- E. To understand what the user sees, hears, says and does

Answer: B,C,E

Explanation:

The empathy map is a powerful tool in SAP Design Thinking for capturing and organizing insights about users. It helps teams develop a holistic understanding of the user's experience. Here's why the correct answers are C, D, and E:

* To understand the user's fears, obstacles, and frustrations (C): Empathy maps include sections for emotions and challenges, helping teams identify pain points and barriers that users face. SAP emphasizes addressing these issues to create meaningful solutions.

* To understand what the user sees, hears, says and does (D): These categories form the core of the empathy map, capturing the user's external environment and behaviors. SAP highlights the importance of observing and documenting these aspects to gain a comprehensive view of the user's context.

* To understand the user's needs and measures of success (E): Empathy maps also explore what users need and how they define success. SAP stresses aligning solutions with these insights to ensure relevance and value.

Incorrect Options:

* A. To understand the attributes of the user's character: While character traits may emerge during empathy research, the empathy map focuses on observable behaviors and experiences rather than personality attributes.

* B. To understand the user's ideas to solve the problem: The empathy map is not intended to capture the user's proposed solutions but rather their experiences and needs. Solution generation occurs during ideation.
