Latest Copado Copado-Robotic-Testing Dumps PDF - Quick And Proven Way To Pass Exam

It is a truism that an internationally recognized Copado-Robotic-Testing certification can totally mean you have a good command of the knowledge in certain areas. If you are overwhelmed by workload heavily and cannot take a breath from it, why not choose our Copado Robotic-Testing preparation torrent? We are specialized in providing our customers with the most reliable and accurate exam materials and help them pass their exams by achieving their satisfied scores. With our Copado-Robotic-Testing practice materials, your exam will be a piece of cake.

Automated testing has become increasingly important in the software development industry, which is shifting from traditional software development methodologies. Businesses worldwide are embracing DevOps and Agile methodologies, so they provide a faster, more efficient approach to software development. However, when it comes to testing software applications, the process can be time-consuming and prone to human error. That is where Robotic Testing comes in, by utilizing tools and techniques that enable the automation of testing and QA. The Copado Robotic Testing Certification Exam evaluates if individuals understand how Robotic Testing works and how it can be implemented for efficient software testing.

Copado Robotic Testing Certification Exam is a rigorous test that covers a range of topics related to the use of Copado's Robotic Testing tool. Copado Robotic Testing exam includes both theoretical and practical questions, which means that candidates will be required to demonstrate their knowledge and skills in a variety of ways.

Supermicro Direct Liquid Cooling Service Associate (SDLCSA) Exam exam is one of the top-rated Supermicro SDLCSA Exams. This Supermicro Direct Liquid Cooling Service Associate (SDLCSA) Exam exam offers an industrial-recognized way to validate a

candidate's skills and knowledge. Everyone can participate in Supermicro Direct Liquid Cooling Service Associate (SDLCSA) Exam exam requirements after completing the Supermicro Direct Liquid Cooling Service Associate (SDLCSA) Exam exam. With the Supermicro Direct Liquid Cooling Service Associate (SDLCSA) Exam exam you can learn in-demand skills and upgrade your knowledge. You can enhance your salary package and you can get a promotion in your company instantly.

Supermicro Direct Liquid Cooling Service Associate (SDLCSA) Exam Sample Questions (Q15-Q20):

NEW QUESTION # 15

Where in the chassis are the internal fans and fan housing located?

- A. In the back of the PCIe tray
- B. In the middle of the PCIe tray
- C. In the back of the motherboard tray
- **D. In the middle of the motherboard tray**

Answer: D

Explanation:

In Supermicro systems like the SYS-421GE-TNHR2-LCC, internal fans and their housing are typically located in the middle of the motherboard tray, providing airflow across CPUs and memory, even in DLC setups where liquid cooling handles primary heat removal. This placement, seen in similar systems (e.g., SYS-420GP-TNAR), balances cooling distribution. A and B (PCIe tray) focus on GPU cooling, not motherboard fans, while C (back of motherboard tray) is less common due to PSU placement. Supermicro's DLC hybrid designs integrate fans centrally on the motherboard tray, making D correct. References: Supermicro chassis layouts, DLC hybrid cooling configurations.

NEW QUESTION # 16

What are the full steps and proper order for removing the LPIO board from the PCIe tray?

- A. Remove metal bracket holding down LPIO board > Remove PCIe air shroud > Remove internal fans
- B. Remove a few AOC NIC cards > Remove PCIe tray > Remove motherboard tray
- C. Remove GPU > Remove metal bracket holding down LPIO board > Remove 3 or 4 AOC NIC cards
- **D. Remove PCIe air shroud > Remove all AOC NIC cards > Remove metal bracket holding down LPIO board**

Answer: D

Explanation:

Removing the LPIO (Low-Profile IO) board from the PCIe tray in the SYS-421GE-TNHR2-LCC involves:

* Remove PCIe air shroud: Clears access to components (standard in Supermicro designs).

* Remove all AOC NIC cards: Disconnects cards on the LPIO board for unobstructed removal.

* Remove metal bracket holding down LPIO board: Unscrews (typically 2 screws) the bracket securing the board. Option B follows Supermicro's logical service order (e.g., SYS-420GP-TNAR), ensuring safe access in DLC systems. A (GPU) is unrelated, C (tray removals) is excessive, and D (fans) is irrelevant. B aligns with Supermicro's DLC modularity, making it correct. References: Supermicro PCIe tray service guides, DLC system IO removal protocols.

NEW QUESTION # 17

Aside from ESD gloves, what additional tools do you need to remove a DIMM?

- A. Torque bit and driver
- B. Long-nose pliers (in order to grasp the card)
- **C. No additional tools are needed**
- D. Screwdriver

Answer: C

Explanation:

Removing a DIMM (memory module) in Supermicro systems like the SYS-421GE-TNHR2-LCC requires only ESD gloves for safety; no additional tools are needed. DIMMs are released by pushing down on slot latches and lifting out by hand, per Supermicro manuals (e.g., SYS-420GP-TNAR). A (pliers) risks damage, B (torque bit) and D (screwdriver) are for screws, not DIMMs.

Supernmicro's DLC systems maintain standard DIMM serviceability, making C correct. References: Supernmicro DIMM replacement guides, DLC system maintenance standards.

NEW QUESTION # 18

What 2 add-on component(s) are located inside the side bracket of the SYS-421GE-TNHR2-LCC?

- A. GPU card and PCIe card
- B. AOC NIC card and PCIe card
- C. AOM-PCIe card and GPU card
- **D. AOM-PCIe card and AOC NIC card**

Answer: D

Explanation:

The side bracket in the SYS-421GE-TNHR2-LCC likely houses networking or management add-ons. The AOM-PCIe card (e.g., AOM-GP401-PCIE module) and AOC NIC card (network interface card) are common components in Supernmicro's DLC systems, enhancing connectivity (e.g., high-speed NICs for AI workloads).

A (GPU/PCIe) mixes unrelated categories, C pairs an AOM with a GPU (less likely), and D (AOC/PCIe) lacks specificity. B aligns with Supernmicro's DLC networking focus, making it correct. References:

Supernmicro add-on card specs, DLC system networking components.

NEW QUESTION # 19

When removing the PCIe tray, where are the screws located and how many screws need to be loosened?

- A. There are 2 screws that need to be loosened, one on each side on the sides of the GPU tray
- B. There are 6 screws that need to be loosened, three on each side on the front of the PCIe tray
- C. There are 2 screws that need to be loosened, one on each side of the front of the PCIe tray
- **D. There are 4 screws that need to be loosened, two on each side of the front of the PCIe tray**

Answer: D

Explanation:

Removing the PCIe tray in the SYS-421GE-TNHR2-LCC requires loosening 4 screws, two on each side of the front, per Supernmicro's standard tray removal (e.g., SYS-420GP-TNAR). This ensures secure detachment of the heavy, DLC-integrated tray. B (6 screws) is excessive, C misplaces screws to a GPU tray's sides, and D (2 screws) under-secures. Supernmicro's DLC systems balance stability and serviceability, making A correct.
