It also assesses the candidate's ability to design and implement solutions that meet the customer's needs.

Microsoft Power Platform Functional Consultant Sample Questions (Q202-Q207):

NEW QUESTION # 202
You have a canvas app that allows users to view, select, and purchase products. The app uses a Gallery control to display products and checkboxes that allow users to select products.
When users select items from the product catalog, they move to a different screen to complete a purchase.
Users must be able to clear all product selections when they click the button.

You need to configure the button.
What should you do?

- A. Set the OnCheck value to populate a collection and the OnUncheck value to remove the item from the collection. Clear collection when the user selects the button.
- B. Use the Reload(Control) formula and pass the gallery control as a parameter to the Reload formula.
- C. Use the ForAll() function to iterate through each item of the Gallery and clear user selections.
- D. Use the Reset(Control) formula and pass the gallery control as a parameter to the Reset formula.

Answer: D

NEW QUESTION # 203
A company is creating a canvas app and a model-driven app to manage their customer accounts.
The canvas app requires a business rule to set the Business Type column to large if the customer size is greater than a specific currency value.
The model-driven app requires a business rule to recommend the account rating be re-evaluated when the account goes on credit hold for this app only.
You need to configure the scope for the business rules.
Which scope should you use? To answer, drag the appropriate scopes to the correct business rules. Each scope may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE:Each correct selection is worth one point.

Answer:

Explanation:

Explanation:
Box 1: Table
The canvas app requires a business rule to set the Business Type column to large if the customer size is greater than a specific currency value.
Scope the business rule to Entity (Table).
Box 2: Specific form
The model-driven app requires a business rule to recommend the account rating be re-evaluated when the account goes on credit hold for this app only.
For Model
The scope of the business rule determines which forms the business rule will be applied. You set the scope, according to the following:
If you select this item...
The scope is set to...
Entity- The table and all forms for the table
All Forms- All forms for the table
Specific form (account Main Form, for example) - Just that form
