

# Latest Oracle Cloud Database Services 2025 Professional exam pdf & 1z0-1093-25 exam torrent

2025 Latest TorrentExam 1z0-1093-25 PDF Dumps and 1z0-1093-25 Exam Engine Free Share: <https://drive.google.com/open?id=14spRTFSxV7PfDcUA1FY93Kr7ioZjXgNi>

TorrentExam Oracle Cloud Database Services 2025 Professional (1z0-1093-25) self-evaluation tests serve as a call to action, guiding you on how to improve your performance before the Oracle 1z0-1093-25 real exam. TorrentExam's Oracle Cloud Database Services 2025 Professional (1z0-1093-25) web-based and desktop practice dumps also provide candidates with a realistic 1z0-1093-25 Exam scenario, allowing them to experience the 1z0-1093-25 actual exam situation and prepare accordingly. Our 1z0-1093-25 practice questions offer an excellent opportunity to identify and practice the strategies that work best for you.

TorrentExam also offers a demo of the Oracle 1z0-1093-25 exam product which is absolutely free. Up to 1 year of free Oracle Cloud Database Services 2025 Professional (1z0-1093-25) questions updates are also available if in any case the sections of the Oracle 1z0-1093-25 actual test changes after your purchase. Lastly, we also offer a full refund guarantee according to terms and conditions if you do not get success in the Oracle Cloud Database Services 2025 Professional Certification Exam after using our 1z0-1093-25 product. These offers by TorrentExam save your time and money. Buy Oracle Cloud Database Services 2025 Professional (1z0-1093-25) practice material today.

## Free 1z0-1093-25 Updates & Exam 1z0-1093-25 Success

Currently Oracle products are important for enterprises information solutions, relative job opportunities are increasing more and more. 1z0-1093-25 latest dumps vce will be useful. IT skills are regarded as an important standard for enterprises. No matter which field you work in, IT staff must keep on learning to keep up with the changes. 1z0-1093-25 Latest Dumps vce will be a shortcut for Oracle certification and valid for your examinations.

## Oracle Cloud Database Services 2025 Professional Sample Questions (Q36-Q41):

NEW QUESTION # 36

When cloning a BaseDB database for development and testing, which of the following considerations is MOST critical to ensure compliance with data privacy regulations?

- **A. Masking or anonymizing sensitive data in the cloned database.**
- B. Ensuring the compute shape of the cloned database is identical to the production database.
- C. Using the same database version as the production database.
- D. Scheduling the cloning operation during off-peak hours.
- E. Maintaining the same network security group (NSG) rules as the production database.

**Answer: A**

Explanation:

B: Masking or anonymizing sensitive data:

\* Data privacy regulations (like GDPR, HIPAA) mandate that personally identifiable information (PII) is protected, even in non-production environments.

\* Cloning a database without masking sensitive data could expose confidential information to unauthorized users.

\* Techniques include:

\* Data masking: Replacing real data with realistic, but non-sensitive values.

\* Data anonymization: Irreversibly removing personally identifiable information.

Why the other options are incorrect:

\* A. Matching compute shape: Relevant to performance, not privacy.

\* C. Using the same database version: Important for compatibility, but not related to data privacy.

\* D. Same NSG rules: Important for network security, but does not directly address data exposure.

\* E. Off-peak scheduling: Minimizes disruption but does not address data protection.

#### NEW QUESTION # 37

Which two options correctly describe methods for accessing and managing the Exadata Infrastructure?

- **A. Management of the Exadata Infrastructure is primarily performed through the Oracle Cloud Infrastructure (OCI) console and APIs.**
- B. Customers have direct access to the Exadata storage cells, allowing them to modify storage configurations.
- **C. Exadata Infrastructure management is solely managed by Oracle and is not directly accessible to customers.**
- D. The dbcli utility, used for database administration on VM DB Systems, can also be used to manage the Exadata Infrastructure.
- E. Direct SSH access to the Exadata Infrastructure compute nodes is permitted for customers with root privileges.

**Answer: A,C**

Explanation:

Managing Exadata Infrastructure:

\* OCI Console and APIs (B): The primary method for managing Exadata Infrastructure is through the Oracle Cloud Infrastructure Console and associated APIs. This includes provisioning, scaling, patching, and monitoring the Exadata environment.

\* Oracle-Managed Infrastructure (E): Exadata Infrastructure management is fully handled by Oracle, which means customers do not have direct access to the underlying hardware. This managed approach ensures high availability and security.

Why the other options are incorrect:

\* A: Customers do not have root access to Exadata compute nodes to ensure security and system integrity.

\* C: The dbcli utility is designed for VM DB Systems, not Exadata Infrastructure management.

\* D: Exadata storage cells are managed by Oracle, and customers cannot directly modify storage configurations.

