Nutanix Certified Services Core Infrastructure Professional Sample Questions (Q40-Q45):

NEW QUESTION # 40

A customer is running out of storage in an ESXi cluster. The customer wants to add storage without paying for an additional hypervisor license.

Which option should the consultant recommend to meet the requirement?

- **A. Convert the cluster to AHV to support storage-only node requirements.**
- B. Edit the factory_config.json file to configure the node as storage-only and then expand the cluster in Prism
- C. Buy a new node to meet the requirements of the storage-only node specifications.
- D. Select the storage-only checkbox during Foundation and then expand the cluster in Prism.

Answer: A

Explanation:

When a customer needs to add storage to an ESXi cluster without incurring additional hypervisor licensing costs, converting the cluster to Nutanix AHV presents a viable solution. AHV allows the incorporation of storage-only nodes, which can extend the cluster's storage capacity without necessitating additional licenses for hypervisor usage.
