Salesforce Process Automation Accredited Professional Sample Questions (Q27-Q32):

NEW QUESTION # 27

Which of the following three statements are correct regarding Flow interviews?

- **A. Only those flow interviews can be deactivated that have been paused at least once.**
- B. A flow interview always runs n single instance of n flow.
- C. A single flow can have up to 50 different versions.
- D. Any flow interviews that are not in use should be deleted go that user's pending list includes only interviews that they ..
- E. Users can use browser's Back or Forward buttons to navigate through a flow

Answer: A

NEW QUESTION # 28

How many active versions of a flow can you have at a given time?

- A. 0
- B. Unlimited
- **C. 1**
- D. 2

Answer: C

Explanation:

At any given time, you can have only one active (activated) version of a flow in Salesforce. While you can create and save multiple versions of a flow, only one version can be active and triggerable by users or automated processes at a time. This ensures that there is no confusion or conflict between different versions of the same flow. Reference: Salesforce Help - Activate or Deactivate a Flow

NEW QUESTION # 29

What does debug option in Flow Builder allow an administrator to do?

- A. Roll back to previously executed actions, callouts, and changes committed to the database.
- B. Version a Flow that can be saved as current version after the Flow has run.
- C. Run the most recent saved version of the flow with auto-save mode turned OFF.
- **D. Enter custom values for input variable and view step-wise details.**

Answer: D

Explanation:

The debug option in Flow Builder allows an administrator to test the flow by entering custom values for input variables and then executing the flow step by step. This feature provides detailed information about each step's execution, helping to identify and troubleshoot issues within the flow. It's a crucial tool for ensuring that the flow behaves as expected before activation. Reference: Salesforce Help - Debug a Flow

NEW QUESTION # 30

Universal Containers (UC) Administrator wants to integrate a new external data object with Salesforce. In Salesforce Flow, they are not able to see the External Object. What could be the possible reason?

- Answer: B**

What does a RecordAction do?

- Answer: B**
