The industrious PassExamDumps's IT experts through their own expertise and experience continuously produce the latest SAP C-SIGDA-2403 training materials to facilitate IT professionals to pass the SAP Certification C-SIGDA-2403 Exam. The certification of SAP C-SIGDA-2403 more and more valuable in the IT area and a lot people use the products of PassExamDumps to pass SAP certification C-SIGDA-2403 exam. Through so many feedbacks of these products, our PassExamDumps products prove to be trusted.

SAP Certified Associate - Process Data Analyst - SAP Signavio Sample Questions (Q44-Q49):

NEW QUESTION # 44

Which BPMN gateway is best used to create diverging paths where all conditions must evaluate to true to trigger subsequent flows?

- **A. Parallel Gateway**
- B. Event-based Gateway
- C. Inclusive Gateway
- D. Exclusive Gateway

Answer: A

NEW QUESTION # 45

Which Widget is automatically created after creating a new investigation?

- A. Process Conformance
- B. Value
- C. Variant Explorer
- **D. Process Discovery**

Answer: D

NEW QUESTION # 46

What is the Process Conformance Widget used for?

- A. Visualizing customer journeys and live insights
- **B. Visualizing different variants against a BPMN model of a process**
- C. Visualizing the way tasks are performed and backtracking the process flow
- D. Visualizing activities in processes over time

Answer: B

NEW QUESTION # 47

How can additional information about a business term be stored in the dictionary (for example, by adding a phone number, location, or transaction code)?

- **A. Add custom attributes to the according category.**
- B. Add custom attributes to the associated diagram elements.
- C. Create attribute visualization layers.
- D. Create sub-categories.

Answer: A

Explanation:

To store additional information about a business term in the dictionary, such as a phone number, location, or transaction code, the correct approach is:

* Option B (Add custom attributes to the according category): Custom attributes allow users to extend the information stored in the Dictionary beyond the default set. By adding custom attributes to the relevant category within the Dictionary, users can tailor the stored information to meet specific needs, such as adding contact information, related transaction codes, or geographic details relevant to a business term.

* Customizing the SAP Signavio Dictionary

NEW QUESTION # 48

What is the first step in starting an analysis in SAP Signavio Process Intelligence?

- A. Upload the event log
- B. Analyze Process Discovery Widget

- C. Create a new investigation
- D. Create a new process

Answer: C

Explanation:

In SAP Signavio Process Intelligence, the analysis process begins with setting up a structured environment to examine process data. According to the SAP Signavio Process Intelligence User Guide:

* Option C (Create a new investigation): The first step in starting an analysis is to create a new investigation, which serves as the container for all related analyses, data, and widgets. An investigation defines the scope and purpose of the analysis, such as performance evaluation or conformance checking, and is required before data can be uploaded or analyzed.

* Option A (Create a new process) is incorrect because processes are modeled in SAP Signavio Process Manager, not Process Intelligence, and analysis does not start with process creation.

* Option B (Upload the event log) is incorrect as uploading an event log is a subsequent step after creating an investigation to define the data source.
