

# Latest VMware 2V0-41.24 Real Test & 2V0-41.24 Reliable Exam Topics

What's more, part of that Test4Sure 2V0-41.24 dumps now are free: [https://drive.google.com/open?id=1VneeLYkfrhs4x3gs1bK-XGN4M\\_EFFRj](https://drive.google.com/open?id=1VneeLYkfrhs4x3gs1bK-XGN4M_EFFRj)

Our 2V0-41.24 learning materials are perfect paragon in this industry full of elucidating content for exam candidates of various degree to use for reference. We are dominant for the efficiency and accuracy of our 2V0-41.24 actual exam. As leader and innovator, we will continue our exemplary role. And we will never too proud to do better in this career to develop the quality of our 2V0-41.24 Study Dumps to be the latest and valid.

The objective of Test4Sure is help customer get the certification with VMware latest dumps pdf. As long as you remember the key points of 2V0-41.24 test answers and practice exam pdf skillfully, you have no problem to pass the exam. If you lose exam with our 2V0-41.24 Dumps Torrent, we promise you full refund to reduce your loss.

## Actual 2V0-41.24 Exam Prep 100% Valid Test Questions are The Best Products

By propagating all necessary points of knowledge available for you, our 2V0-41.24 study materials helped over 98 percent of former exam candidates gained successful outcomes as a result. Our 2V0-41.24 exam questions have accuracy rate in proximity to 98 and over percent for your reference. And it is unique and hard to find in the market as our 2V0-41.24 training guide. Besides, our price of the 2V0-41.24 practice engine is quite favourable.

## VMware 2V0-41.24 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• VMware Solution: This section measures the skills of VMware NSX Networking professionals and covers knowledge of the VMware Virtual Cloud Network and NSX. Candidates will demonstrate an understanding of the NSX management cluster and the data plane, focusing on how these components interact to provide network virtualization.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Troubleshoot and Optimize the VMware Solution: This section evaluates the skills of VMware Networking Professionals in troubleshooting and optimizing NSX solutions. Candidates will use log files to identify issues, including locating default log file locations and generating log bundles to assist in diagnostics.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Install, Configure, and Administrate the VMware Solution: This domain targets VMware System administrators and emphasizes preparing an NSX infrastructure for deployment. Candidates will learn to create transport zones and configure essential components necessary for a functional NSX environment.</li></ul>

## VMware NSX 4.X Professional V2 Sample Questions (Q28-Q33):

### NEW QUESTION # 28

Which choice is a valid insertion point for North-South network introspection?

- A. Host Physical NIC
- B. Partner SVM
- C. Guest VM vNIC
- **D. Tier-0 gateway**

**Answer: D**

Explanation:

<https://docs.vmware.com/en/VMware-NSX-T-Data-Center/3.2/administration/GUID-53D6C480-7AD3-4B23-922D-430C89992B57.html>

In VMware NSX 4.x, the Tier-0 gateway serves as a critical component for North-South traffic management, which refers to the traffic entering and exiting the data center. It essentially acts as a bridge between the external networks and the internal NSX-T Data Center environment.

The Tier-0 gateway is designed to handle various functionalities including routing, NAT, and firewalling, making it an effective point for network introspection. Network introspection at the Tier-0 gateway allows administrators to monitor, manage, and secure the traffic as it flows between different networks, including the traffic headed to and from the internet or other external networks.

Here's why other options are less appropriate:

A) Guest VM vNIC: This refers to the virtual network interface cards attached to virtual machines. While they handle East-West traffic (traffic within the data center), they are not typically used for North-South traffic introspection.

B) Partner SVM: Service Virtual Machines (SVMs) provided by third-party vendors can integrate with NSX for various services like security, but they are not the direct insertion points for North-South traffic introspection.

D) Host Physical NIC: These are the network interface cards on the physical hosts. Although they are involved in the underlying transport of North-South traffic, they do not serve as insertion points for introspection in the context of NSX.

By utilizing the Tier-0 gateway for North-South introspection, organizations can achieve a centralized and efficient approach to traffic management and security at the entry/exit points of the network.

