Which of the following Machine Learning (ML) sliders will only detect or prevent high confidence malicious items?

- A. Cautious
- B. Moderate
- C. Aggressive
- D. Minimal

**Answer: A**

Explanation:

The Machine Learning (ML) slider that will only detect or prevent high confidence malicious items is Cautious. The ML slider allows you to adjust the level of sensitivity and aggressiveness of the Falcon sensor's ML engine, which uses artificial intelligence to identify and stop unknown threats.

The Cautious setting will enable the sensor to detect and prevent only high-confidence malicious events, while allowing low-confidence events to run without interference. This setting will also generate less noise and false positives than higher settings, such as Moderate or Extra Aggressive.
