How does real-time production orchestration in SAP Digital Manufacturing improve resource utilization within global manufacturing networks?

- A. Aligns financial optimization
- B. Improves logistics
- C. Automates procurement
- D. Manages production with AI automation in real-time

#### **Answer: D**

Explanation:

The correct answer is:

Solution:

B . Manages production with AI automation in real-time

SAP Digital Manufacturing's real-time Production Orchestration (Resource Orchestration) empowers supervisors to dispatch, schedule, monitor, and automatically balance production on a live basis-responding instantly to events on the shop floor and optimizing resources like labor, equipment, and materials us.io group.com+6learning.sap.com+6help.sap.com+6sap.com+8sap.com+8learning.sap.com+8.

Here's how the other options stack up:

- \* A. Improves logistics - While orchestration connects operations with logistics, its primary purpose is on-floor execution and resource balancing-not optimizing logistics functions directly.
- \* C. Automates procurement - This relates to supply chain/procurement modules in SAP, not manufacturing execution orchestration.
- \* D. Aligns financial optimization - Financial alignment comes primarily from ERP integration, not from real-time production orchestration.

So the best fit is option B.
