And the high pass rate of OGEA-101 learning material as 99% to 100% won't let you down.

### The Open Group TOGAF Enterprise Architecture Part 1 Exam Sample Questions (Q74-Q79):

#### NEW QUESTION # 74

What should be put in place through organization structures, roles, responsibilities, skills and processes to carry out architectural activity effectively?

- A. An Enterprise Architecture
- B. An EA repository
- C. An EA Capability
- D. An EA framework

**Answer: C**

Explanation:

An EA Capability is the ability of an organization to perform enterprise architecture effectively and efficiently. It involves establishing and maintaining the appropriate organization structures, roles, responsibilities, skills, processes, tools, and governance mechanisms to support the development and use of enterprise architecture. An EA Capability enables the organization to align its business and IT strategies, deliver value from its investments, manage change and complexity, and improve its performance and agility<sup>12</sup> References: 1: The TOGAF Standard, Version 9.2, Part VI: Architecture Capability Framework, Chapter 44: Introduction 2: The TOGAF Standard, Version 9.2, Part VI: Architecture Capability Framework, Chapter 45: Establishing and Maintaining an Enterprise Architecture Capability

#### NEW QUESTION # 75

Complete the sentence A business scenario describes \_\_\_\_\_

- A. general rules and guidelines for the architecture being developed
- B. business and technology environment in which those problems occur
- C. business domain gaps such as cross-training requirements
- D. shortfalls between the Baseline and Target Architectures

**Answer: B**

Explanation:

A business scenario describes business and technology environment in which those problems occur. It provides a realistic context for identifying and addressing business problems and opportunities, as well as their impact on the enterprise's architecture. Reference: The TOGAF Standard | The Open Group Website, Section 3.3.1 Business Scenarios.

business and technology environment in which those problems occur [https://pubs.opengroup.org/togaf-standard/business-architecture/business-scenarios.html#\\_Toc68617078](https://pubs.opengroup.org/togaf-standard/business-architecture/business-scenarios.html#_Toc68617078) "A Business Scenario is a uniform description of: - Real business problems - The business and technology environment in which those problems occur - Value streams enabled by capabilities - The desired outcome(s) of proper execution - The human and computing components (the "actors") who provide the capabilities"

#### NEW QUESTION # 76

Consider the following statements.

1. All processes, decision-making, and mechanisms used will be established so as to minimize or avoid potential conflicts of interest.

2. More effective strategic decision-making will be made by C-Level executives and business leaders.
  3. All actions implemented and their decision support will be available for inspection by authorized organization and provider parties.
  4. Digital Transformation and operations will be more effective and efficient.
- Which statements highlight the value and necessity for Architecture Governance to be adopted within organizations?

- A. 2 & 3
- B. 2 & 4
- **C. 1 & 3**
- D. 1 & 4

**Answer: C**

Explanation:

Statements 1 and 3 highlight the value and necessity for Architecture Governance to be adopted within organizations. Architecture Governance is the practice and orientation by which Enterprise Architectures and other architectures are managed and controlled at an enterprise-wide level<sup>1</sup>. It ensures that architectural decisions are aligned with the organization's strategy, objectives, and standards. Architecture Governance also involves establishing and maintaining processes, decision-making, and mechanisms to avoid or minimize potential conflicts of interest, such as between different stakeholders, business units, or projects<sup>3,4</sup>. Moreover, Architecture Governance requires transparency and accountability for all actions implemented and their decision support, so that they can be inspected and evaluated by authorized parties, such as auditors, regulators, or customers<sup>5</sup>. Reference:

- \* The TOGAF Standard, Version 9.2 - Architecture Governance - The Open Group
- \* Architecture Governance - The Open Group
- \* Tutorial: Governance in TOGAF's Architecture Development Method (ADM)
- \* Architecture Governance in TOGAF: Ensuring Effective Management and Compliance
- \* The TOGAF Standard, Version 9.2 - Definitions - The Open Group
- \* [Architecture Governance in TOGAF: Ensuring Alignment and Control]

#### NEW QUESTION # 77

Which of the following describes the practice by which the enterprise architecture is managed and controlled at an enterprise-wide level?

- A. IT governance
- B. Corporate governance
- **C. Architecture governance**
- D. Technology governance

**Answer: C**

Explanation:

According to the TOGAF Standard, 10th Edition, architecture governance is "the practice by which enterprise architectures and other architectures are managed and controlled at an enterprise-wide level"<sup>1</sup>. Architecture governance ensures that the architecture development and implementation are aligned with the strategic objectives, principles, standards, and requirements of the enterprise, and that they deliver the expected value and outcomes. Architecture governance also involves establishing and maintaining the architecture framework, repository, board, contracts, and compliance reviews<sup>1</sup>. The other options are not correct, as they are not the term used by the TOGAF Standard to describe the practice by which the enterprise architecture is managed and controlled at an enterprise-wide level. Corporate governance is "the system by which an organization is directed and controlled"<sup>2</sup>, and it covers aspects such as leadership, strategy, performance, accountability, and ethics. IT governance is "the system by which the current and future use of IT is directed and controlled"<sup>2</sup>, and it covers aspects such as IT strategy, policies, standards, and services. Technology governance is "the system by which the technology decisions and investments are directed and controlled"<sup>3</sup>, and it covers aspects such as technology selection, acquisition, deployment, and maintenance. #### NEW QUESTION # 78

Which of the following best summarizes the purpose of Enterprise Architecture?

- A. Controlling the bigger changes.

- B. Guiding effective change.
- C. Taking major improvement decisions.
- D. Governing the Stakeholders.

**Answer: B**

Explanation:

EA applies architecture principles and practices to analyze, design, plan, and implement enterprise analysis that supports digital transformation, IT growth, and the modernization of IT2. EA also helps organizations improve the efficiency, timeliness, and reliability of business information, as well as the alignment, agility, and adaptability of the architecture to the changing needs and requirements3. Therefore, the best summary of the purpose of EA is to guide effective change.
