Quality first, service second! We put much attention and resources on our products quality of 350-601 real questions so that our pass rate of the 350-601 training braindump is reaching as higher as 99.37%. As for service we introduce that "Pass Guaranteed". We believe one customer feel satisfied; the second customer will come soon for our 350-601 Study Guide. If you want to have a look at our 350-601 practice questions before your paymnet, you can just free download the demo to have a check on the web.

Cisco 350-601 exam is designed for IT professionals who have experience in implementing data center technologies. 350-601 exam tests the candidate's knowledge of data center infrastructure, including routing and switching protocols, storage networking technologies, and virtualization technologies. It also tests their ability to implement automation and orchestration tools, manage data center security, and troubleshoot data center issues.

Cisco 350-601 (Implementing Cisco Data Center Core Technologies) certification exam is a comprehensive test that evaluates an individual's knowledge and skills in the implementation of core data center technologies. 350-601 Exam covers a diverse range of topics, including network design, automation, virtualization, storage, and security. Implementing Cisco Data Center Core Technologies (350-601 DCCOR) certification validates the candidate's ability to provide solutions for modern data center challenges.

Free PDF 2025 Authoritative Cisco 350-601: Implementing Cisco Data Center Core Technologies (350-601 DCCOR) Valid Test Testking
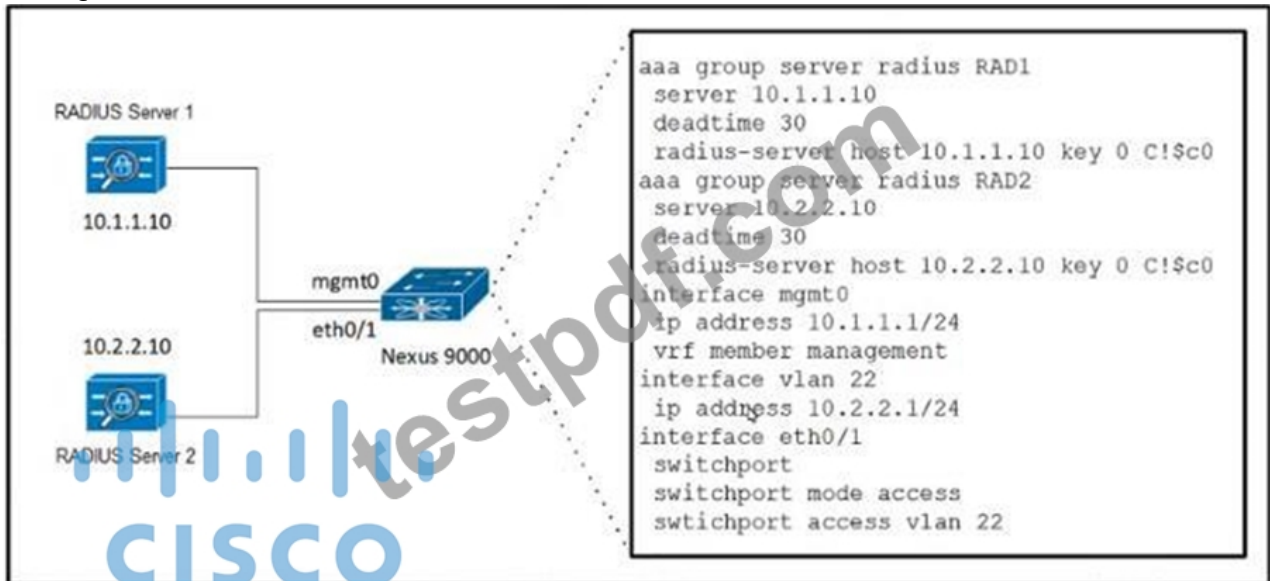

As we will find that, get the test 350-601 certification, acquire the qualification of as much as possible to our employment effect is significant. But how to get the test 350-601 certification didn't own a set of methods, and cost a lot of time to do something that has no value. With our 350-601 Exam Practice, you will feel much relax for the advantages of high-efficiency and accurate positioning on the content and formats according to the candidates' interests and hobbies.

Cisco 350-601 Exam is an important certification for IT professionals who work with data center technologies. Implementing Cisco Data Center Core Technologies (350-601 DCCOR) certification demonstrates that the candidate has the knowledge and skills needed to design, implement, and manage data center technologies using Cisco products and solutions. Implementing Cisco Data Center Core Technologies (350-601 DCCOR) certification is recognized by employers around the world and can help IT

professionals advance their careers in the field of data center technologies.

