We are quite confident that you will pass the final Salesforce Certified OmniStudio Developer OmniStudio-Developer exam easily. Best of luck with exams and your professional career!!!

## OmniStudio-Developer Customizable Exam Mode, OmniStudio-Developer Reliable Test Tips

It is well known that Salesforce certification plays a big part in the IT field and obtaining it means you have access to the big companies and recognized by the authority. But the reality is that the OmniStudio-Developer Braindumps torrents are very difficult and the pass rate of OmniStudio-Developer practice test is low. So choosing our exam training materials are very necessary to every candidate.

### Salesforce Certified OmniStudio Developer Sample Questions (Q48-Q53):

#### NEW QUESTION # 48

A developer needs to display the following information together on one FlexCard:

- \* Account name, address, phone number, website
- \* Primary contact first name, contact name, address, phone number, email

The account information must always be visible, and the contact information should only be visible as needed by the user.

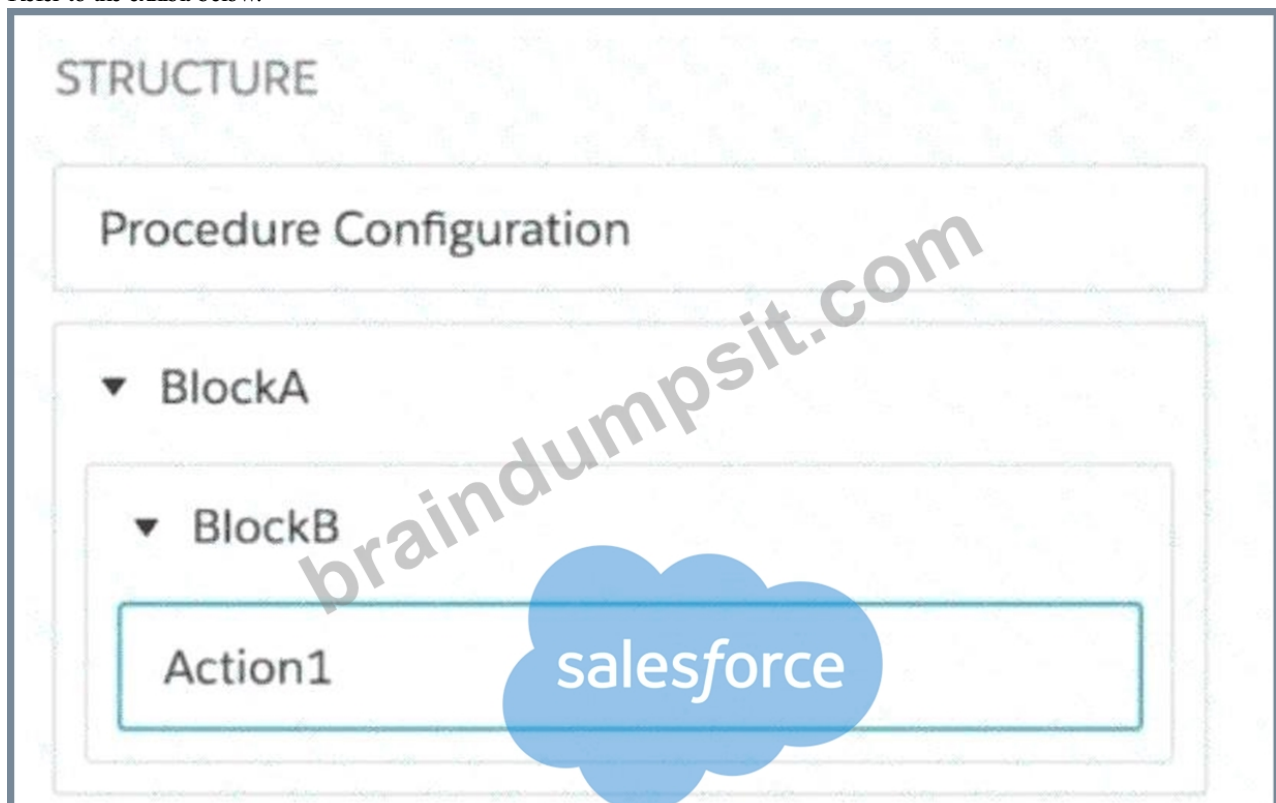

What approach should the developer use to display the contact information on the card?

- A. Set the collapsible property on the block element
- B. Set the class "collapsible" on the block element
- C. Use a Datatable element
- D. Use a conditional FlexCard State

Answer: A

#### NEW QUESTION # 49

Refer to the exhibit below.

In this Integration Procedure structure, which Send JSON Path should be used to send the output of the Action1 element to a Remote Action?

