## Free PDF Quiz Oracle - Valid Latest 1z0-1057-25 Exam Dumps

Our product provides the demo thus you can have a full understanding of our 1z0-1057-25 prep torrent. You can visit the pages of the product and then know the version of the product, the characteristics and merits of the 1z0-1057-25 test braindumps, the price of the product and the discount. There are also the introduction of the details and the guarantee of our 1z0-1057-25 prep torrent for you to read. You can also know how to contact us and what other client's evaluations about our 1z0-1057-25 test braindumps. You will pass the 1z0-1057-25 exam as our 1z0-1057-25 study guide has a pass rate of 99% to 100%.

## Oracle Project Management Cloud 2025 Implementation Professional Sample Questions (Q121-Q126):

### NEW QUESTION # 121

Shift is one of the key elements in defining project and resource calendars.

Which two additional key elements are required to define the project and resource calendars? (Choose two.)

- A. Expenditure Type
- B. Accounting Calendar
- C. Schedule Exceptions
- D. Time off
- E. Workday Patterns

**Answer: C,E**

Explanation:

Shift is one of the key elements in defining project and resource calendars. Two additional key elements that are required to define the project and resource calendars are:

\* Schedule Exceptions: These are dates or periods that override the regular workday patterns and shifts of a calendar. They can be used to define holidays, vacations, or other special events that affect the availability of resources or projects.

\* Workday Patterns: These are patterns of working and nonworking days that repeat over a period of time. They can be used to define the standard working days and hours for a calendar. Time off, expenditure type, and accounting calendar are not key elements in defining project and resource calendars. Time off is an attribute of a resource assignment that reduces the availability of a resource.

Expenditure type is a classification of costs that determines how they are processed and accounted.

Accounting calendar is a calendar that defines the accounting periods and dates for transactions.

### NEW QUESTION # 122

Your administrator creates maintenance conditions on the Maintain Project Enterprise Labor Resources page.

An HCM person is included in a condition with a process order value of 1 and, additionally, there are three other conditions, all with a process order value of 10. Identify two correct statements about the Maintain Project Enterprise Labor Resources process as it relates to process order values. (Choose two.)

- A. The process creates a resource by using the condition with a process order value of 1 but does not create more than one resource for the same person even if subsequent conditions apply to the person.
- B. The process creates a resource by using the conditions with a process order value of 10 but does not create more than one resource for the same person even if subsequent conditions apply to the person.
- C. For the three conditions that have the same process order value of 10, the records are processed in ascending numeric order based on the condition name.
- D. For the three conditions that have the same process order value of 10, the records are processed in ascending alphabetic order based on the condition name.

**Answer: A,D**

Explanation:

Reference: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19a/oapex/define-project-resource-management-configuration.html#OAPEX1449200> Topic - FAQs for Define Project Enterprise Labor Resources What's the processing order of project enterprise labor resource maintenance conditions?

Records are processed by the Maintain Project Enterprise Labor Resources process in ascending order based on the process order value that you specify on the Create Condition page. For example, assume that an HCM person is included in a condition with a process order value of 1. If a resource doesn't already exist for that person, then the process creates a resource for the condition with the process order value of 1. The process doesn't create more than one resource for the same person even if subsequent conditions apply to the person.

If multiple conditions have the same process order value, then records are processed in ascending alphabetic order based on the condition name.

### NEW QUESTION # 123

Your customer has the following setups on the project plan type that they are using for their projects:

Use Task Planned Dates as Task Assignment Dates = Yes

Automatically Roll Up Task Planned Dates = Yes

Synchronize Task Transaction Dates with Planned Dates = No

With these setups in place, you perform the following actions:

1. Create a new subtask (Sub Task 1) with a start date of 15-Jun-2016 on the project that has as start date of 01-Jul-2016.

2. Create another new subtask (Sub Task 2) after the previous action is saved.

What would the correct behavior of the application be after these actions? (Choose the best answer.)

- A. After the creation and saving of Sub Task 1, Task Start Date would be changed to 01-Jul-2016 and Sub Task 2 would be created with 01-Jul-2016.
- **B. After the creation of Sub Task 1, Project Start Date would be changed to 15-Jun-2016 and Sub Task 2 would be created with 15-Jun-2016.**
- C. After the creation of Sub Task 1, Project Start Date would remain unchanged as 01-Jul-2016 and Sub Task 2 would be created with 15-Jun-2016.
- D. Project Start Date would remain unchanged as 01-Jul-2016 for both actions but the start dates on both subtasks would remain 15-Jun-2016.

**Answer: B**

Explanation:

### NEW QUESTION # 124

Which step within the functional setup manager helps you to move your verified setup data from the test environment to a production environment?

- A. Setting Up
- B. Planning
- **C. Deploying**
- D. Maintaining
- E. Opting In

**Answer: C**

Explanation:

The Deploying step within the functional setup manager helps you to move your verified setup data from the test environment to a production environment. This step allows you to export and import setup data across instances using spreadsheets or configuration packages. You can also compare and validate setup data across instances using reports and dashboards. Reference:

### NEW QUESTION # 125

Which three are valid password complexity criteria while setting up password policies? (Choose three.)

- A. Very Complex: At least 6 characters, 1 uppercase, 1 number, and 1 special character
- **B. Very Complex: At least 8 characters, 1 uppercase, 1 number, and 2 special characters**
- C. Simple: At least 8 characters and 1 number
- **D. Very Complex: At least 8 characters, 1 uppercase, 1 number, and 1 special character**
- **E. Complex: At least 8 characters, 1 uppercase, and 1 number**

**Answer: B,D,E**

Explanation:

Password complexity criteria are criteria that determine how strong or secure a password must be for a user account. Password complexity criteria can include requirements such as minimum length, uppercase letters, lowercase letters, numbers, special

characters, etc. Three of the valid password complexity criteria while setting up password policies are:

\* Complex: At least 8 characters, 1 uppercase, and 1 number

\* Very Complex: At least 8 characters, 1 uppercase, 1 number, and 2 special characters

\* Very Complex: At least 8 characters, 1 uppercase, 1 number, and 1 special character Simple: At least 8 characters and 1 number is not a valid password complexity criterion while setting up password policies, as this criterion does not meet the minimum security standards for Oracle Cloud applications.

Very Complex: At least 6 characters, 1 uppercase, 1 number, and 1 special character is also not a valid password complexity criterion while setting up password policies, as this criterion does not meet the minimum length requirement of 8 characters for Oracle Cloud applications.
