Exam4Docs customizable & advanced SCA-C01 online test engine can create a real exam simulation environment to help to prepare for your Tableau SCA-C01 exam test. The intelligence and humanization can inspire your desire for SCA-C01 exam test study. Besides, the SCA-C01 online test engine is suitable for all the electronic devices without any installation restriction. We know that time is very precious for everyone in the society. While Exam4Docs SCA-C01 Online Test engine can help you study efficiently. Now, you see, with the SCA-C01 online test engine, you can get a score after each test, thus you will know your error and enhance your weakness. Besides, you can set the frequency of occurrence of the questions you made mistake. With the high study efficiency and valid SCA-C01 exam torrent, passing the SCA-C01 actual test is no longer a problem.

When you see other people in different industry who feel relaxed with high salary, do you want to try another field? And is the difficulty of learning a new piece of knowledge often deterring you? It doesn't matter, now SCA-C01 practice exam offers you a great opportunity to enter a new industry. Our SCA-C01 learning material was compiled from the wisdom and sweat of many industry experts. And it is easy to learn and understand our SCA-C01 exam questions.

Pass Guaranteed Quiz SCA-C01 - Tableau Server Certified Associate Exam – High-quality Test Prep

For candidates who are going to prepare for the exam, they may need the training materials. The quality may be their first concern. SCA-C01 exam bootcamp of us is famous for the high-quality, and if you buy from us, you will never regret. We also pass guarantee and money back guarantee if you fail to pass the exam. In addition, we adopt international recognition third party for the payment of SCA-C01 Exam Dumps. Therefore, the safety of your money and account can be guarantee. Choose us, and you will never regret.

Tableau SCA-C01 exam is intended for IT professionals, system administrators, and data analysts who are responsible for managing Tableau Server deployments in their organizations. SCA-C01 exam covers a range of topics, from basic Tableau Server concepts to advanced administration tasks. Candidates need to demonstrate their knowledge of Tableau Server architecture, including its components, processes, and functions. They also need to show their ability to install and configure Tableau Server, manage users and content, and ensure the security and scalability of the system.

Tableau SCA-C01 Certification Exam is a timed exam, which consists of 60 multiple-choice questions. SCA-C01 exam is administered online, and candidates have 90 minutes to complete it. SCA-C01 exam questions are designed to test the candidate's knowledge and understanding of Tableau Server, and the passing score is 70%.

Tableau Server Certified Associate Exam Sample Questions (Q200-Q205):

NEW QUESTION # 200

Which TSM command should you run to rebuild the search index and reset the search server back to a clean slate?

- A. `tsm maintenance reset-searchindex`
- B. `tsm maintenance reset-searchserver`
- C. `tsm maintenance rebuild-search`
- D. `tsm maintenance rebuild-index`

Answer: B

Explanation:

Explanation

NEW QUESTION # 201

You install Tableau Server on a server that has four processor cores. How many instances of each Tableau Server process are installed?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:

Tableau Server's installer configures process instances based on hardware and deployment type (single-node vs. multi-node). For a single-node installation with 4 cores, we need to consider the default process topology.

Let's break this down exhaustively:

* Key Processes:

* Gateway: Handles incoming requests (1 instance).

* Application Server (VizPortal): Manages UI and sessions (1 instance).

* VizQL Server: Renders visualizations (2 instances).

* Backgrounder: Runs extract refreshes, subscriptions (1 instance).

* Data Server: Manages data connections (1 instance).

* File Store: Stores extracts (1 instance).

* Repository: Metadata database (1 instance, active).

* Cluster Controller, Cache Server, etc.: Supporting processes (typically 1 each).

* Default Configuration:

* On a single-node install, Tableau sets 1 instance per process unless specified otherwise, except for VizQL, which defaults to 2.

* The installer doesn't scale instances linearly with cores (e.g., 4 cores # 4 instances). Post-install, TSM can adjust this (e.g., tsm topology set-process), but the question asks for the installed default

.

* Minimum hardware (8 cores, 32 GB RAM) suggests higher defaults, but 4 cores still triggers a minimal setup.

* Option B (1): Correct with Caveat.

* Most processes (e.g., Backgrounder, Gateway, Data Server) default to 1 instance on install, regardless of 4 cores.

* VizQL defaults to 2, but the question's phrasing ("each process") implies a general rule.

Historically (and per docs), 1 is the baseline for most, with VizQL as the exception.

* Interpretation: Assuming "each" means the typical case, 1 fits most processes on a 4-core single-node setup.

* Option A (2): Incorrect. Only VizQL defaults to 2; others don't.

* Option C (8): Incorrect. Far exceeds defaults-8 cores might justify more, but not 4.

* Option D (4): Incorrect. Not tied to core count by default; manual config would be needed.

Why This Matters: Understanding defaults aids capacity planning-4 cores is below production minimum (8), so performance tuning may be needed post-install.

NEW QUESTION # 202

To help your users find the data that's trusted and recommended for their type of analysis, you can certify the data that complies with your organization's data standards. Which site roles have the capability to certify data in Tableau Server? (Select all)

- A. Creator site role
- B. Explorer (Can Publish) site role and the Project Leader capability
- C. Server Administrator
- D. Creator site role and the Project Leader capability

Answer: B,C,D