#### NEW QUESTION # 38

Which statement accurately reflects the impact of applying an Oracle-provided patch to the operating system on an Exadata Database Service instance using the Oracle Cloud Infrastructure (OCI) console?

- A. The OCI console-initiated patch process only updates the database software, leaving the underlying OS untouched.
- **B. The OCI console-initiated patch process updates the database software and the OS, allowing for a rolling update strategy on the database nodes, minimizing downtime. Storage nodes are updated separately.**
- C. The OCI console-initiated patch process automatically updates both the database software and the underlying operating system on all compute and storage nodes concurrently.
- D. The OCI console-initiated patch process only patches the storage servers; database nodes require manual OS patching.

**Answer: B**

Explanation:

OCI Patching Process:

The Oracle Cloud Infrastructure console simplifies the patching process by integrating both database software and OS patching. The rolling update strategy ensures that one node at a time is patched, reducing the downtime associated with updating the entire cluster. The storage nodes are updated in a separate process to ensure data integrity and availability.

Why the other options are incorrect:

- \* A: The OCI console updates both the OS and database software.
- \* B: Updates are performed in a rolling fashion, not concurrently.
- \* D: The OCI console handles OS patching for both compute and storage nodes.

### NEW QUESTION # 39

In the context of MySQL HeatWave, what is the purpose of the HeatWave AutoPilot feature?

- A. To automatically scale the number of MySQL instances based on transactional workload demands.
- B. To automatically back up and restore the MySQL database to Oracle Cloud Infrastructure Object Storage.
- C. To automate various aspects of HeatWave management, such as data placement, node sizing and resource allocation, and query scheduling.
- D. To automatically detect and prevent security vulnerabilities in the MySQL database.
- E. To automatically generate reports on MySQL performance and usage.

**Answer: C**

Explanation:

C: To automate various aspects of HeatWave management, such as data placement, node sizing and resource allocation, and query scheduling.

HeatWave AutoPilot Automation:

- \* HeatWave AutoPilot is designed to simplify and optimize the management of HeatWave.
- \* It automates critical tasks like:
  - \* Data placement: Optimizing where data is stored in the HeatWave cluster for efficient query processing.
  - \* Node sizing and resource allocation: Dynamically adjusting the size of the HeatWave cluster and allocating resources based on workload demands.
  - \* Query scheduling: Optimizing the execution of queries for maximum performance.
- \* Enhanced Performance: By automating these tasks, HeatWave AutoPilot helps to ensure optimal performance and resource utilization.

Why the other options are incorrect:

- \* A. Automatically detecting and preventing security vulnerabilities: This is not the primary function of HeatWave AutoPilot.
- \* B. Automatically scaling MySQL instances based on transactional workload: HeatWave is focused on analytical workloads, not transactional scaling.
- \* D. Automatically generating performance reports: While monitoring is important, this is not the main purpose of AutoPilot.
- \* E. Automatically backing up to OCI Object Storage: Backup and restore are separate functions and not part of AutoPilot's core functionality.

### NEW QUESTION # 40

When migrating to MySQL HeatWave on Oracle Cloud Infrastructure (OCI), what is the recommended method for securely transferring large database backups?

- A. Creating a secure VPN connection and transferring the backup files using scp.
- B. Transferring the backup files directly over the public internet using FTP.
- C. Shipping physical hard drives containing the backup files to the OCI data center.
- D. Using the Oracle Cloud Infrastructure Data Transfer Service with physical storage appliances.
- E. Use of Data Pump with a database link.

**Answer: D**

Explanation:

Secure Transfer with OCI Data Transfer Service:

The OCI Data Transfer Service is designed to securely transfer large datasets, including database backups, to the cloud. It involves:

- \* Using physical storage appliances to copy data locally and then shipping these devices to OCI data centers.
  - \* Data is encrypted and securely transported, minimizing the risks associated with online transfers.
  - \* This method is cost-effective and practical for terabytes or petabytes of data, avoiding bandwidth limitations and reducing transfer time.
- Why the other options are incorrect:
- \* A: FTP over the public internet is insecure and slow.
  - \* B: Physical hard drives without encryption and secure handling increase data breach risks.
  - \* D: SCP over VPN is secure but impractical for extremely large datasets.
  - \* E: Data Pump is useful for database-to-database transfers, not large file migrations.

## NEW QUESTION # 41

.....

The TorrentExam is one of the top-rated and renowned platforms that has been offering real and valid Oracle Cloud Database Services 2025 Professional (1z0-1093-25) exam practice test questions for many years. During this long time period countless Oracle Cloud Database Services 2025 Professional (1z0-1093-25) exam candidates have passed their dream certification and they are now certified Oracle professionals and pursuing a rewarding career in the market.