Cisco Implementing Cisco Data Center Core Technologies (350-601 DCCOR) Sample Questions (Q259-Q264):

NEW QUESTION # 259

```
aaa group server radius RAD1
  server 10.1.1.10
  deadtime 30
  radius-server host 10.1.1.10 key 0 C!$c0
aaa group server radius RAD2
  server 10.2.2.10
  deadtime 30
  radius-server host 10.2.2.10 key 0 C!$c0
interface mgmt0
  ip address 10.1.1.1/24
  vrf member management
interface vlan 22
  ip address 10.2.2.1/24
interface eth0/1
  switchport
  switchport mode access
  swtichport access vlan 22
```

RADIUS Server 1
10.1.1.10

mgmt0
eth0/1
Nexus 9000

10.2.2.10
RADIUS Server 2

Refer to the exhibit. A user must be granted management access to the Cisco Nexus 9000 Series Switch using AAA servers The RADIUS servers are configured to accept login requests from the same Layer 2 subnet of the switch The user must be permitted to log in with these requirements:
* RADIUS server 1 must be used to log in via a console.
* RADIUS server 2 must be used to log in via SSH.
W0hich two actions meet these requirements?

- A. Enable command authorization to RAD1 and RAD2 for all successful logins.
- B. Change the dead timer for RAD1 and RAD2 to 1 minute.
- C. Set the RADIUS source interface to be mgmt0 for group RAD1 and VLAN 22 for group RAD2
- D. Configure the authentication login to use group RAD1 for console and group RAD2 for remote access.

Answer: A,D

NEW QUESTION # 260
Port security is enabled on a Cisco MDS 9000 series Switch. Which statement is true?

- A. Port security can be enabled only globally and affects all VSANs.
- B. Any devices currently logged in must be added manually to the device databased.
- C. Auto-learning is always enabled automatically when port security is enabled.
- D. Cisco Fabric Services must be disabled before enabling port security.

Answer: C

NEW QUESTION # 261
When using Overlay Transport Virtualization (OTV), how do L2 multicast frames traverse the overlay?

- A. The L2 multicast frames are encapsulated in an OTV packet using the configured data-group multicast address for transport
- B. The L2 multicast frames are forwarded natively across the overlay based on their multicast IDs
- C. The L2 multicast frames are dropped because multicast cannot be carried across the overlay
- D. The L2 multicast frames are encapsulated in an OTV packet using the configured control-group multicast address for transport

Answer: A

NEW QUESTION # 262

An engineer must automate the provisioning of Cisco ACI objects using the Terraform tool. The engineer must ensure that APIC counts the authentication login requests against the threshold to avoid a DOS attack. Which configuration must be used in Terraform to accomplish these goals?

- A. resources with user ID and password
- B. provider with signature-based authentication
- C. resources with signature-based authentication
- D. provider with user ID and password

Answer: B

Explanation:
To automate the provisioning of Cisco ACI objects using Terraform while ensuring that APIC counts the authentication login requests against the threshold to avoid a DOS attack, signature-based authentication should be used. This method involves obtaining an authentication token from Cisco APIC, which will use the token to authenticate. However, APIC counts these authentication requests and applies a threshold to prevent DOS attacks. After too many attempts, the user ID and password authentication method may fail as the threshold is exceeded. To circumvent this issue, signature-based authentication is recommended, where a signature is calculated using a private key and passed with the request. This signature is then used to authenticate the user without being counted against the threshold, thus avoiding the risk of exceeding it and failing authentication.
References: The information is based on the Terraform documentation provided by CiscoDevNet

