

# Latest VMware 2V0-16.25 Exam Dumps & 2V0-16.25 Latest Exam

Download the latest VMware 2V0-16.25 Exam Dumps For Preparation

1. What two steps are required to visualize API connectivity and enable API protection in VMware Tanzu Service Mesh? (Choose two.)

- A. Activate API Discovery for the Global Namespace
- B. Create API Security Policy for the Global Namespace
- C. Enable Threat Detection Policy for the Global Namespace
- D. Set a Distributed Firewall policy for the Global Namespace
- E. Create an Autoscaling policy for API for the Global Namespace

**Answer:** A, B

2. An administrator set the following value: `ENABLE_AUDIT_LOGGING=true` during a cluster deployment. What was the purpose of this setting?

- A. Log metadata about all requests made to the Kubernetes API server.
- B. Enable log redirection to external logging server by Fluent Bit.
- C. Run scripts that collect Kubernetes API output, node logs, and node command-line output.
- D. Activate the `kubectl describe` command for CustomResourceDefinitions (CRDs) introduced by Cluster API.

**Answer:** A

3. Which two package management tools can be used to configure and install applications on Kubernetes? (Choose two.)

- A. Grafana
- B. Fluent bit
- C. Carvel
- D. Helm
- E. Multus

**Answer:** C, D

4. What is the function of Velero?

- A. Backup and restore Kubernetes clusters
- B. Monitor cluster services
- C. Publish DNS records for applications to DNS servers
- D. Collect data and logs from different sources, unify them, and send them to multiple destinations

**Answer:** A

5. Where can an administrator register the vSphere management cluster in VMware Tanzu Mission Control?

- A. In the VMware Tanzu Mission Control web console or CLI
- B. In the vSphere Management Cluster with `Jcubedcl`
- C. In the vSphere Client - Workload Cluster settings
- D. In the vSphere Namespace with `Jcubedcl`

**Answer:** A

6. Which two statements describe Kubernetes observability characteristics? (Choose two.)

- A. It provides network insight and detailed Kubernetes network topology view

2 / 3

As is known to all, practice makes perfect. This proverb also can be replied into the exam. We have the 2V0-16.25 Study Materials with good reputation in the market. The 2V0-16.25 exam dumps not only contains the quality, but also have the quantity, therefore it will meet your needs. Just think that you just need to practice it for some time, a certificate will be obtained by your own efforts, it will be a quite delightful thing. So act now, you will be very happy to see it come true.

Now we can say that VMware vSphere Foundation 9.0 Administrator (2V0-16.25) exam questions are real and top-notch 2V0-16.25 exam questions that you can expect in the upcoming VMware vSphere Foundation 9.0 Administrator (2V0-16.25) exam. In this way, you can easily pass the 2V0-16.25 exam with good scores. The countless 2V0-16.25 Exam candidates have passed their dream VMware 2V0-16.25 certification exam and they all got help from real, valid, and updated 2V0-16.25 practice questions, You can also trust on PassLeader and start preparation with confidence.

## 2V0-16.25 Latest Exam - Reliable 2V0-16.25 Test Review

According to different kinds of questionnaires based on study condition among different age groups, we have drawn a conclusion that the majority learners have the same problems to a large extent, that is low-efficiency, low-productivity, and lack of plan and periodicity. As a consequence of these problem, our 2V0-16.25 test prep is totally designed for these study groups to improve their capability and efficiency when preparing for VMware exams, thus inspiring them obtain the targeted 2V0-16.25 certificate

successfully. There are many advantages of our 2V0-16.25 question torrent that we are happy to introduce you and you can pass the exam for sure.

## VMware vSphere Foundation 9.0 Administrator Sample Questions (Q54-Q59):

### NEW QUESTION # 54

An administrator is tasked to deploy a new eight-node VMware vSAN Express Storage Architecture (ESA) cluster. What are three minimum requirements to accomplish this? (Choose three.)

- A. 10GbE network interfaces
- **B. 128GB Memory**
- C. SAS solid-state disk (SSD)
- **D. PCIe flash device (NVMe)**
- **E. 25GbE network interfaces**
- F. 256GB Memory

**Answer: B,D,E**

Explanation:

For vSAN ESA (Express Storage Architecture), minimum requirements differ from OSA:

\* 25GbE NICs are required to handle high-performance traffic. (C)

\* NVMe PCIe flash devices must be used for storage. (D)

\* 128GB Memory minimum per host is required. (F)

Other options:

\* A. 10GbE# Only supported in vSAN OSA, not ESA.

\* B. 256GB Memory# Recommended for large workloads, not minimum.

\* E. SAS SSDs# Not supported in ESA; NVMe required.

References:

VMware Cloud Foundation 9.0 -vSAN ESA Hardware Requirements

VMware Docs: vSAN ESA Deployment Requirements

### NEW QUESTION # 55

An administrator needs to ensure that only specific users can manage the virtual machines (VM) in a specific VMware vCenter folder.

Which three steps are required to accomplish this? (Choose three.)

- A. Add the identity source to vCenter.
- **B. Assign the new role to the appropriate users/groups.**
- **C. Apply the role to the specific vCenter folder.**
- D. Create a datastore cluster.
- **E. Create a new role in vCenter with VM management permissions.**

**Answer: B,C,E**

Explanation:

To ensure that only specific users can manage VMs in a specific VMware vCenter folder, the following three steps are required:

\* Create a new role in vCenter with VM management permissions (Answer B): You must define a custom role tailored to managing VMs, which includes permissions such as powering on/off VMs, editing VM settings, and accessing consoles. This role must include the appropriate privileges under the

"Virtual machine" category in vCenter permissions.

