and Detailed In-Depth Explanation:When NIOS uses remote authentication (e.g., RADIUS, LDAP, or Active Directory), user authentication is handled by the external server, but permissions are defined within the NIOS Grid. For a group like "Infoblox-Admins," the external server verifies user credentials and group membership, but the Grid Manager assigns permissions (e.g., read/write access to DNS zones) to the group itself. This centralizes access control within NIOS, ensuring consistency across the Grid.

Options A and B are incorrect because the external server manages authentication, not NIOS-specific permissions. Option D is wrong as permissions are group-based, not individually assigned on the Grid. The INE course covers Grid administration, including authentication setup.References:Infoblox NIOS Administrator Guide - Authentication; INE Course Objective: NIOS DDI Grid Deployment.

NEW QUESTION # 26

Which types of Zone are available for Add Zone? (Select all that apply.)

- **A. Primary Zone**
- **B. Forward Zone**
- **C. Delegation**
- **D. Authoritative Zone**

Answer: A,B,C,D

Explanation:

Comprehensive and Detailed In-Depth Explanation:In NIOS Grid Manager (Data Management > DNS > Add Zone), administrators can create various zone types to manage DNS resolution. All listed options are valid:

* A (Authoritative Zone):A zone where the Infoblox appliance is the authoritative source for DNS records (e.g., example.com with A, MX records). Correct.

* B (Forward Zone):A zone configured to forward queries to external DNS servers (e.g., forwarding "internal.com" to a corporate DNS). Correct.

* C (Primary Zone):Often synonymous with Authoritative Zone in Infoblox, it's a master zone hosting original DNS data (distinct from secondary zones). Correct.

* D (Delegation):A zone delegated to another name server (e.g., "sub.example.com" delegated to different NS records). Correct.

* Clarification:In NIOS, "Authoritative" and "Primary" are sometimes used interchangeably, but both are options in the Add Zone wizard, alongside Forward and Delegation zones.

* Practical Example:In an INE lab, you might add an Authoritative Zone for "lab.com," a Forward Zone for external lookups, and a Delegation for a subdomain, testing DNS troubleshooting across these types.

References:Infoblox NIOS Administrator Guide - DNS Zone Management; INE Course Content: NIOS DDI DNS Troubleshooting

NEW QUESTION # 27

When would you set a "Default Value" for an EA in NIOS?

- A. When you want to assign a predefined value for the EA
- B. When you want to specify the allowable range for the EA
- C. When the EA represents a numeric value with a specific range
- D. When the EA is intended to be unique for each object and not set to any default

Answer: A

Explanation:

Comprehensive and Detailed In-Depth Explanation: Extensible Attributes (EAs) enhance NIOS object metadata, and the "Default Value" option sets a predefined value automatically applied when the EA is assigned to an object (unless overridden).

* Purpose: It simplifies configuration by pre-populating common values, reducing manual entry.

* Scenario: For an EA like "Department," setting a default value of "IT" ensures new networks inherit this unless specified otherwise (e.g., "HR").

* Options:

* A: Allowable ranges (e.g., 1-100) are set via EA type (Integer) and constraints, not default values.

Incorrect.

* B: Numeric values with ranges relate to validation, not defaults. Incorrect.

* C: Assigning a predefined value (e.g., "Enabled" for "Status") is the exact use case for defaults.

Correct.

* D: Unique values per object contradict defaults, which apply uniformly unless changed. Incorrect.

* Practical Example: In an INE Grid deployment lab, you'd set a default EA "Region: US" for new members, streamlining setup and troubleshooting consistency. References: Infoblox NIOS Administrator Guide - Extensible Attributes; INE Course Objective: NIOS DDI Grid Deployment.

NEW QUESTION # 28

You are asked to provide a support bundle while on the phone with Infoblox Technical Support. What can you do to get one?

- A. Retrieve it from the GM interface by navigating to Grid Manager and downloading from the toolbar
- B. Use the CLI command "set support_bundle" to get it
- C. Infoblox Technical Support must generate it
- D. Create a database backup and extract the support bundle from it

Answer: B

Explanation:

Comprehensive and Detailed In-Depth Explanation: Generating a support bundle for diagnostics:

* B: CLI command set support bundle (space, not underscore) generates and downloads a bundle (.tar.gz) with logs, configs, etc.

Correct with typo adjustment.

* A: Backup is separate (Grid > Backup)-no bundle extraction. Incorrect.

* C: GUI offers download (Grid > Grid Manager > Toolbar > Download Support Bundle), but question specifies action-CLI fits phone context. Partially correct but not best.

* D: Support assists but doesn't generate-user action required. Incorrect.

* Practical Example: In an INE lab, run set support bundle, transfer it via SCP, and troubleshoot with support. References: Infoblox NIOS CLI Reference Guide - Support Bundle; INE Course Content:

NIOS DDI Grid Troubleshooting.

NEW QUESTION # 29

.....

What is the selling point of a product? It is the core competitiveness of this product that is ahead of other similar brands. The core competitiveness of the NIOS-DDI-Expert exam practice questions, as users can see, we have a strong team of experts, the NIOS-DDI-Expert study dumps are advancing with the times, updated in real time, so that's why we can with such a large share in the market. Through user feedback recommendations, we've come to the conclusion that the NIOS-DDI-Expert learning guide has a small problem at present, in the rest of the company development plan, we will continue to strengthen our service awareness, let users more satisfied with our NIOS-DDI-Expert study dumps, we hope to keep long-term with customers, rather than a short high sale.
