Latest PL-600 Exam Questions Vce | Reliable PL-600 Dumps Pdf

We have high-quality PL-600 test guide for managing the development of new knowledge, thus ensuring you will grasp every study points in a well-rounded way. On the other hand, if you fail to pass the exam with our PL-600 exam questions unfortunately, you can receive a full refund only by presenting your transcript. At the same time, if you want to continue learning, our PL-600 Test Guide will still provide free updates to you and you can have a discount more than one year. Finally our refund process is very simple. If you have any question about Microsoft Power Platform Solution Architect study question, please contact us immediately.

Microsoft Power Platform Solution Architect Sample Questions (Q41-Q46):

NEW QUESTION # 41

A new customer asks you to design a solution for a Power Apps app that uses Microsoft Dataverse.

The customer wants to keep the service process simple and save on both licensing and development time.

You need to recommend solutions for the customer.

What should you recommend? To answer, drag the appropriate setting to the correct drop targets. Each source may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Solutions	Answer Area	
	Scenario	Solution
Canvas app	Show the app in Microsoft Outlook.	Solution
Model-driven app	Use Universal Resource Scheduling.	Solution
Dynamics 365 Customer Service	Take notes on a mobile phone and record GPS coordinates automatically.	Solution

Answer:

Explanation:

Solutions	Answer Area	
	Scenario	Solution
Canvas app	Show the app in Microsoft Outlook.	Model-driven app on
Model-driven app	Use Universal Resource Scheduling.	Dynamics 365 Customer Service
Dynamics 365 Customer Service	Take notes on a mobile phone and record GPS coordinates automatically.	Canvas app solution

NEW QUESTION # 42

Hotspot Question

You are designing a model-driven app for a hospital. The app will be used to track teams at the hospital including:

Team	Comments
Cleaning	There are three predetermined cleaning teams. Tasks are assigned to a team. Anyone on the team can complete an assigned task.
Emergency room	These teams are formed as needed based on patient needs and staff availability.
Billing	These teams are assigned to specific hospital departments. Team members must only see data for the hospital department to which they are assigned.

You need to recommend the team types to use.

Which team types should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Requirement

Team type

Cleaning teams

	▼
Access	
Owner	

Emergency room teams

	▼
Access	
Owner	

Billing teams

	▼
Access	
Owner	

Answer:

Explanation:

Answer Area

Requirement	Team type
Cleaning teams	▼ Access Owner
 Emergency room teams	▼ Access Owner
Billing teams	▼ Access Owner

Explanation:

Box 1: Owner team

Owner team: An owner team owns records and has security roles assigned to the team. A user's privileges can come from their individual security roles, those of the teams that they're part of or the ones they inherit. A team has full access rights on the records that the team owns. Team members are added manually to the owner team.

Box 2: Access team

Access team: An access team doesn't own records and doesn't have security roles assigned to the team. The team members have privileges defined by their individual security roles and by roles from the teams they're members of. These members share records with an access team, and the team is granted access rights to the records. Access rights include Read, Write, and Append.

Box 3: Owner team

NEW QUESTION # 44

You need to recommend a reporting solution for the organization.

Which two options should you recommend? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. AI Builder
- B. Power BI
- C. SQL Server Reporting Services (SSRS)
- D. Dynamics 365

Answer: C,D

Explanation:

Explanation

Scenario:

The reporting and analytics team must be able to create reports that include data from all facilities and all workers.

Management reports must present an overview of the entire organization. Other reports may be limited to specific offices.

B: Power Apps apps can include reports that provide useful business information to the user. These reports are based on SQL Server Reporting Services and provide the same set of features that are available for typical SQL Server Reporting Services reports.

C: Microsoft Dynamics 365 online and Model-Driven PowerApps offers several advanced reporting options.

Advanced reports are often necessary when business requirements demand complex calculations, returning multiple data sets, grouping large sets of data based on rules, and retrieving data from different data sources.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/add-reporting-to-app>

NEW QUESTION # 45

You are a Solution Architect and need to evaluate the data sources for your Power Apps project.

The project should read and write the data stored in Azure SQL Database and the Dataverse.

Please select the three data sources that you can use in your solution.

- A. Custom Connector
- B. SharePoint Connector
- C. SQL Server Connector
- D. Dataflows
- E. Activity table
- F. Virtual table

Answer: C,D,F

Explanation:

For Power Platform projects, you should consider storing all data in the Dataverse. The Dataverse provides not only the storage for various data types but also rich business logic, security, data, and integration functionality. You can use the Dataverse API to access data in the Dataverse outside the Power Platform. Or you can copy the data to the Dataverse from other sources.

If you need to use data from other sources in the Power Apps project, several tools will help you.

These tools include the Connectors, Virtual tables, and Dataflows. Power Platform provides 400+ out-of-the-box connectors, including the SQL Server Connector. This connector allows you to connect to Azure SQL Database and SQL Server running on-premises. The Virtual table creates the representation of non-Dataverse data sources inside the Dataverse in a table form. You can read and write the data in a virtual table, and the Dataverse takes care of the data synchronization. The Dataflows help you extract, transform, and load (ETL) data from any source and bring it to the Dataverse or Azure Data Lake Storage.
