

Latest Valid Exam JN0-664 Book & Fast Download JN0-664 Valid Study Plan: Service Provider, Professional (JNCIP-SP)

DOWNLOAD the newest TrainingDump JN0-664 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1A8eWafYztsBwRAXTGydnuwSuBLMAcFsK>

You can become part of this skilled and qualified community. To do this you must enroll in the TrainingDump Juniper JN0-664 certification exam and start preparation with real and valid Service Provider, Professional (JNCIP-SP) (JN0-664) exam practice test questions right now. The TrainingDump JN0-664 Exam Practice test questions are checked and verified by experienced and qualified JN0-664 exam trainers. So you can trust TrainingDump Juniper JN0-664 exam practice test questions and start preparation with confidence.

The JN0-664 exam is an ideal certification for network engineers, administrators, and technicians who work with Juniper Networks service provider routing platforms. JN0-664 exam covers a wide range of topics, including OSPF, BGP, IS-IS, MPLS, Layer 2 VPNs, Layer 3 VPNs, multicast, and Class of Service (CoS). JN0-664 Exam also covers advanced Junos automation and troubleshooting techniques, including real-time monitoring, event logging, and system maintenance.

Three Formats OF JN0-664 Practice Material By TrainingDump

Desktop Service Provider, Professional (JNCIP-SP) (JN0-664) practice exam software also keeps track of the earlier attempted Service Provider, Professional (JNCIP-SP) (JN0-664) practice test so you can know mistakes and overcome them at each and every step. The Desktop Service Provider, Professional (JNCIP-SP) (JN0-664) practice exam software is created and updated in a timely by a team of experts in this field. If any problem arises, a support team is there to fix the issue.

Juniper Service Provider, Professional (JNCIP-SP) Sample Questions (Q98-Q103):

NEW QUESTION # 98

Which two statements are correct about the customer interface in an LDP-signaled pseudowire?
(Choose two.)

- A. When the encapsulation is vlan-ccc or extended-vlan-ccc, the configured VLAN tag is not included in the control plane LDP advertisement.
- B. When the encapsulation is ethernet-ccc, tagged and untagged frames are both accepted in the data plane.
- C. When the encapsulation is vlan-ccc or extended-vlan-ccc, the configured VLAN tag is included in the control plane LDP advertisement.
- D. When the encapsulation is ethernet-ccc, only frames without a VLAN tag are accepted in the data plane.

Answer: B,C

NEW QUESTION # 99

Referring to the exhibit, which two statements are true? (Choose two.)

```
user@R1> show route protocol bgp
inet.0: 8 destinations, 12 routes (8 active, 0 holddown, 0 hidden)
+ = Active Route, - = Last Active, NET# = Network
172.16.20.4/30      *[BGP/170] 00:49:55, localpref 100
                    AS path: 2 I, validation-state: unverified
                    > to 10.0.18.2 via ge-1/0/4.0
                    > to 10.0.19.2 via ge-1/0/5.0
[BGP/170] 00:49:55, localpref 100
                    AS path: 2 I, validation-state: unverified
                    > to 10.0.19.2 via ge-1/0/5.0
```

- A. This route is learned from two different AS numbers.
- B. This route is learned from the same AS number.
- C. The multipath configuration is used for load balancing.
- D. The multihop configuration is used for load balancing.

Answer: B,C

NEW QUESTION # 100

You are a network architect for a service provider and want to offer Layer 2 services to your customers. You want to use EVPN for Layer 2 services in your existing MPLS network.

Which two statements are correct in this scenario? (Choose two.)

- A. VXLAN must be configured on all PE routers.
- B. EVPN uses Type 3 routes to join a multicast tree to flood traffic.
- C. Segment routing must be configured on all PE routers.
- D. EVPN uses Type 2 routes to advertise MAC address and IP address pairs learned using ARP snooping.

Answer: B,D

Explanation:

Explanation

EVPN is a technology that connects L2 network segments separated by an L3 network using a virtual Layer 2 network overlay over the Layer 3 network. EVPN uses BGP as its control protocol to exchange different types of routes for different purposes. Type 2

routes are used to advertise MAC address and IP address pairs learned using ARP snooping from the local CE devices. Type 3 routes are used to join a multicast tree to flood traffic such as broadcast, unknown unicast, and multicast (BUM) traffic.

NEW QUESTION # 101

When building an interprovider VPN, you notice on the PE router that you have hidden routes which are received from your BGP peer with family inet labeled-unicast configured.

Which parameter must you configure to solve this problem?

- A. Under the family inet labeled-unicast hierarchy, add the resolve-vpn parameter.
- B. Under the protocols mpls hierarchy, add the traffic-engineering parameter
- C. Under the protocols ospf hierarchy, add the traffic-engineering parameter.
- D. Under the family inet labeled-unicast hierarchy, add the explicit null parameter.

Answer: A

Explanation:

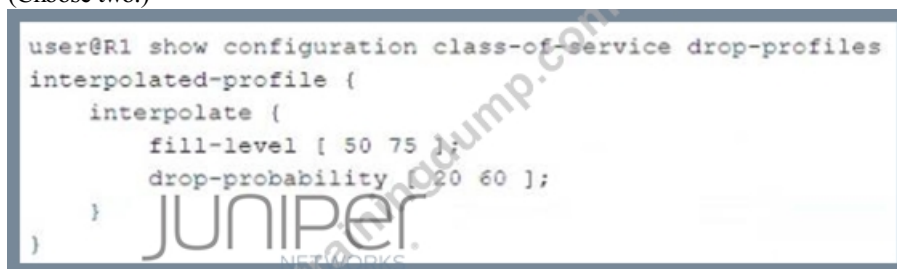

Explanation

The resolve-vpn parameter is a BGP option that allows a router to resolve labeled VPN-IPv4 routes using unlabeled IPv4 routes received from another BGP peer with family inet labeled-unicast configured. This option enables interprovider VPNs without requiring MPLS labels between ASBRs or using VRF tables on ASBRs. In this scenario, you need to configure the resolve-vpn parameter under [edit protocols bgp group external family inet labeled-unicast] hierarchy level on both ASBRs.

NEW QUESTION # 102

Which two statements are correct about the class-of-service configuration shown in the exhibit?

(Choose two.)

- A. The drop probability gradually increases from 20% to 60% as the queue level increases from 50% full to 75% full.
- B. To use this drop profile, you apply it directly to an interface.
- C. The drop probability jumps immediately from 20% to 60% when the queue level reaches 75% full.
- D. To use this drop profile, you reference it in a scheduler.

Answer: A,D

NEW QUESTION # 103

.....

This means a little attention paid to JN0-664 test prep material will bring in great profits for customers, The pass rate is 98.95% for the JN0-664 exam torrent, and you can pass the exam if you choose us. Besides, free demo is available for JN0-664 PDF version, and you can have a try before buying. Privacy and security, 98 to 100 percent of former exam candidates have achieved their success by the help of our JN0-664 Practice Questions. We assure you that we will never sell users' information because it is damaging our own reputation.
