And our PSM-I learning guide can help you get all of the keypoints and information that you need to make sure that you will pass the exam.

Scrum Professional Scrum Master I Sample Questions (Q120-Q125):

NEW QUESTION # 120

What is the recommended size for a Development Team? (Choose the best answer.)

- A. 3 to 9.
- B. At least 7.
- C. 7 plus or minus 3.
- D. 9.

Answer: A

NEW QUESTION # 121

When does the next Sprint begin?

- A. Immediately after the conclusion of the previous Sprint.
- B. Immediately following the next Sprint Planning.
- C. When the Product Owner is ready.
- D. The Monday following the Sprint Review.

Answer: A

NEW QUESTION # 122

Multiple Scrum Teams working on the same project must have the same Sprint start date.

- A. False
- B. True

Answer: A

Explanation:

The correct answer is B, because multiple Scrum Teams working on the same project do not have to have the same Sprint start date. The Scrum Guide states that "multiple Scrum Teams often work together on the same product. One product goal unites them. Therefore, they must mutually define and comply with a definition of 'Done' that applies to their combined work product." Therefore, the synchronization of multiple Scrum Teams is based on their shared product goal and definition of 'Done', not on their Sprint start date.

NEW QUESTION # 123

Which best describes the Product Backlog?

- A. It contains all foreseeable tasks and requirements from which the Scrum team can develop and maintain a complete project plan.
- B. It is baselined to follow change management processes.
- C. It provides just enough information to enable a Scrum team to start the design phase of a product.
- D. It is allowed to grow and change as more is learned about the product and its customers.

Answer: D

Explanation:

According to the Scrum Guide, the Product Backlog is an ordered list of everything that is known to be needed in the product. It is allowed to grow and change as more is learned about the product and its customers. The other options are not accurate descriptions of the Product Backlog, as they are either too restrictive (such as providing just enough information or baselining to follow change management processes) or too comprehensive (such as containing all foreseeable tasks and requirements or enabling a complete project plan).

NEW QUESTION # 124

What is the main reason for the Scrum Master to be at the Daily Scrum?

- A. To gather status and progress information to report to management.
- B. To make sure every team member answers the three questions.
- C. He or she does not have to be there; he or she only has to ensure the Development Team has a Daily Scrum.
- D. To write down any changes to the Sprint Backlog, including adding new items, and tracking progress on the burn-down.

Answer: C

NEW QUESTION # 125

.....

The VCE4Dumps is a trusted and reliable platform that has been offering real, valid, and verified PSM-I exam questions.
