Microsoft Power Platform Developer Sample Questions (Q94-Q99):

NEW QUESTION # 94

You need to reduce response time for the information email on the website.
What should you create?

- A. a flow that creates a notification in Microsoft Teams
- B. a Power Apps app that displays the number of email received in a dashboard

- C. a flow that creates a SharePoint item for each email response
- D. a logic app that moves all emails received to Azure Blob storage

Answer: A

Explanation:

Scenario:

Customers report that the response time from the information email listed on the Adventure Works Cycles website is greater than five days.

Microsoft Teams is used for all collaboration.

Microsoft teams support email notifications.

NEW QUESTION # 95

You are creating a model-driven app for a company Sales team members will use the app to manage leads. The app will interact with the Microsoft Dataverse Leads table. You must configure the app to meet the following requirements:

* If the estimated value for a lead is greater than \$10,000 the app must

* Send an email to a manager.

Display a field named Sponsor on the lead form.

* If the estimated value for a lead is greater than \$100,000 the app must:

* Send an email to the company's vice president.

* Display the following message as a notification while the lead record is open: High value customer, handle with care.

You need to configure the app. The solution must minimize the use of code.

Which options should you use? To answer, drag the appropriate options to the correct requirements. Each option may be used once, more than once or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Options

- Business rule
- Power Automate flow
- Onload script

Requirement

- Send required emails.
- Display the Sponsor field.
- Display the notification.

Option

-
-
-

Answer:

Explanation:

Options

- Business rule
- Power Automate flow
- Onload script

Requirement

- Send required emails.
- Display the Sponsor field.
- Display the notification.

Option

- Power Automate flow
- Business rule
- Onload script

NEW QUESTION # 96

A company has a development environment and a production environment. The production environment has several third-party managed and unmanaged solutions that made changes to the Contact main form.

You create a new solution in the development environment. You add the Contact entity and the Contact main form to the solution.

You create a custom field on the Contact entity.

What happens when you perform these actions and import the solution into the production environment? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Action	Result
Add the field to the middle of an existing section in the Contact main form.	The field is inserted at the start of the existing section. The field is inserted in the middle of the existing section. The field is appended to the end of the existing section. The field is added in a new section.
Create a new section in the Contact main form and add the field to the new section.	The field is inserted at the start of the existing section. The field is inserted in the middle of the existing section. The field is appended to the end of the existing section. The field is added in a new section.
Create a new form and add the field to the middle of an existing section.	The field is inserted at the start of the existing section. The field is inserted in the middle of the existing section. The field is appended to the end of the existing section. The field is added in a new section.

Answer:

Explanation:

Action	Result
Add the field to the middle of an existing section in the Contact main form.	The field is inserted at the start of the existing section. The field is inserted in the middle of the existing section. The field is appended to the end of the existing section. The field is added in a new section.
Create a new section in the Contact main form and add the field to the new section.	The field is inserted at the start of the existing section. The field is inserted in the middle of the existing section. The field is appended to the end of the existing section. The field is added in a new section.
Create a new form and add the field to the middle of an existing section.	The field is inserted at the start of the existing section. The field is inserted in the middle of the existing section. The field is appended to the end of the existing section. The field is added in a new section.

Explanation:

Action	Result
Add the field to the middle of an existing section in the Contact main form.	▼ The field is inserted at the start of the existing section. The field is inserted in the middle of the existing section. The field is appended to the end of the existing section. The field is added in a new section.
Create a new section in the Contact main form and add the field to the new section.	▼ The field is inserted at the start of the existing section. The field is inserted in the middle of the existing section. The field is appended to the end of the existing section. The field is added in a new section.
Create a new form and add the field to the middle of an existing section.	▼ The field is inserted at the start of the existing section. The field is inserted in the middle of the existing section. The field is appended to the end of the existing section. The field is added in a new section.

Box 1: The field is appended to the end of the existing section.

When you add new elements to a form that is to be merged, we recommend that you include your new elements within new container elements (tabs or sections). Additions to any container will be appended to the end of the container. For example, fields added to a section will be positioned at the end of the section.

Box 2: The field is added in a new section.

Box 3: The field is inserted in the middle of the existing section

NEW QUESTION # 98

You need to configure the custom connector to incorporate the environment name and DataId in the Web API URL. Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

Actions

Set the operation to dataservice.
Create a policy template that uses the Route request template.
Create a policy template that uses the Set host URL template.
Set the operation to enrich.
Set the subdomain of the URL template to: dataservice-@connectionParameters('EnvironmentName')
Set the path of the URL template path to: enrich/@queryParameters('DataId')

Answer Area

Answer:

Explanation:

Actions	Answer Area
Set the operation to dataservice.	Create a policy template that uses the Set host URL template.
Create a policy template that uses the Route request template.	Set the operation to enrich.
Create a policy template that uses the Set host URL template.	Set the subdomain of the URL template to: dataservice-@connectionParameters('EnvironmentName')
Set the operation to enrich.	Set the path of the URL template path to: enrich/@queryParameters('DataId')
Set the subdomain of the URL template to: dataservice-@connectionParameters('EnvironmentName')	
Set the path of the URL template path to: enrich/@queryParameters('DataId')	

Explanation:

Actions

Set the operation to dataservice.

Create a policy template that uses the Route request template.

Answer Area

- 1 Create a policy template that uses the Set host URL template.
- 2 Set the operation to enrich.
- 3 Set the subdomain of the URL template to:
dataservice-@connectionParameters('EnvironmentName')
- 4 Set the path of the URL template path to:
enrich/@queryParameters('Datald')

Microsoft