Reference: VMware NSX-T Data Center documentation provides detailed explanations of gateway functionalities and their roles in network introspection.

VMware NSX-T Architecture and Component guides detail the use of Tier-0 and Tier-1 gateways in traffic management and security implementations.

### NEW QUESTION # 29

Which two of the following features are supported for the Standard NSX Application Platform Deployment? (Choose two.)

- **A. NSX Network Detection and Response**
- B. NSX Intelligence
- C. NSX Intrinsic Security
- **D. NSX Malware Prevention Metrics**
- E. NSX Intrusion Detection and Prevention

**Answer: A,D**

Explanation:

NSX Network Detection and Response & probably Malware Prevention Metrics. NSX intelligence is only supported in Advanced.

<https://docs.vmware.com/en/VMware-NSX/4.0/nsx-application-platform/GUID-85CD2728-8081-45CE-9A4A-D72F49779D6A.html>

### NEW QUESTION # 30

Which three security features are dependent on the NSX Application Platform? (Choose three.)

- **A. NSX Network Detection and Response**
- B. NSX TLS Inspection
- **C. NSX Malware Prevention**
- **D. NSX Intelligence**
- E. NSX Firewall

- F. NSX Distributed IDS/IPS

**Answer: A,C,D**

Explanation:

<https://docs.vmware.com/en/VMware-NSX-T-Data-Center/3.2/nsx-application-platform/GUID-42EDE0AD-CD65-41AC-9694-AD0CCEC35969.html>

### NEW QUESTION # 31

Which two choices are use cases for Distributed Intrusion Detection? (Choose two.)

- A. Quarantine workloads based on vulnerabilities.
- B. Use agentless antivirus with Guest Introspection.
- C. Gain Insight about micro-segmentation traffic flows.
- D. Identify risk and reputation of accessed websites.
- E. Identify security vulnerabilities in the workloads.

**Answer: A,E**

Explanation:

According to the VMware NSX Documentation, these are two of the use cases for Distributed Intrusion Detection, which is a feature of NSX Network Detection and Response:

Quarantine workloads based on vulnerabilities: You can use Distributed Intrusion Detection to detect vulnerabilities in your workloads and apply quarantine actions to isolate them from the network until they are remediated.

Identify security vulnerabilities in the workloads: You can use Distributed Intrusion Detection to scan your workloads for known vulnerabilities and generate reports that show the severity, impact, and remediation steps for each vulnerability.

### NEW QUESTION # 32

An architect receives a request to apply distributed firewall in a customer environment without making changes to the network and vSphere environment. The architect decides to use Distributed Firewall on VDS.

Which two of the following requirements must be met in the environment? (Choose two.)

- A. VDS version 6.6.0 and later
- B. vCenter 8.0 and later
- C. NSX version must be 3.0 and later
- D. NSX version must be 3.2 and later

**Answer: A,D**

Explanation:

Distributed Firewall on VDS is a feature of NSX-T Data Center that allows users to install Distributed Security for vSphere Distributed Switch (VDS) without the need to deploy an NSX Virtual Distributed Switch (N-VDS). This feature provides NSX security capabilities such as Distributed Firewall (DFW), Distributed IDS/IPS, Identity Firewall, L7 App ID, FQDN Filtering, NSX Intelligence, and NSX Malware Prevention.

To enable this feature, the following requirements must be met in the environment:

The NSX version must be 3.2 and later. This is the minimum version that supports Distributed Security for VDS.

The VDS version must be 6.6.0 and later. This is the minimum version that supports the NSX host preparation operation that activates the DFW with the default rule set to allow.

### NEW QUESTION # 33

.....

Every candidate wants to pass the 2V0-41.24 exam in the least time successfully. More importantly, it is necessary for these people to choose the convenient and helpful 2V0-41.24 test questions as their study tool in the next time. Because their time is not enough to prepare for the 2V0-41.24 exam, and a lot of people have difficulty in preparing for the exam, so many people who want to pass the 2V0-41.24 Exam and get the related certification in a short time are willing to pay more attention to our 2V0-41.24 study materials as the pass rate is high as 99% to 100%.