NEW QUESTION # 263
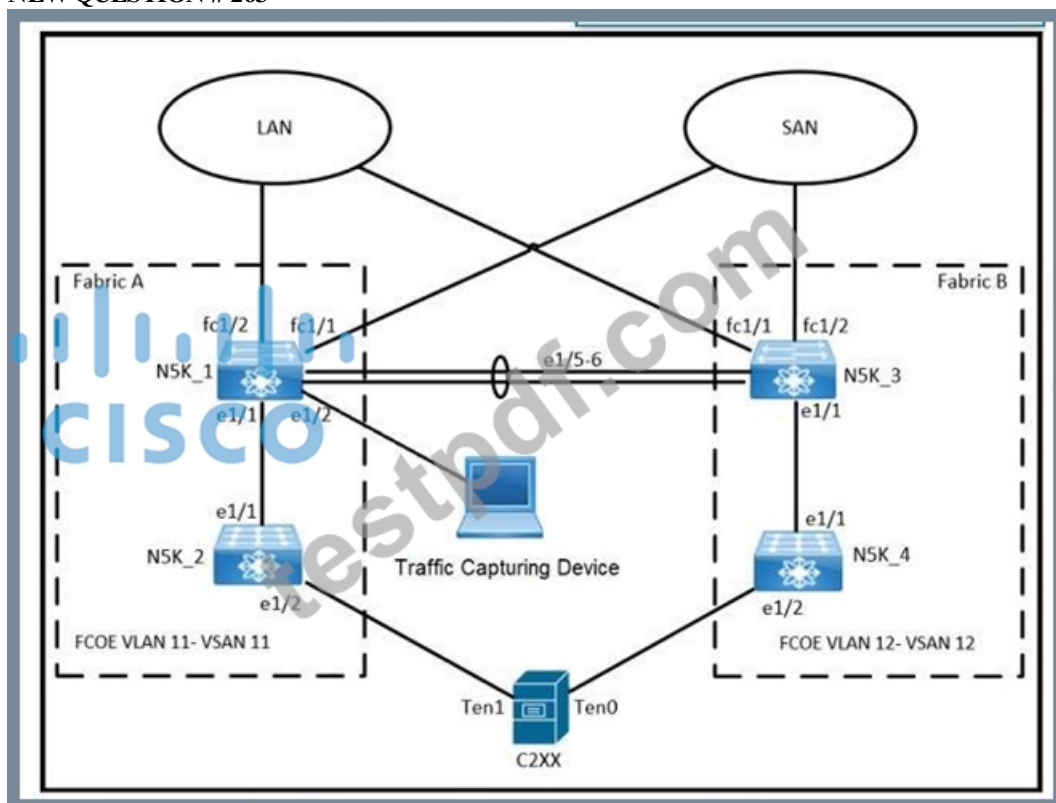

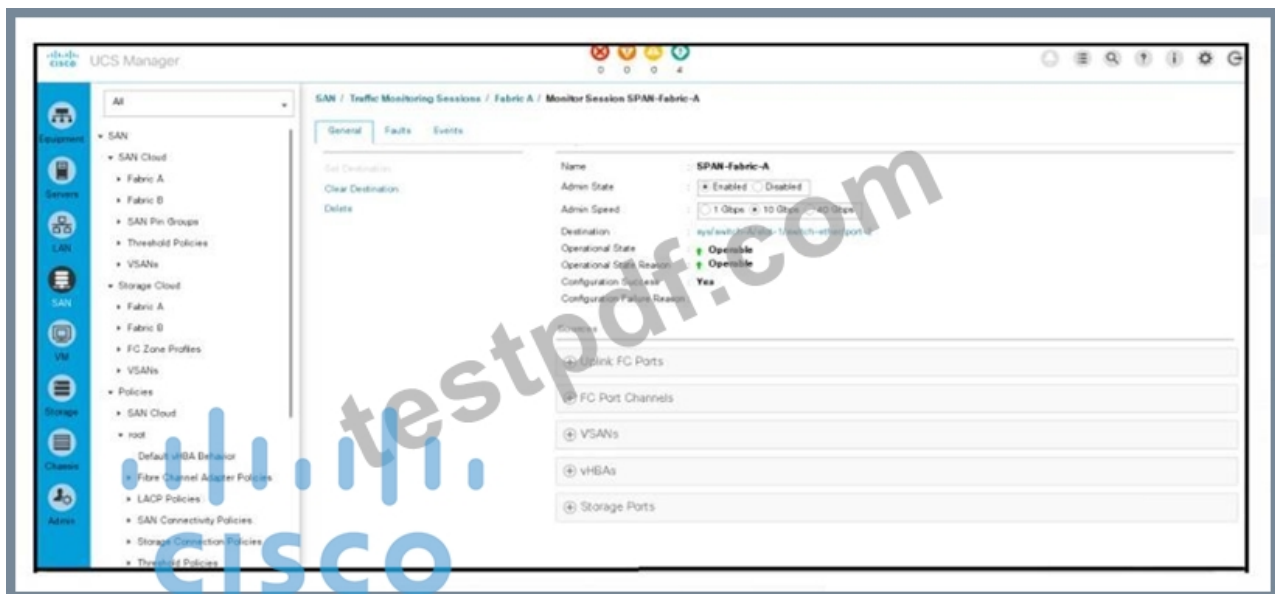

Refer to the exhibits An engineer must implement a SPAN session that sends a copy of all VLAN 11 traffic on N5K_1 to the Traffic Capturing Device The configuration that is presented is already applied to the Cisco UCS Manager. Which additional action meets the objective'?

- A. Select the Clear Destination feature.
- B. Create a LAN traffic monitoring session.
- C. Assign the VLAN to the monitored port.
- D. Choose VLAN 11 under the VSANs section.

Answer: B

Explanation:
To meet the objective of sending a copy of all VLAN 11 traffic on N5K_1 to the Traffic Capturing Device, creating a LAN traffic monitoring session is the necessary action. This session will capture the specified VLAN traffic and forward it to the designated capturing device for analysis or monitoring purposes. The existing configuration in Cisco UCS Manager needs to be complemented with this session to achieve the desired traffic capture.

NEW QUESTION # 264
