# Lead2PassExam SAP C-CPI-2506 Dumps PDF Format

It is known to us that our C-CPI-2506 learning materials have been keeping a high pass rate all the time. There is no doubt that it must be due to the high quality of our study materials. It is a matter of common sense that pass rate is the most important standard to testify the C-CPI-2506 training files. The high pass rate of our study materials means that our products are very effective and useful for all people to pass their C-CPI-2506 Exam and get the related certification. So if you buy the C-CPI-2506 study questions from our company, you will get the certification in a shorter time.

As the captioned description said, our C-CPI-2506 practice materials are filled with the newest points of knowledge about the exam. With many years of experience in this line, we not only compile real test content into our C-CPI-2506 learning quiz, but the newest in to them. And our professionals always keep a close eye on the new changes of the subject and keep updating the C-CPI-2506 study questions to the most accurate.

>> C-CPI-2506 Free Practice Exams <<

Provides you with an exam-simulated environment to relieve SAP C-CPI-2506 exam stress

You only need 20-30 hours to practice our software and then you can attend the exam. You needn't spend too much time to learn our C-CPI-2506 study questions and you only need spare several hours to learn our C-CPI-2506 guide torrent each day. Our C-CPI-2506 study questions are efficient and can guarantee that you can pass the C-CPI-2506 exam easily. But if you buy our C-CPI-2506 exam torrent you can save your time and energy and spare time to do other things.

SAP Certified Associate - Integration Developer Sample Questions (Q54-Q59):

NEW QUESTION # 54
You call the following URL in your browser: https://sapes5.sapdevcenter.com/sap/opu/odata/iwbep/GWSAMPLE_BASIC/ProductSet('HT- 1000')/ToSalesOrderLineItems.What file type is displayed?

- A. PHP

- B. HTML
- C. Java
- D. XML

Answer: D

Explanation:
The URL shown is an OData service endpoint exposed from the SAP ES5 Gateway demo system:
https://sapes5.sapdevcenter.com/sap/opu/odata/iwbep/GWSAMPLE_BASIC/ProductSet('HT-1000')
/ToSalesOrderLineItems
OData services in SAP Gateway return XML responses by default when called in a browser, unless otherwise specified by request headers (like JSON format).
The structure follows AtomPub/Atom XML representation, showing entity details and navigation properties.
Therefore, the file type displayed in the browser is XML, not HTML, Java, or PHP.

NEW QUESTION # 55
Which SAP offering provides a highly scalable, distributed event streaming platform that supports MQTT, AMQP, and JMS protocols for efficient and secure event transmission in hybrid IT landscapes?

- A. SAP Integration Suite, Advanced Event Mesh
- B. SAP Business Technology Platform (SAP BTP)
- C. SAP Process Orchestration
- D. SAP Cloud Platform, Integration

Answer: A

Explanation:
SAP Integration Suite, Advanced Event Mesh (AEM) is the SAP offering that provides a highly scalable, distributed event streaming platform. It is specifically designed for large-scale, hybrid, and multi-cloud landscapes where event-driven communication is required across diverse applications and systems.
Key points from SAP documentation:
* Protocol Support: Advanced Event Mesh supports MQTT, AMQP, JMS, REST, and WebSocket protocols, ensuring secure and efficient event transmission across heterogeneous IT landscapes.
* Scalability and Distribution: Unlike standard SAP Event Mesh, which is intended for simpler messaging scenarios, AEM provides global-scale event streaming with distributed brokers that can span multiple geographies and cloud regions.
* Hybrid Integration: AEM enables real-time, event-driven integration across on-premise systems, SAP cloud applications, and third-party solutions, making it suitable for hybrid IT environments.
* Enterprise Features: It includes advanced capabilities such as high availability, disaster recovery, dynamic scaling, and fine-grained security for enterprise-grade messaging.
Why the other options are incorrect:
* A. SAP Business Technology Platform (SAP BTP) # This is the overall platform-as-a-service offering from SAP. It provides the foundation but not specifically the event streaming capability.
* B. SAP Cloud Platform, Integration # This was the older name for what is now SAP Integration Suite (Cloud Integration capability). It does not directly provide advanced distributed event streaming.
* C. SAP Process Orchestration # This is the on-premise middleware suite (PI/PO + BPM), but it is not designed for distributed event streaming or modern event protocols like MQTT.
Therefore, the correct answer is D. SAP Integration Suite, Advanced Event Mesh, as it is the only SAP solution purpose-built to deliver distributed, scalable event streaming with support for MQTT, AMQP, and JMS protocols.

NEW QUESTION # 56
Which functionalities are used by OData?

- A. HTTP. AtomPub, and JSON
- B. SOAP, AtomPub, and JSON
- C. TCP. AtomPub, and JSON

Answer: A

Explanation:

OData uses HTTP, AtomPub, and JSON as its core functionalities. OData is an open protocol that allows the creation and consumption of queryable and interoperable RESTful APIs in a simple and standard way. OData builds on HTTP as the application protocol for transferring data between clients and servers. OData uses AtomPub as one of the formats for representing data feeds and entries in XML. OData also uses JSON as another format for representing data feeds and entries in a lightweight and human-readable way. Reference: Introducing OData - SAP Learning, OData Overview | OData - The Best Way to REST

NEW QUESTION # 57
You want to send messages over an SOAP adapter to an integration flow. Which method do you use to send the messages?

- A. GET
- B. PATCH
- C. UPDATE
- D. POST

Answer: D

Explanation:
To send messages over a SOAP adapter to an integration flow, you must use the POST method. The POST method is used to create or update a resource on the server using the SOAP message body as the input. The SOAP adapter supports both SOAP 1.1 and SOAP 1.2 protocols and can handle both one-way and request-reply message exchange patterns. The SOAP adapter can be configured as a sender or a receiver channel in an integration flow. Reference: SOAP (SOAP 1.x) Adapter | SAP Help Portal, SOAP Sender Adapter: Example Integration Flow | SAP Help Portal

NEW QUESTION # 58
What do you use in an integration flow to handle unexpected errors?

- A. Try-catch subprocesses
- B. Exception handler integration flow elements
- C. Status code checks
- D. Exception-handling subprocesses

Answer: D

Explanation:
You use exception-handling subprocesses in an integration flow to handle unexpected errors. Exception-handling subprocesses are special types of subprocesses that are triggered when an error occurs in the main process or another subprocess. You can define custom actions and logic to handle different types of errors using exception-handling subprocesses. Reference: Modernize Integration with SAP Integration Suite | openSAP

NEW QUESTION # 59
......

The SAP Certified Associate - Integration Developer (C-CPI-2506) product can be easily accessed just after purchasing it from Lead2PassExam. You can receive free SAP Dumps updates for up to 1 year after buying material. The 24/7 support system is also available for you, which helps you every time you get stuck somewhere. Many students have studied from the Lead2PassExam SAP C-CPI-2506 practice material and rated it positively because they have passed the SAP Certified Associate - Integration Developer (C-CPI-2506) certification exam on the first try.

C-CPI-2506 Braindumps Torrent: https://www.lead2passexam.com/SAP/valid-C-CPI-2506-exam-dumps.html