\* Apply the role to the specific vCenter folder (Answer C): The custom role needs to be applied directly to the target vCenter folder. This enables scope-based access control, where permissions are applied only to VMs within that folder.

\* Assign the new role to the appropriate users/groups (Answer A): After creating the role and applying it to the folder, the role must be associated with the correct users or groups. This step uses the vCenter Server's identity source integration to assign roles.

Why the other options are incorrect:

\* D. Add the identity source to vCenter: This is a prerequisite step for any role assignment but is not directly required in this specific scenario if the identity source is already configured.

\* E. Create a datastore cluster: This is unrelated to managing VM access. Datastore clusters pertain to storage management and are not involved in user permissions or role assignments.

References:

VMware vSphere 9.0 Documentation # Role-based Access Control

VMware Docs: vSphere Permissions and User Management

VMware vSphere 9.0 PDF, section on vCenter Server Permissions Management.

**NEW QUESTION # 56**

An administrator is tasked with setting up pricing for their VMware vSphere Foundation (VVF) environment.

The accounting team has decided to charge users in 't-shirt sizes' for vCPU in the following method:

\* Small (1-2 vCPU)

\* Medium (3-4 vCPU)

\* Large (5-8 vCPU)

Which rate method is used for this configuration?

- A. Base rate CPU per vCPU.
- B. Base rate storage per GB.
- **C. Base rate slabs.**
- D. Base rate CPU per GHz.

**Answer: C**

Explanation:

The t-shirt sizing model (Small, Medium, Large) for vCPU allocation is an example of slab-based pricing.

\* Base rate slabs allow administrators to define different ranges (slabs) of resource usage with associated rates.

\* In this case, vCPUs are grouped into ranges (1-2, 3-4, 5-8), and charges are applied per slab.

Other options:

\* A. Base rate storage per GB # Applies to storage, not CPU.

\* C. Base rate CPU per GHz # Charges by GHz usage, not vCPU count.

\* D. Base rate CPU per vCPU # Flat per vCPU, no slab/tier-based flexibility.

**NEW QUESTION # 57**

Which rule in a virtual machine (VM) storage policy is configured to ensure data redundancy in a VMware vSAN environment?

- A. Disk Stripes Per Object
- **B. Failures to Tolerate**
- C. Stripe Width
- D. Flash Read Cache Reservation

**Answer: B**

Explanation:

The VM Storage Policy rule that controls data redundancy in vSAN is Failures to Tolerate (FTT).

\* Defines the number of hardware failures (host, disk, network) that vSAN can tolerate while maintaining data availability.

\* Configurations include RAID-1 (mirroring), RAID-5/6 (erasure coding).

Other options:

\* B. Disk Stripes Per Object # Defines performance striping, not redundancy.

\* C. Stripe Width # Same as above, not redundancy.

\* D. Flash Read Cache Reservation # Relates to caching performance, not redundancy.

**NEW QUESTION # 58**

An administrator has been tasked with creating a custom alert for an object in VMware Cloud Foundation (VCF) Operations.

When creating the alert, the administrator completes the following:

- \* A new symptom definition.
- \* A new alert definition.
- \* Select the Object type.

What additional step must the administrator take to complete the stated objective and ensure the alert is triggered?

- A. Create and enable a super metric for read latency in the Active Policy.
- B. Create a new Payload Template.
- C. Create an instance of the Rest Notification Plugin.
- **D. Enable the alert in an Active Policy.**

**Answer: D**

Explanation:

When creating a custom alert in VCF Operations, the final required step is:

- \* Enable the alert in an Active Policy, so it applies to the target objects.

Without policy activation, the alert exists but will never trigger.

Other options:

- \* A. Super metric# Only required if monitoring a custom metric, not for standard alerts.
- \* B. REST Notification Plugin# Used for outbound integration, not triggering alerts.
- \* C. Payload Template# Used in notifications, not in core alert configuration.

## NEW QUESTION # 59

.....

The Web-Based VMware 2V0-16.25 practice test evaluates your VMware vSphere Foundation 9.0 Administrator exam preparation with its self-assessment features. With this computer-based program, you may automate the entire VMware exam testing procedure. The web-based VMware 2V0-16.25 practice test elegantly designed interface is compatible with all browsers, including Internet Explorer, Safari, Opera, Google Chrome, and Mozilla Firefox. It will make practice and preparation for the VMware 2V0-16.25 Exam more intelligent, quick, and simple. So, you can be confident that you will find all you need to know to pass the VMware 2V0-16.25 exam questions on the first try.

**2V0-16.25 Latest Exam:** <https://www.passleader.top/VMware/2V0-16.25-exam-braindumps.html>

VMware Latest 2V0-16.25 Exam Dumps The promotion or acceptance will be easy, With our 2V0-16.25 free practice exams, you will minimize your cost on the exam preparation and be ready to pass your 2V0-16.25 actual test on your first try, Our online staff is professionally trained and they have great knowledge on the 2V0-16.25 study guide, 2V0-16.25 test dumps will be the right key to your exam success.

Reading an Email, Begin this process by tapping the Edit command icon, The promotion or acceptance will be easy, With our 2V0-16.25 Free Practice Exams, you will minimize your cost on the exam preparation and be ready to pass your 2V0-16.25 actual test on your first try.

## 2V0-16.25 Accurate Study Material & 2V0-16.25 Valid Practice Questions & 2V0-16.25 Latest Training Material

Our online staff is professionally trained and they have great knowledge on the 2V0-16.25 study guide, 2V0-16.25 test dumps will be the right key to your exam success.

Except the high quality and high passing rate for VMware 2V0-16.25 test, we also offer good service for our customers.