- A. BlockA.BlockB.Action1
- B. BlockA:BlockB:Action1

- C. Action1.BlockB.BlockA
- D. Action1:BlockB:BlockA

**Answer: A**

Explanation:

In OmniStudio Integration Procedures, when you want to reference the output of an element in a nested block (e.g., for use in a Remote Action or another step), you must use dot notation that mirrors the block structure hierarchy.

In the exhibit:

- \* Action1 is nested inside:
- \* BlockB, which is nested inside:
- \* BlockA

Therefore, the correct Send JSON Path to access the result of Action1 is:

CopyEdit

BlockA.BlockB.Action1

This format complies with the standard output reference syntax in Integration Procedures, which follows the pattern:

php-template

CopyEdit

<ParentBlock>.<ChildBlock>.<ActionElement>

Incorrect Options:

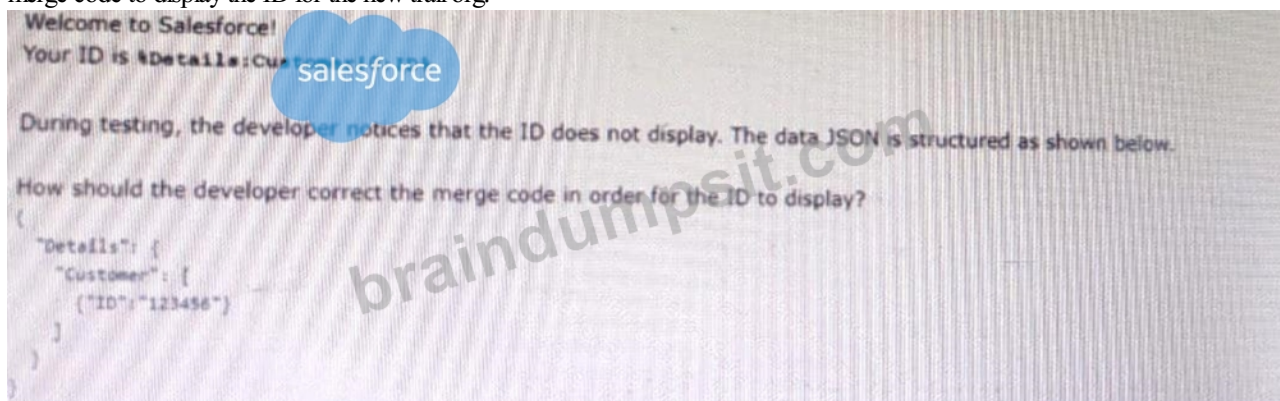

- \* B. BlockA:BlockB:Action1 - Uses colons instead of dots. This is invalid syntax in JSON path resolution within Integration Procedures.
- \* C. Action1:BlockB:BlockA - Incorrect order and invalid separators.
- \* D. Action1.BlockB.BlockA - Incorrect order (reversed path).

Reference:

Salesforce OmniStudio Developer Guide # Integration Procedure Element JSON Pathing Best Practices for Send JSON Path # Nested Blocks and Element Referencing

## NEW QUESTION # 50

A developer is creating an OmniScript that provisions trail orgs to their customers. The following text block in the Omniscript uses a merge code to display the ID for the new trail org:

- A. To %sDetails: Customer|0: ID%%
- B. To %Details: Customer|n: ID%
- C. To %Details: Customer|1: ID%
- D. To %sDetails: Customer|0: ID\$

**Answer: C**

Explanation:

The correct syntax for merge codes in OmniScript is %sNodeName%, where NodeName is the name of the JSON node in the data source. The other options are either missing the s or using incorrect symbols.

## NEW QUESTION # 51

A developer writes an OmniScript that includes a DataRaptor that updates the Account statue based on information provided from the OmniScript. The information must be updated only if the Account record already exists. Otherwise, a new account must be

created.

How should the developer accomplish this task?

- A. Check Overwrite Target for all Null input checkbox on the Account id field
- B. Populate the Lookup object and Lookup fields
- C. Check the Upsert key checkbox on the Account Status field
- **D. Check the Upsert key and is required for Upsert checkboxes on the Account id field**

**Answer: D**

Explanation:

According to the OmniStudio Developer Guide, "To upsert a record, select the Upsert Key checkbox for the field that contains the unique identifier for the record. If you want to create a new record when no match is found, select Is Required for Upsert." Therefore, the correct answer is B.

### NEW QUESTION # 52

A developer creates an OmniScript to update billing information. After analyzing the different types of customer interactions that occur at the company, the developer determines updating billing information should be included in the majority of customer interactions, which are represented by more than 20 different FlexCards.

What is the most efficient way for the developer to configure the action that invokes the OmniScript?

- A. As a Lightning Action
- B. As a Custom Action
- C. As an OS Action
- **D. As an OmniStudio Action**

**Answer: D**

### NEW QUESTION # 53

.....

The appropriate selection of OmniStudio-Developer training is a guarantee of success.
